The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. The Quarterly Review publishes articles that utilize various methodologies that permit generalizable results which help guide the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research briefs, editorials, reviews of programs and scholarly works, and columns. The Quarterly Review defines distance education as institutionally-based formal education in which the learning group is separated and interactive technologies are used to unite the learning group. *Contemporary Issues in American Distance Education IAP* Learn to assess and assure the quality of university-level distance education classes! Now that many colleges and universities have embarked on significant distance education curricula, an overview of the state of the art is necessary. This valuable collection looks at distance education through a varied set of critical lenses to examine how distance education classrooms can affect students' attitudes and behaviors, the use of—and attitudes toward—group projects in online courses, the effects that the use of technology has on the relationship between student and teacher, and a great deal more! *Distance Education: Issues and Concerns*: provides concrete recommendations for enhancing the distance education experience shows the relationship between learning styles, enrollment, and retention in Internet-based courses, and makes recommendations to help ensure student success highlights the importance of conducting small-scale usability studies for instructional Web sites examines the advantages of using handheld computers and mobile phones in teacher education emphasizes the importance of good teaching, no matter what kind of technology is in use provides an overview of the drawbacks and benefits of distance education and a plan for quality control examines the steps taken by one graduate program to ensure continuing improvement of its online courses offers a number of ways to develop a comprehensive quality control system that addresses development, delivery, and evaluation presents a basic cost-income model for electronically delivered instruction provides a social constructionist framework for online learning looks at the challenges that laboratory experience courses present in a distance education context, and shows how remote lab use could work in several engineering disciplines describes a successful hybrid online graduate class designed to help administrators increase their technical competencies and more!

Integrating Service-Learning and Consulting in Distance Education Routledge

Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in-service teachers, and for training programs that discuss teaching distant learners or managing distance education systems. This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs. The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education. In this text we take the following themes: The first theme is the definition of distance education. Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing. This definition is based on the work of Desmond Keegan, but is unique to this book. This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica. The second theme of the book was the importance of research to the development of the contents of the book. The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence. Certainly there are "rules of thumb", but we have always attempted to only include recommendations that can be supported by research. The third theme of Teaching and Learning at a distance is derived from Richard Clark's famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement. Clark's controversial work is discussed in the book,

but is also fundamental to the book's advocacy for distance education – in other words, we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn. Distance delivered instruction is not a "magical" approach that makes learners achieve more. The fourth theme of the book is equivalency theory. Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom. The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive – that it should cover as much of the various ways instruction is made available to distant learners as is possible. It should be a single source of information about the field.

Online Distance Education African Minds

Well-credentialed authors collaborate in Distance Learners in Higher Education, designed to give faculty unique perspectives on a variety of issues in higher education today. Edited by Chère Campbell Gibson, Associate Professor and Chair of the Department of Continuing and Vocational Education at the University of Wisconsin-Madison, this volume encompasses the full realm of teaching and learning at a distance from both an administrative and faculty viewpoint. Connecting the demographics of the distance learner, cultural considerations, academic self-concept and support, and learning strategies, Distance Learners is of interest to faculty and administrators in higher education. This book focuses on the learner and the conditions for learning, and is essential for those who need to stay current in this rapidly changing area.

Distance Education IGI Global

Instructional quality can make or break the learning experience, especially in digital environments where the expressional nuances of interpersonal communication are lost. The most effective distance education instructors and experts are those who recognize the educational needs of students and are able to address those needs through creative use of the technological tools available to them. Identification, Evaluation, and Perceptions of Distance Education Experts explores the current and future trends, needs, and priorities that affect the development of distance education in a postmodern world. This premier reference work will be of significance to those interested in online learning, teaching and training, communication, and education across multiple sectors such as universities, colleges, schools, profit/non-profit e-organizations, and e-commerce.

Handbook of Research on Instructional Systems and Educational Technology Springer

Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in developing countries.

