If you want to know what anthropology is, look at what anthropologists do. This Very Short Introduction to Social and Cultural Anthropology combines an accessible account of some of the disciplines guiding principles and methodology with abundant examples and illustrations of anthropologists at work. Peter Just and John Monaghan begin by discussing anthropologys most important contributions to modern thought: its investigation of culture as a distinctively human characteristic, its doctrine of cultural relativism, and its methodology of fieldwork and ethnography. They then examine specific ways in which social and cultural anthropology have advanced our understanding of human society and culture, drawing on examples from their own fieldwork. The book ends with an assessment of anthropologys present position, and a look forward to its likely future. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Asian Anthropology Pearson Education India

Asian Anthropology raises important questions regarding the nature of anthropology and particularly the production and consumption of anthropological knowledge in Asia. Instead of assuming a universal standard or trajectory for the development of anthropology in Asia, the contributors to this volume begin with the appropriate premise that anthropologies in different Asian countries have developed and continue to develop according to their own internal dynamics. With chapters written by an international group of experts in the field, Asian Anthropology will be a useful teaching tool and a valuable resource for scholars working in Asian anthropology.

The Taman typically associate illness with an encounter with spirits that both seduce and torment a person in dreams or waking life. Rather than use medicines to counter the effect of these discomfoting visitors, the shamans - called baliens - use stones that are said to contain the convergence of wild spirits that have come into being during the initiation ceremony".--P. 209.

Islamic South Asia has become a focal point in academia. Where did Muslims come from? How did they fare in interacting with Hindu cultures? How did they negotiate identity as ruling and ruled minorities and majorities? Part I covers early Muslim expansion and the formative phase in context of initial cultural encounter (app. 700-1300). Part II views the establishment of Muslim empire, cultures oscillating between Islamic and Islamicate, centralised and regionalised power (app. 1300-1700). Part III is composed in the backdrop of regional centralisation, territoriality and colonial rule, displaying processes of integration and differentiation of Muslim cultures in colonial setting (app. 1700-1930). Tensions between Muslim pluralism and singularity evolving in public sphere make up the fourth cluster (app. 1930-2002).
