This unique text presents a comprehensive narrative on why and how health professions students need to be evaluated for practice in the 21st century. It systematically addresses current evaluation best practices in the health professions to identify today's evaluation benchmarks, reveal evaluation limits, address improvement pathways, and map a research agenda to boost future evaluation practices. Advancements in information and communication technology, bioscience and behavioral research, and worldwide travel are dissolving barriers that have separated professions, countries, and cultures for centuries. This book both celebrates these achievements and carefully considers next steps. It recognizes the huge improvements made in evaluation practices within the health professions over the past 40 years but asks for more - calling for added reform and better understanding of current practice from different social, cultural, and educational perspectives. International Best Practices for Evaluation in the Health Professions values crossprofessional programs that span boundaries and acknowledge the authority of the future rather than historical baggage. Educators worldwide will be enlightened and inspired by its straightforward, compelling narrative.

Principles of Assessment in Medical Education Independently Published

When I was applying to medical school and received interviews with the multiple mini interview (MMI) format, I had no idea what I was getting myself into. Despite researching online, reading other books I found on Amazon, and gathering information from friends, I did not fully grasp the true concept behind the MMI until attending seven of these interviews. With each interview, I got better in responding and learned from my mistakes from the previous interview. This constant real-life practice gave me enormous insight into WHAT it really takes to do well on the MMI. I noticed I was not able to find any of this information anywhere else, which led me to make this eBook. I like to think that responding to a scenario is an art. I say this because everyone will be responding differently and will approach the situation at different angles. In the past, I have heard that there is not a single right answer, but there are many wrong answers. I disagree with this partially and would like to rephrase this. There is a common RIGHT approach to every scenario and there are many WRONG approaches you can take. In this eBook, I will begin by explaining what the MMI is all about and later outline the PRINCIPLES that you should learn. The MMI is all about these principles. If you learn the main principle, you will confidently respond to the scenario despite the extra fluff or different details they provide. This is how you do well at the MMI. Along with an

explanation for each principle I have also generated key buzzwords that you should mention during your response. These buzzwords are what drives the response home. It is what makes the interviewer think, "This person knows what he or she is talking about." Despite the explanations and buzzwords, I took the liberty to include numerous example scenarios and an ideal response for each. The best practice is dissecting these questions and their responses and learning the main concept behind each question. You will notice the frame of thinking, understand the principle, and recognize the lingo necessary to effectively answer each MMI question. This is how you build confidence. I have also included chapters on the role-playing station, the teamwork station, the typing writing station, and a chapter filled with example scenarios you may practice on your own. After reading through this eBook, you will be poised to attend any multiple mini interview and answer any MMI related question effectively. I am 100% confident in this statement.

This workbook is devised as a guide to help GP Trainers and their new GP Trainees or Foundation Year (FY) doctors during the induction period. It will simplify your induction period by bringing together all the commonly used resources together in one book. Plus, no more searching your computer for files here, there and everywhere. And no more emailing things out. Instead, buy a copy for your trainee - and voila - you're all ready! This workbook provides a generic induction framework that should work universally across the UK (minor adjustments for Scotland). It is devised to ensure comprehensive coverage of all the essential

areas of General Practice Training in a structured and timely way - WITHOUT overloading the new trainee! And of course, you can cherry-pick and focus on specific areas too. This GP induction workbook will inject a lot of creativity and dynamism into your induction training period. It will certainly give peace of mind that everything that needs covering is covered - including those little but important bits we all often forget. It is full of tasks, task sheets, things to read at home and a suggested set of tutorial programmes. There's a lot to learn in General Practice. This workbook ensures that the trainee is equipped with the "right level of knowledge" for this moment in time. And that includes what clinical bits to know early on to ensure patient safety. With the challenging requirements of the trainees and the restrictive timelines trainers have to abide by, this book is the perfect aide-memoire for both parties. So who should buy this handbook? GP trainers, GP trainees and FY doctors doing a stint in General Practice. GP induction has never been made easier. Simplify your training life. Some of the things included are... Medical Education: Theory and Practice is a new text linking the theory and the practice for graduate students and educators who want to go beyond the basics. The scholarship of medical education is, above all, a 'practice', but one that has a strong theoretical foundation. Neither theory nor practice stand still, and both are grounded in research. The novelty of this book lies in its interweaving of practice, theory, innovation and research. The book starts with a theorised, contemporary overview of the field. Next, it explores the theoretical foundations of medical education in depth. The remainder of the book reviews a whole range of educational contexts, processes and outcomes. This work has been edited by a distinguished, international team of medical educationalists and written by equally accomplished authors from across the globe representing a spectrum of disciplines. This will be an invaluable text for all Masters Students in health

professions education as well as PhD students and education researchers wanting a background to the discipline. Educators and medical students will also find it a very useful resource. Written by key figures in medical educational research combined with a strong editorial influence from the international editorial team. The text has a strong evidence-based approach that is fully cognisant of research methodology issues, The book provides a scholarly explanation on the topic, rather than aiming to say the last word. Written throughout in a clear and comprehensible style. The content is extensively referenced with additional suggestions for further reading.

