winning car that's quick out of the gate. Folk Toys Rodale Books

When it comes to making that special wooden toy, space is the new frontier. Wooden toy designs have changed very little since long before we first landed on the moon: plenty of cars, p-prop planes, trucks, and trains--and, yes, that occasional Buck Rodgers-era rocket--but few projects that hint at the world of the future. No longer. With Wooden Toy Spacecraft, the iconic wooden toy blasts off into the 21st century with this collection of 12 state-of-the-art spacecraft that you can build in a weekend. Going well beyond tired old rocket ships, woodworker Gonzalo Ferreyra offers up an intergalactic fleet of

original designs that can fly proudly alongside the classics we know from film, television, and our real-world history of space exploration. Dozens of detailed photographs and clear, concise instructions make even the most challenging techniques easy to conquer. With a few pieces of lumber, some cut-offs from your scrap box, and a healthy dose of future-vision, space geeks of all ages can craft a beautiful, awe-inspiring vehicle to proudly display or to gift to that special kiddo for hours of imaginative play.

Step-by-step photos and instructions for projects involving lamination -- the bonding together of two or more pieces of wood -- are provided in this guide to using wood lamination as an art form. Depending on the intricacy of the design, lamination can be either very simple or astoundingly complex. The ten projects presented here are of all differing skill levels and abilities, often presenting fascinating challenges that help woodworkers develop their

laminating skills. Several designs for clocks and puzzles are included, as are unique pieces such as a piggy bank, a basket weave box, and a cutting board.
