Their approach to technology. -- 2. Their use of social media. -- 3. Their understanding the relationship between pricing and value. -- 4. And their conviction that customer experience must drive a firm's internal processes. They Call Them The 'Radical' Practitioners There's an uprising of innovative CPAs in the accounting profession. This group created a new support community that is no longer driven by the establishment. The establishment can't control the conversation. In fact, they almost missed it. Now they endorse and support us. But it didn't begin with them. When Jody Padar first started doing this, she wasn't aware of anyone doing what she was doing. Then she went to Twitter. That's where she really met her peers. They were learning from each other from day one and that same community of support is still happening today. A "radical" practitioner is a person that calls upon himself and others to redefine their firms and their lives by moving away from the traditional firm business model. The term radical applies because what they are doing to their firms and indirectly to the profession is fundamental to its core. It's abrupt, disruptive, unexpected, and far reaching. They are shaking up the status quo. They are changing because their customers and the world are changing around us all. Some might also perceive radical to be a negative term. It's not. The movement is more likely following the happy expression, "that's radical, dude." Everyone can learn and join the movement. The Radical CPA Community Is Here To Help You Be Radical, Too The best part about these radical professionals is that we believe in abundance. We promote and celebrate a new way of doing business and encourage the rest of the profession to move forward and change as a whole. \*\*\* Save! Nothing in life is certain, except death and taxes - or so the expression goes. And over the past two decades South African criminals and tax dodgers have come to realise this truth the hard way. Tax sleuth Johann van Loggerenberg was at the centre of many of SARS' high-profile cases during his time there. As far as SARS is concerned all forms of income are subjected to tax, even if by ill-gotten means. Whether you are a drug dealer from Durban, one of the hitmen who shot Brett Kebble or soccer boss Irvin Khoza, you have to pay your dues! Van Loggerenberg relates the riveting inside

stories of the investigations into businessmen like Dave King, Billy Rautenbach, Barry Tannenbaum and his ponzi scheme, and others. Over the years he got to know all the scams and dirty tricks in the book and he explains these in plain language. In these investigations the tax authority worked closely with the police, the NPA and the Directorate of Special Operations. However, after a few years SARS became the victim of its own success. In telling the stories of how tax evaders were caught, Van Loggerenberg also shows how the power struggle between different state departments and the phenomenon of state capture in recent years started crippling SARS.
