Springer Science & Business Media

This completely revised and enlarged edition of the famous "Langenscheidt Pocket German Dictionary" is specially adapted for English-speaking students.

Three Horizons Routledge

This volume contains a selection of 25 ethnological essays as conference proceedings. They explore the effects of the Internet on post-modern food culture. They present synchronic and diachronic research approaches to the phenomenon of food in the era of globalization and the spread of computer technology.

Think! Different Triarchy Press

Library design in the 21st century has one common theme: collaboration is at the heart of innovation. Designing modern libraries is a complex process involving many stakeholders and participants. Libraries of all types work with an almost limitless range of constituent groups for input, buy-in and successful implementation. Securing support for new library buildings and renovations of libraries engages many people: library clients, community members, faculty, funding agencies, donors, governing authorities, librarians, architects, interior designers and planners. Telling the right story and getting to the end game demand carefully crafted approaches, wide-ranging skills, a unified vision and productive teamwork. The IFLA Library Buildings and Equipment Section has selected the best papers presented by award-winning architects and international thought leaders from the academic and public library sector at our recent satellite conferences and seminars: "Collaborative Strategies for Successful Library Design" (Chicago, Illinois), "What comes after the Third Place?" (Columbus, Ohio); "Key Issues for Library Space: International Perspectives" (Maynooth, Ireland); "Storage, the final frontier" (Munich, Germany) and "Telling and selling the space story" (Wroclaw, Poland). The stories by the library and design professionals within this publication illustrate how powerful a role partnerships, outreach and cooperation play in a library project's success.

Oxford University Press

This volume presents the results of part of the ESF project 'Second language acquisition by adult immigrants'. The present study deals specifically with structure of utterances in learner varieties. The authors have attempted to find general principles which determine the form of utterances from the very beginning to relatively advanced stages. Chapter 1 and 2 provide the framework for the study and here the guiding hypotheses are sketched on the basis of a pilot analysis. The empirical part of the study is contained in Chapters 3-6, in which data are given for the acquisition of, respectively, English (by Punjabi and Italian learners), German (Italian and Turkish learners), Dutch (Turkish and Moroccan learners) and French (Moroccan and Spanish learners), thus allowing for crosslinguistic comparisons in various ways. For each data-set the learner's linguistic repertoire is established, and then the utterance patterns recurrent in his/her production and the constraints these patterns are subject to. In Chapter 7 the general and theoretical implications are discussed. **The Missile Defense Controversy** Verlag Neuer Merkur GmbH Die Sekundarstufe II der Förderschule geistige Entwicklung, einst »Abschlussstufe« oder »Werkstufe«, heute auch »Berufsschulstufe« oder »Berufspraxisstufe« genannt, soll ihre Schüler nicht nur auf Arbeit und Beruf vorbereiten, sondern auf ihr gesamtes Leben als Erwachsene. Beim Erwachsenwerden zu unterstützen wird so zum Auftrag der Schule, der neu zu bestimmen ist. Leitend dabei ist die Auseinandersetzung mit der Entwicklung der Persönlichkeit und Ausbildung sinnstiftender Beziehungen in verschiedenen Bereichen, sowohl in der Gemeinschaft mit anderen Menschen mit Behinderungen als auch innerhalb von Gemeinschaften mit Menschen ohne Behinderung. Zu diesen Bereichen gehören im Kern Arbeit und Berufsvorbereitung, aber auch die Gestaltung des Alltags und der Freizeit, das Wohnen, die Haushaltsführung und die Mobilität. Hierzu werden Konzepte vorgestellt, die theoretisch fundiert sind und zugleich mit Erfahrungen aus der Praxis verbunden werden. Methodische Hinweise sind beigegeben und so weit möglich auf ihre Effektivität und Evidenz hinterfragt. Leitend ist dabei die Frage, wie durch schulische Bildung und Assistenz ermöglicht werden kann, dass Menschen mit geistiger Behinderung ihr Leben und ihre Arbeitstätigkeit als Erwachsene selbstbestimmt und mittendrin in der Gesellschaft gestalten können.

This volume presents a mix of translations of classical and modern papers from the German Didaktik tradition, newly prepared essays by German scholars and practitioners writing from within the tradition, and interpretive essays by U.S. scholars. It brings this tradition, which virtually dominated German curricular thought and teacher education until the 1960s when American curriculum theory entered Germany--and which is now experiencing a renaissance--to the English-speaking world, where it has been essentially unknown. The intent is to capture in one volume the core (at least) of the tradition of Didaktik and to communicate its potential relevance to English-language curricularists and teacher educators. It introduces a theoretical tradition which, although very different in almost every respect from those we know, offers a set of approaches that suggest ways of thinking about problems of reflection on curricular and teaching praxis (the core focus of the tradition) which the editors believe are accessible to North American readers--with appropriate "translation." These ways of thinking and related praxis are very relevant to notions such as reflective teaching and the discourse on teachers as professionals. By raising the possibility that the "new" tradition of Didaktik can be highly suggestive for thinking through issues related to a number of central ideas within contemporary discourse--and for exploring the implications of these ideas for both teacher education and for a curriculum theory appropriate to these new contexts for theorizing, this book opens up a gold mine of theoretical and practical possibilities. Management in der Hauswirtschaft Verlag Neuer Merkur GmbH Technical and vocational education and training (TVET) research has become a recognized and well-defined area of interdisciplinary research. This is the first handbook of its kind that specifically concentrates on research and research methods in TVET. The book's sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy, planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a cutting-edge resource and reference.

