*Composing the Party*

Line Steidl / Edition 7L

The Judengasse in Frankfurt, which was established in 1462, was the first ghetto in Europe and one of the most important centers of European Jewry until it was dissolved in 1796. This book accompanies the new permanent exhibition in the Judengasse Museum. It presents Jewish history and culture from the Middle Ages to the eighteenth century. Featuring paintings, ritual objects, books and documents – and examining these in conjunction with archeological finds – it paints a rich portrait of everyday life in the Judengasse.

The son of a high-

ranking Nazi recounts his experiences as a five year old boy who's Austrian family introduced him to Goering, Goebbels, and even Hitler himself. Behr also explains the difficulties of growing up in post-war Austria with children and adults who were fully aware of his father's involvement with the Nazis and his subsequent trial for war crimes.

"Though I was well aware that Albert Schweitzer preached a great deal both before and after he became a physician, I never encountered any of his sermons until I was privileged to read the present collection prior to publication. What I find in this increases my sense of wonder, though it does not

increase my surprise. It pleases me to find that like other speakers and writers, the famous missionary doctor preached many of his ideas before they were cast into essay form, thus following the experimental method...On the whole the sermons seem contemporary... Very early in the twentieth century, he understood that Christianity is not a merely spiritual religion and that the popular arguments against missions are superficial ones... What pleases me most about the new publication is its revelation of the author's deep personal piety..." -- D Elton Trueblood (from the Foreword).

*The Philosophy of Civilization* Indiana University Press  
Ottmar Ette's

TransArea proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English

translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

**Reverence for Life**

Granta Books (UK)  
Volume three of A Cultural History of the

Modern Age finishes a journey that begins with Descartes in the first volume and ends with Freud and the psychoanalytical movement in the third volume. Friedell describes the contents of these books as a series of performances, starting with the birth of the man of the Modern Age, followed by flowering of this epoch, and concludes with the death of the Modern Age. This huge landscape provides an intertwining of the material and the cultural, the civil and the military, from the high points of creative flowering in Europe to death and emptiness. The themes convey multiple messages: romanticism and liberalism opens the cultural scene, encased in a movement from

The Congress of Vienna and its claims of peaceful co-existence to the Franco-German War. The final segment covers the period from Bismarck's generation to World War I. In each instance, the quotidian life of struggle, racial, religious, and social class is seen through the lens of the mighty figures of the period. The works of the period's great figures are shown in the new light of the human search for symbolism, the search for superman, the rise of individualism and decline of history as a source for knowledge. This third volume is painted in dark colors, a foreboding of the world that was to come, of political extremes, and intellectual exaggerations. The

author looks forward to a postmodern Europe in which there is a faint gleam of light from the other side. What actually appeared was the glare of Nazism and Communism, each claiming the future. The Hebrew Folktales A&C Black  
Pierre Bourdieu and Hans Haacke's frank and open dialogue on contemporary art and culture ranges widely, from censorship and obscenity to the social conditions of artistic creativity. Among the examples they discuss are the controversies surrounding the exhibition of photographs by Robert Mapplethorpe and Andres Serrano, the debates concerning multiculturalism and ethnic diversity, and the uses of art as a means of contesting

and disrupting symbolic domination. They also explore the central themes of Hans Haacke's work, which is used to illustrate the book. *Free Exchange* is a timely intervention in current debates and a powerful analysis of the conditions and concerns of critical artists and intellectuals today.

This book covers all aspects of Korda's extraordinary career with specific reference to his interest in fashion, the revolution and other features of Cuban society. Starting with his early advertising work from the early 1950s the book traces Korda's entry into the world of fashion and his belief in what he termed an 'aesthetics of beauty'.

He explored this idea not only in the sensuous curves of the female form but also in the unique landscape of Cuba as well as within the magnificence of the heroic revolutionary. The book also includes his extensive documentation of Castro and Che. *A Revolutionary Lens* is a celebration of Korda's belief in beauty and has been edited with full support of Alberto Korda's daughter Diana Diaz of the Korda estate.