Urban Planning Education John Wiley & Sons

As new digital forms of formal and informal learning proliferate, there is an increasing need to better understand how people in different regions of the world are implementing massive open online courses (MOOCs) and other forms of open educational resources (OERs). Educators, researchers, politicians, and numerous other stakeholders want to grasp what the outcomes of these initiatives are and how they can be improved. Ongoing e-learning developments related to both technology and pedagogy have pushed institutions and organizations to grapple with issues of accreditation, credentialing, quality standards, innovative assessment, and learner motivation and attrition, among other areas of concern. In response, MOOCs and Open Education Around the World explores and illuminates unique implementations of MOOCs and open education across regions

and nations. The book also focuses on the various opportunities as well as the dilemmas presented in this rapidly evolving age of technology-enabled learning. What are the different delivery formats, interaction possibilities, assessment schemes, and business models? What are the key controversies or issues that must be discussed and addressed? This edited collection explains MOOCs and open education trends and issues in a variety of contexts, shares key research findings, and provides practical suggestions and recommendations for the near future.

Teaching and Learning at a Distance IAP

As e-learning has evolved into a global change agent in higher education, it has become more diverse in its form and applications. Now that many institutions have implemented e-learning programs as part of their course offerings, it is essential for these institutions to fully grasp how best to facilitate continued improvements and accessibility in online education. The Handbook of Research on Building, Growing, and Sustaining Quality E-Learning Programs highlights several significant elements of e-learning, including program planning, quality standards, and online course development, as well as institutional, student, and faculty support. Serving as a critical resource for online and hybrid learning programs, this publication is designed for use by administrators, educators, instructional designers, and doctorate-level students in the field of education. *Moving Forward in Distance Education: Charting a Profitable Course for Students, Faculty, and Institutions* Cambridge Scholars Publishing

This book situates Massive Open Online Courses and open learning within a broader educational, economic and social context. It raises questions regarding whether Massive Open Online Courses effectively address demands to open up access to education by triggering a new education order, or merely represent reactionary and unimaginative responses to those demands. It offers a fresh perspective on how we conceptualise learners and learning, teachers and teaching, accreditation and quality, and how these dimensions fit within the emerging landscape of new forms of open learning.

Education and Social Media IGI Global

Online Distance Education: Towards a Research Agenda offers a systematic overview of the major issues, trends, and areas of priority in online distance education research. In each chapter, an international expert or team of experts provides an overview of one timely issue in online distance education, summarizing major research on the topic, discussing theoretical insights that guide the research, posing questions and directions for future research, and discussing the implications for distance education practice as a whole. Intended as a primary reference and guide for distance educators, researchers, and policymakers, Online Distance Education addresses aspects of distance education practice that have often been marginalized, including issues of cost and economics, concerns surrounding social justice, cultural bias, the need for faculty professional development, and the management and growth of learner communities. At once soundly empirical and thoughtfully reflective, yet also forward-looking and open to new approaches to online and distance teaching, this text is a solid resource for researchers in a rapidly expanding discipline.

Distance Learners in Higher Education Gangemi Editore Spa

Distance Learning in America is characterised by an enormous variety of institutions, programs, media and pedagogical methods. This book attempts to draw together an overall picture of the rapid growth and achievements in the field of American distance education and the problems and issues that confront it. The book is aimed primarily at the university and college teacher and student, and particularly at graduate students in adult and distance education and other related fields. It aims to provide a cross-sectional view of the administrative and policy issues, the questions about learners and instruction, the problems of curriculum and course design and the new conceptual and theoretical concerns of some of the country's foremost practitioners and thinkers.

Identification, Evaluation, and Perceptions of Distance Education Experts Atwood Publications

Distance Learning is for leaders, practitioners, and decision makers in the fields of distance learning, e-learning, telecommunications, and related areas. It is a professional journal with applicable information for those involved with providing instruction to all kinds of learners, of all ages, using telecommunications technologies of all types. Stories are written by practitioners for practitioners with the intent of providing usable information and ideas. Articles are accepted from authors--

new and experienced--with interesting and important information about the effective practice of distance teaching and learning. Distance Learning is published quarterly. Each issue includes eight to ten articles and three to four columns, including the highly regarded "And Finally..." column covering recent important issues in the field and written by Distance Learning editor, Michael Simonson. Articles are written by practitioners from various countries and locations, nationally and internationally.