America's Forgotten Pandemic University Press of Kentucky Between August 1918 and March 1919 the Spanish influenza spread worldwide, claiming over 25 million lives - more people than perished in the fighting of the First World War. It proved fatal to at least a half-million Americans. Yet, the Spanish flu pandemic is largely forgotten today. In this vivid narrative, Alfred W. Crosby recounts the course of the pandemic during the panic-stricken months of 1918 and 1919, measures its impact on American society, and probes the curious loss of national memory of this cataclysmic event. This 2003 edition includes a preface discussing the then recent outbreaks of diseases, including the Asian flu and the SARS epidemic.

Methodenkompendium für den Förderschwerpunkt geistige Entwicklung Routledge

The Leverhulme Primary Project reported here provides for the first time evidence on what is actually happening in teacher education today and on how novice teachers learn their craft. The book looks in detail at the experience of all the student teachers on one post graduate primary teacher training course and of those responsible for them in their university and in schools. It tracks them as they work to acquire the appropriate subject and pedagogical knowledge and as their own beliefs about teaching develop during the course. A final section follows some of the students through their first year as qualified teachers. Teacher education is going through a period of radical change and more people than ever before now have some responsibility, whether in higher education or in school for the training of teachers. None of them can afford to ignore the fresh insights into how teachers are made contained in this book.

Macedonian Pocket Dictionary OECD

Die Mehrheit des Gesundheitspersonals glaubt, dass Mütter im Stillen unterwiesen werden müssen. Dieses Buch liefert neue wissenschaftliche Belege, die zeigen, dass das Wissen, wie gestillt wird, Müttern und Babys angeboren ist, und stellt ein neues Konzept vor: das intuitive Stillen. Intuitives Stillen ist ein Sammelbegriff für optimale Verhaltenszustände und Positionen zum Stillen, deren Aufeinanderwirken spontane Verhaltensmuster bei Müttern und Babys auslöst, die ihnen

helfen, mit dem Stillen zu beginnen. Intuitives Stillen ist schnell und einfach umzusetzen. Die meisten Mütter und Babys nehmen selbsttätig die richtige Position ein, wenn dies ohne fremdes Eingreifen von außen zugelassen wird. Die Aufgabe des Gesundheitspersonals besteht darin, die auslösenden Mechanismen zu verstehen und so zu lernen, wie sie Müttern und Babys helfen können, das zu machen, was diese intuitiv tun wollen. Dieses Buch stärkt das Vertrauen in die biologische Basis des Stillens und die angeborene Stillfähigkeit der Mütter. Dr. Suzanne Colson ist eine meiner Heldinnen, weil ihre aufmerksame und sorgfältige Forschung und die Schlussfolgerungen, die sie daraus gezogen hat, endlich gesunden Menschenverstand in die Diskussion über das Stillen gebracht hat. Ina May Gaskin, Hebamme und Autorin von Spirituelle Hebammen, Praktische Hebammen, Die selbstbestimmte Geburt und Ina May's Guide to Breastfeeding Der französische Geburtshelfer und Colsons Mentor, Michel Odent, veränderte unsere Art und Weise über die Geburt zu denken. Mit diesem Buch unternimmt Suzanne Colson dasselbe für das Stillen. Machen Sie sich bereit, viele Ihrer grundlegenden Annahmen über das Stillen zu überdenken - so, wie ich es getan habe - und lernen Sie einige revolutionäre, neue Wege, um Müttern und Babys zu helfen. Dieses Buch wird Ihr Leben verändern! Nancy Mohrbacher, IBCLC, FILCA, Co-Autorin von Breastfeeding Answers Made Simple und Breastfeeding Made Simple

Ernährung in der Hauswirtschaft First Edition Design Pub.