In the late nineteenth century, Germans spearheaded a worldwide effort to preserve the material traces of humanity, designing major ethnographic museums

and building extensive networks of communication and exchange across the globe. In this groundbreaking study, Glenn Penny explores the appeal of ethnology in Imperial Germany and analyzes the motivations of the scientists who created the ethnographic museums. Penny shows that German ethnologists were not driven by imperialist desires or an interest in legitimating putative biological or racial hierarchies. Overwhelmingly antiracist, they aspired to generate theories about the essential nature of human beings through their museums' collections. They gained support in their efforts from boosters who were enticed by

participating in this international science and who used it to promote the cosmopolitan character of their cities and themselves. But these cosmopolitan ideals were eventually overshadowed by the scientists' more modern, professional, and materialist concerns, which dramatically altered the science and its goals. By clarifying German ethnologists' aspirations and focusing on the market and conflicting interest groups, Penny makes important contributions to German history, the history of science, and museum studies. Korda MIT Press 2020 marks the 25th anniversary of the adoption of the Beijing Platform for Action. It also marks the first

time that progress on the implementation of the Platform is reviewed in light of the 2030 Agenda for Sustainable Development, adopted in 2015. This report therefore takes an integrated approach to reporting on progress, gaps and challenges related to the advancement of gender equality and women's rights across six dimensions that link the Platform's critical areas of concern and the Sustainable Development Goals. It finds that there have been important gains since the adoption of the Beijing Platform in 1995, but that progress towards gender equality has stalled and even reversed in some areas in recent years. Across the globe women's movements,

energized by young feminists at the helm, are challenging slow and piecemeal progress and are impatient for systemic change. World leaders can learn from the ways in which these movements work across silos and political boundaries, seeing their work to advance the rights of women and girls as inextricably linked to the achievement of economic, social and environmental justice for all. The report features their voices that must be heard and acted upon. The report also highlights catalytic policies and programmes under each of the six dimensions as well as a number of cross-cutting strategies that can accelerate the implementation of the

entire Platform for Action for this generation and the next.

Early in 1788, Franz Anton Mesmer, a Viennese physician, arrived in Paris and began to promulgate a somewhat exotic theory of healing that almost immediately

seized the imagination of the general populace. Robert Darnton, in his lively study of mesmerism and its relation to eighteenth-century radical political thought and popular scientific notions, provides a useful contribution to the study of popular culture and the manner in which ideas are diffused down through various social levels.

During much of the Cold War, physical escape from countries in the Eastern Bloc was a nearly impossible act. There remained, however, possibilities for other socialist escapes, particularly time spent free from party ideology and the mundane routines of everyday life. The

essays in this volume examine sites of socialist escapes, such as beaches, campgrounds, nightclubs, concerts, castles, cars, and soccer matches. The chapters explore the effectiveness of state efforts to engineer society through leisure, entertainment, and related forms of cultural programming and consumption. They lead to a deeper understanding of state-society relations in the Soviet sphere, where the state did not simply "dictate from above" and inhabitants had some opportunities to shape solidarities, identities, and meaning.

By the time he was killed in the jungles of Bolivia, where his body

was displayed like a deposed Christ, Ernesto "Che" Guevara had become a synonym for revolution everywhere from Cuba to the barricades of Paris. This extraordinary biography peels aside the veil of the Guevara legend to reveal the charismatic, restless man behind it. Drawing on archival materials from three continents and on interviews with Guevara's family and associates, Castaneda follows Che from his childhood in the Argentine middle class through the years of pilgrimage that turned him into a committed revolutionary. He examines Guevara's complex relationship with Fidel Castro, and analyzes the flaws of character that compelled him to leave

Cuba and expend his energies, and ultimately his life, in quixotic adventures in the Congo and Bolivia. A masterpiece of scholarship, Companero is the definitive portrait of a figure who continues to fascinate and inspire the world over.

