Everything Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic*

Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying

custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or

domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion

<p>valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system</p>	<p>troubleshooting, and other things that heat up the cabin. <i>Fuel Economy Guide</i> Turtleback Books Everyone has a road trip story and book #3 in The Old Car Nut Book series provides a sampling of accounts on the road from all over the country. Then I saw it. There was a paint chip on the front of the car Blake could see the frown on my brow and asked what was wrong. "Our first rock chip. Darn it " Then

something really amazing happened. Blake put his hand on my shoulder and said, "Don't worry dad. That's not a rock chip. That's a memory mark. Every time you look at that you'll be reminded what a special day today was." I about started crying right then and there. This was an eight year old teaching his old man the meaning of life.