A practical framework for thinking about the future... and an exploration of 'future consciousness' and how to develop it Gesundheit & Hygiene in der Hauswirtschaft Peter Lang Think! Different is a different kind of self-help book: the author, Andreas Boskugel, is well-known in Europe and appreciated for his clear and direct manner. Boskugel has taken the law of attraction to its systematic and logical conclusion! This book is completely free of otherwise typical references to moral or religious "standards" because the law of attraction - like all natural laws - isn't based on morality or religion. Consequently the author has a very different take than do others on success; for example, he doesn't idolize hard work, honesty and gratitude ad absurdum, for these are only religious and cultural based opinions and actually contradict the law of attraction. The author also forgoes otherwise typical teachings about what is right or wrong; after all, what is "right" is individually defined. Feigned pity or morality sermons are also not included in this work. This work is for those who love the integrity of the law of attraction and prefer clarity over political correctness. And it's for those who really want to get somewhere in life and who therefore question existing opinions. It's for people who are able to think on their own instead of going with the flow. For many, it was not until reading this book that they finally understood the law of attraction, for the topics in this book are more logically organized than in other popular works, and insights are offered that can dramatically improve the lives of readers. Completely new insights about the existing laws of life can help readers become invincible masters of their own destiny. Keywords: Law of Attraction, Self-Help, Success, Wealth, Dream, Wish Fulfillment, Love, Relationship, Money *Langenscheidt's Pocket German Dictionary* Verlag Neuer Merkur GmbH

« Understanding today's Vocational Education and Training (VET) systems requires a comprehension of the rise and development, i.e. of the foundations of topical VET. This book is one of the first publications providing a comparative view of this development in Europe. Apart from older roots, the evolution of VET systems are one trigger of the modernization of economy, society and education itself. The 28 contributions, including countries like Austria, Britain, Denmark, Finland, France, Germany, Switzerland, Italy, Lithuania, Norway, Spain, Sweden and Switzerland of renowned authors and experts in this field are organized in three sections: Concepts which are discussing theoretical approaches towards this phenomenon. Cases which stress specific developments of VET in a certain country or region and Challenges which are contextualizing the historical perspective in a topical policy context. »--

Hauswirtschaft nach Lernfeldern Verlag Barbara Budrich There is great diversity in teacher education systems and approaches to learning and teaching practice across Europe, even though the practical everyday problems of the various national education systems may be very similar. Against this background, in the field of research on didactics, learning and teaching it is important to overcome fragmentation and to find common ground. In this book the editors demonstrate how far we have come over recent years in advancing research in the field which has the ultimate aim of improving learning and teaching. The editors recognise the diverging national and local practices as a

starting point in searching for common ground and in creating shared understandings. The book is organised in six parts with 26 chapters in which the authors examine whether there is a paradigmatic shift from teaching to learning, take a closer look at various teacher education models and their empirical basis, discuss the importance of subject didactics, curriculum work and lesson planning, and analyse the impact of Information and Communication Technologies on didactical design. Finally, they relate the empirical findings to theory construction and offer proposals to further advance this vital field by increasing levels of international co-operation.

M. O. V. E. (Mobility Opportunities Via Education) Cambridge University Press

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic,

should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Diercke International Atlas. Universalatlas - Englisch Walter de Gruyter GmbH & Co KG

" This revised and updated edition identifies the cultural factors and specific administrative agendas that have shaped the way we view ballistic missile technology. Three new sections connect our recent, sudden shifts in foreign policy to ongoing historical patterns. Whether cautioning against the "almost neurotic pursuit of absolute security" or examining the powerful influence of religion on military buildup, Ernest J. Yanarella uncovers the deeply ingrained attitudes that will determine the future of American missile defense.

Teaching As A Reflective Practice John Benjamins Publishing
The PISA 2000 Assessment introduces the PISA approach to assessing reading, mathematical and scientific literacy and describes the PISA 2000 assessment in terms of the content that students need to acquire, the processes that need to be performed and the contexts in which skills are applied.

Hauswirtschaft Verlag Neuer Merkur GmbH

In its brief but vigorous history, gerontology has spawned a broadening range of specializations. One of the newest of such specializations is narrative gerontology, so named for its emphasis on the biographical, or inside, dimensions of the experience of aging. Telling stories about our world, our relationships, and ourselves is fundamental to how we make meaning. Everything from our history to our religion and our memories to our emotions is linked to the tales we tell ourselves, and others, about where we have come from and where we are

going. They are central to who we are. The biographical side of human life is every bit as critical to fathom as the biological side, if we seek a more balanced, positive, and optimistic perspective on what aging is about; if we would honor the dignity and complexity, the humanity and uniqueness of the lives of older persons, no matter what their health or economic standing. In this respect, a narrative approach is particularly suited to the exploration of such topics as meaning, spirituality, and wisdom, and the connections they share. This volume reflects a selection of new directions and insights, and constitutes a general broadening and deepening of narrative gerontology, exploring its implications for theory and research in the field of aging, and for the quality of life of older adults themselves. Such deepening indicates a greater refinement of thought, method, and intervention. The evolution of narrative gerontology is also evidenced by a significant increase in the number of faculty and graduate students engaged in research in this area, as well as by increasing collaboration among researchers, practitioners, and administrators in applying narrative insights to contexts such as long term care - indeed, healthcare in general. These initiatives have given rise to the phrase, "narrative care as core care".