Inclusive Online and Distance Education for Learners with Dis/abilities IAP

Our increasingly globalized world is driven by shared knowledge, and nowhere is that knowledge more important than in education. Now more than ever, there is a demand for technology that will assist in the spread of knowledge through customized, self-paced, and on-demand learning. The Handbook of Research on Innovative Technology Integration in Higher Education provides an international perspective on the need for information and communication technology in education and training. Highlighting the use of technology in both formal and informal learning, this book is an essential reference for academics, corporate leaders, government agencies, profit and non-profit organizations, policymakers, or anyone interested in the use of technology to educate and share information.

Thinking Collaboratively IGI Global

In recent years, distance education programs have grown to allow greater educational opportunities to a diverse set of learners from all over the world. As remote learning becomes a widespread practice, universities too must adapt to this changing educational landscape. Critical Examinations of Distance Education Transformation across Disciplines provides an interdisciplinary look at the development of distance learning in higher education. This reference work bridges the gap between disciplines by offering practical tools and solutions for successful distance education implementation. Educators, administrators, and researchers across academia will find this publication a timely and relevant resource.

Handbook of Research on Innovative Technology Integration in

Higher Education CRC Press

The Wiley Handbook of School Choice presents a comprehensive collection of original essays addressing the wide range of alternatives to traditional public schools available in contemporary US society. A comprehensive collection of the latest research findings on school choices in the US, including charter schools, magnet schools, school vouchers, home schooling, private schools, and virtual schools Viewpoints of both advocates and opponents of each school choice provide balanced examinations and opinions Perspectives drawn from both established researchers and practicing professionals in the U.S. and abroad and from across the educational spectrum gives a holistic outlook Includes thorough coverage of the history of traditional education in the US, its current state, and predictions for the future of each alternative school choice

Distance Learning John Wiley & Sons

Student retention has become a key issue for all further and higher education institutions and is a major concern among those involved in online learning courses where retention rates are often even poorer than those for traditional campus-based courses. There is increasing recognition that student retention is the responsibility of the actual institutions running the courses, and that it is within their power to encourage sustained participation without compromising academic standards. In this book, Ormond Simpson provides a clear, accessible analysis of what works and at what cost. He outlines strategies for increasing retention, providing useful case studies and examples to illustrate how these strategies can change institutional policy and practice. Areas covered include: * Who drops out and why * Integration * Reclamation * 'Retentioneering' an institution * Recruitment and retention * Course design.

Handbook of Open, Distance and Digital Education IGI Global

The second edition of this award-winning book continues the mission of its predecessor, to provide a comprehensive compendium of research in all aspects of distance education, arguably the most significant development in education over the past quarter century. While the book deals with education that uses technology, the focus is on teaching and learning and how

its management can be facilitated through technology. This volume will be of interest to anyone engaged in distance education at either the K-12 or college level. It is also appropriate for corporate and government trainers and for administrators and policy makers in all these environments.

Open and Distance Education in Australia, Europe and the Americas SAGE Publications

Education is the key to economic, social and environmental progress, and governments around the world are looking to improve their education systems.

Reconceptualising Learning in the Digital Age Springer Nature

As distance learning continues to grow, universities are seeking ways to integrate traditional student community service into online courses. Supported by seven years of successful implementation, this book presents an award-winning service-learning model through which online students serve as consultants to organizations nationwide.

Open and Distance Education in Asia, Africa and the Middle East Routledge

This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: Australia, Brazil, Canada, Germany, the UK and the US. It discusses how open and distance education is evolving in a digital age to reflect the needs and circumstances of national higher education systems in these countries, and explores the similarities and differences between the ways in which they are organized and structured. It is the first book to make such comparisons and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era with growing use of online education as well as open and distance education, this book is particularly useful for policy-makers and senior administrators who want to learn about organizing and expanding open and distance education provision. It is also a valuable reference for researchers, academics and students interested in understanding the different approaches to open and distance education.