We are witnessing the birth of a new politics -- anti-capitalist, libertarian and anti-war. But where do today's dissidents come from? Dissident Marxism argues that their roots can be found in the life and work of an earlier generation of socialist revolutionaries, including such inspiring figures as the Soviet poet Mayakovsky, the Marxist philosopher

Karl Korsch, Communist historians Edward Thompson and Dona Torr, the Egyptian surrealist Georges Henein, American New Left economists Paul Baran and Paul Sweezy, advocates of Third World liberation including Walter Rodney and Samir Amin, Harry Braverman, the author of Labor and Monopoly Capital, and David Widgery, the journalist of the May '68 revolts. What these writers shared was a commitment to the values of socialism-from-below, the idea that change must be driven by the mass movements of the oppressed. In a world dominated by slump, fascism and war, they retained a commitment to total democracy.

Dissident Marxism describes the left in history. Some readers will enjoy it as a history of revolutionary socialism in the years between Stalin's rise and the fall of the Berlin Wall. Others will find here a challenging thesis -- that the most enduring of left-wing traditions, and highly relevant to the times we live in today, were located in a space between the New Left and Trotskyism.

Dissident Marxism explores the lives and thinking of some of the most creative and striking members of the twentieth century left, and asks if the new anti-capitalist movement might provide an opportunity for just such another left-wing generation to emerge?

Congo as Fiction

C.H.Beck

The Allied agreement after the Second World War did not only partition Germany, it

divided the nation along the fault-lines of a new bipolar world order. This inner border made Germany a unique place to experience the Cold War, and the “German question” in this post-1945 variant remained inextricably entwined with the vicissitudes of the Cold War until its end. This volume explores how social and cultural practices in both German states between 1949 and 1989 were shaped by the existence of this inner border, putting them on opposing sides of the ideological divide between the Western and Eastern blocs, as well as stabilizing relations between them. This volume’s interdisciplinary approach addresses

important intersections between history, politics, and culture, offering an important new appraisal of the German experiences of the Cold War.

Franz Kafka spent eight months at his sister's house in Zürau between September 1917 and April 1918, enduring the onset of

tuberculosis. Illness paradoxically set him free to write, in a series of philosophical fragments, his settling of accounts with life, marriage, his family, guilt and man's condition. These aphorisms have appeared with minor revisions in various posthumous works since his death in 1924. By chance, Roberto Calasso rediscovered Kafka's two original notebooks in Oxford's Bodleian Library. The notebooks, freshly translated and laid out as Kafka intended, are a distillation of Kafka at his most powerful and enigmatic. This lost jewel provides the reader with a fresh perspective on the work of a genius.

*Blueprint for Action*  
Groundwood Books Ltd

A collection of essays that span many regions and cultures, by an award-winning historian Sanjay Subrahmanyam is becoming well known for the same sort of reasons that attach to Fernand Braudel and Carlo Ginzburg, as the proponent of a new kind of history - in his case, not *longue durée* or micro-history, but 'connected history': connected cross-culturally, and spanning regions, subjects and archives that are conventionally treated alone. Not a research paradigm, he insists, it is more of an *oppositionswissenschaft*, a way of trying to constantly break the moulds of historical objects. The essays collected here, some quite polemical - as in the lead text on the

notion of India-as-civilization, or another, assessing such a literary totem as V. S. Naipaul - illustrate the breadth of Subrahmanyam's concerns, as well as the quality of his writing. Connected History considers what, exactly, is an empire, the rise of 'the West' (less of a place than an idea or ideology, he

insists), Churchill and the Great Man theory of history, the reception of world literature and the itinerary of subaltern studies, in addition to personal recollections of life and work in Delhi, Paris and Lisbon, and concluding remarks on the practice of early-modern history and the framing of historical enquiry.
