æIn the seven decades since the Second World War, 14 Squadron has operated a wide array of aircraft types (Mosquitoes, Vampires, Venoms, Hunters, Canberras, Phantoms, Jaguars and Tornados) in a fascinating variety of roles. For much of this time, the Squadron was based in Germany at the front line of the Cold War, but it also participated in the Gulf War in 1991, in operations over Iraq from 1991-2009, in the Kosovo conflict in 2000 and latterly during the war in Afghanistan, firstly with the Tornado GR4 and then with the Shadow R1. Today the Squadron operates in great secrecy in an Intelligence, Surveillance, Target Acquisition and Reconnaissance role.æ Having had access to log-books, contemporary diaries, maps and

photographs, as well as oral and written accounts from a large number of ex-Squadron members, the author has been able to produce as complete an account as is presently possible of the operational history of 14 Squadron in the second half of the twentieth century and the opening years of the twenty-first.

Writer Rinker Buck looks back more than 30 years to a summer when he and his brother, at ages 15 and 17 respectively, became the youngest duo to fly across America, from New Jersey to California. Having grown up in an aviation family, the two boys bought an old Piper Cub, restored it themselves, and set out on the grand journey. Buck is a great storyteller, and once you get airborne with the boys you find yourself absorbed in a story of adventure and family drama. And *Flight of Passage* is also an affecting look back to the summer of 1966, when the times seemed much less cynical and adventures much more enjoyable.

First published in 1938, *Teach Yourself To Fly* was not only one of the very first Teach Yourself books to be published but the first to actually change the world. It was used on the eve of the second world war to prepare pilot recruits and conscripts before they were called for service, and as such it was read religiously by thousands of young men, some as young as 17, and directly impacted on the British war effort. This beautiful new printing of the book captures all of the feelings of that extraordinary time - it's nostalgic, understated, inspiring and very British indeed, warning young pilots, amongst other things, not to feel 'too discouraged' in the event of a crash landing.

Technology has changed hugely, but the principles of aviation as they were in the middle of the

twentieth century are perfectly summarised in this lovely book. Get hold of the right vehicle, and it really can teach you to fly. What happens when you're up there, however, is your responsibility. Since 1938, millions of people have learned to do the things they love with Teach Yourself. Welcome to the how-to guides that changed the modern world.

The autobiography of one of the greatest pilots in history. In 1939 Eric Brown was on a University of Edinburgh exchange course in Germany, and the first he knew of the war was when the Gestapo came to arrest him. They released him, not realising he was a pilot in the RAF volunteer reserve: and the rest is history. Eric Brown joined the Fleet Air Arm and went on to be the greatest test pilot in history, flying more different aircraft types than anyone else. During his lifetime he made a record-breaking 2,407 aircraft carrier landings and survived eleven plane crashes. One of Britain's few German-speaking airmen, he went to Germany in 1945 to test

the Nazi jets, interviewing (among others) Hermann Goering and Hanna Reitsch. He flew the suicidally dangerous Me 163 rocket plane, and tested the first British jets. WINGS ON MY SLEEVE is 'Winkle' Brown's incredible story.
