This timely book is a road map for defining the care of acute heart failure patients in the short stay or observation unit setting. Produced in collaboration with the Society of Chest Pain Centers, this book provides an understanding of the diverse medical needs and solutions, administrative processes, and regulatory issues necessary for successful management. In an environment of increasing financial consciousness, medical practice is changing drastically. Short stay care is premier among the new specialties that cater to the complex balance of optimizing patient outcomes while minimizing fiscal burdens. The observation unit has proven to be an excellent arena for the care of acute heart failure, replete with opportunities to improve both medical management and quality metrics.

Unique to the field, Short Stay Management of Acute Heart Failure, Second Edition is the only book of its kind, providing the medical, regulatory, and economic tools necessary to create and implement successful short stay management protocols and units for the care of the heart failure patient. It is an essential guide for health care professionals and for hospitals and institutions wishing to be recognized as quality heart failure centers as accredited by the Society of Chest Pain Centers.

Welcome to Zhangjiajie for the 3rd International Conference on Computer Network and Mobile Computing (ICCNMC 2005). We are currently witnessing a proliferation in mobile/wireless technologies and applications. However, these new technologies have ushered in unprecedented challenges for the research community across the range of networking, mobile computing, network security and wireless web applications, and optical network topics. ICCNMC 2005 was sponsored by the China Computer Federation, in cooperation with the Institute for Electrical and Electronics Engineers (IEEE) Computer Society. The objective of this conference was to address and capture highly innovative and state-of-the-art research and work in the networks and mobile computing industries. ICCNMC 2005 allowed sharing of the underlying theories and applications, and the establishment of new and long-term collaborative channels aimed at developing innovative concepts and solutions geared to future markets. The highly positive response to ICCNMC 2001 and ICCNMC 2003, held in Beijing and Shanghai, respectively, encouraged us to continue this international event. In its third year, ICCNMC 2005 continued to provide a forum for researchers, professionals, and industrial practitioners from around the world to report on new advances in computer network and mobile computing, as well as to identify issues and directions for research and development in the new era of evolving technologies.