How to Prepare for Medical School Interviews Springer Nature

Medical interviews have changed a lot with time; in the last two decades, multiple mini interviews (MMIs) have revolutionized the assessment strategies for entrance to medical schools. MMIs usually consist of 6-10 stations of independent assessments done in a timed circuit so that the same examiner evaluates a specific skill for a station among the candidates. Many of these stations assess a candidate's soft skills, including critical thinking, problem solving, team working, leadership and professional attitudes in addition to their knowledge, skills and motivation towards choosing medicine as a career. MMIs are not just a test of a candidate's knowledge or skills, but their ability to use it appropriately at the right time. Aristotle said, 'we are what we repeatedly do. Excellence, then, is not an act, but a habit'. Candidates wishing to succeed in medical MMI interviews need repetitive practice in the various stations. These stations usually include assessments on communication skills, medical ethics, recent medical facts, role play with an empathetic approach, data interpretation and calculations, scenario-based situations, personal character, motivation and judgment. This book will provide an excellent variety of opportunities to practice these stations and guide the candidate with a framework of answers. This book can be used for various medical university entrance exams, including those in the United Kingdom via the Universities and Colleges Admissions Service (UCAS), the United States via the American Medical College Application Service (AMCA), Canada via the respective Medical School Applications Service, Australia via the specific state Tertiary Admissions Centre and many other countries via their specific admission pathways. Dr. Thanthullu Vasu has previously published four medical books alongside many chapters and articles in leading international journals. He has founded, organized and directed many teaching courses that have received excellent feedback. He regularly organizes national MMI courses for candidates applying to medical schools; these courses are in high demand and have consistently produced a successful outcome. Many of the contributors in the book are team members from the RISE Foundation Leicestershire, a charity based in Leicestershire (<https://risefoundationuk.com/>). All the

contributors have extensive experience as examiners in many interviews and courses. The royalties from the sale of this book will be donated to the RISE Foundation Leicestershire. "Jay taught me to tackle the interviews using his unique approach - to effectively tell interviewers about who you are in ways that highlight your skills in a humanistic fashion. Further, he helped me show medical schools why I was a great candidate. Jay is a key reason why I can call myself a doctor today." Anonymous, MD, University of Ottawa, School of Medicine 2. "I owe my medical school acceptance to Jay. I applied and interviewed three years straight without success. Frustrated and disheartened, I could not figure out what I did wrong. The year I worked with Jay, I told myself this would be my last application. However, Jay pointed out my blind

spots, shined the light on my strengths, and showed me how to demonstrate my qualities. Without his help and approach, I cannot call myself a medical student today." BH, University of British Columbia, School of Medicine 3. "Hi Jay! I got in! I want to thank you again. Your personalized approach & guidance throughout the application process has been invaluable in helping me get accepted. I only wish I had known you sooner!" GL, Queen's University, School of Medicine 4. "I was really worried about my interview. I often get off topic and was concerned that I wouldn't answer the questions well. Initially, I felt really scattered and unsure how to respond in the best way. Fortunately, Jay helped me develop a strategy to structure and polish my responses and represent my best self. His approach made me stand out more than my peers." SS, University of Calgary, School of Medicine "Before working with Jay, I was completely lost on how to approach the multiple mini interview. But after working with Jay, I felt 10x more confident and could organize my thoughts and deliver strong responses to many questions. He showed me the importance of personal qualities and taught me how to showcase my strengths using personal stories. I am so excited to start medical school in the fall of 2018 all thanks to his guidance. I could not have been this successful without him!" This book is a student reference guide book for the MD/PhD application process. It begins with an overview of the structure of a typical MD/PhD program as well as student outcomes and career choices of MD/PhD graduates. Next is an outline of the academic and extracurricular prerequisites as well as the basic components of the application itself. The authors then address the factors that MD/PhD students should consider when selecting schools to which to apply. Continuing to the main application, examples are provided of all the different essay types that MD/PhD applicants will encounter along with comments on how to address the deliberately vague and abstract prompts while tailoring the responses to the combined-degree program. Most uniquely, included is a very detailed explanation of the many

types of interviews that applicants will encounter and how to prepare for them by integrating extensive personal experience and first-hand discussions with MD/PhD program leaders. Lastly, there will be a discussion on how to cope with the year-long timeline that constitutes this application process and provide guidance regarding properly responding to acceptances and waitlist offers. Written by a team of authors each experienced with the MD/PhD application, this book aids the prospective applicant with navigating this challenging process.

This textbook covers all general areas of knowledge required for a trainee, generalist medical administrator, and doctor undergoing training to be a medical administrator specialist. Chapters cover all the key topics on medical administration and leadership. Some of the key topics included are: health systems and policy, health law, private health and insurance, health disaster planning, population and public health, health information and technology, and health economics and financial management. Medical practitioners of today are part of huge changes in medical practice as continuing developments are happening in biomedical sciences and clinical practice with new health priorities, rising expectations among patients and the public, and changing societal attitudes. Consequently, basic knowledge and skills, while fundamentally important are not enough today on their own and doctors thus need to demonstrate leadership combined with sound management skills to drive the necessary changes required to meet the challenges head. This book serves as an invaluable resource for a wide spectrum of physicians including specialists, clinician managers and other health professionals, as well as non-clinical managers working in health. This is a gateway text for trainees in medical administration, specialist medical administrators, aspiring medical managers, health service managers, and heads of service and departments in various medical specialties.
