"Tales from the Desert" is the compelling, true story of a British expatriate who journeyed to Saudi Arabia as a young man to seek his fortune for a couple of years and ended up staying for twenty-five. The collection of real-life tales are amusing, mystifying, captivating and at times downright terrifying. Journeying to the mystical deserts of Arabia in the 1970s, when the world economy revolved around the price of oil and the concept of Islamic fundamentalism was barely known, the author takes the reader through a joyride of experiences including the unfolding drama of the first Gulf War and a 'too close for comfort' view of the uprising during the Arab Spring.

This title was first published in 2001. Universities in developing countries have followed their counterparts in developed countries and adopted quality assurance to improve the quality of their activities. This text examines the wisdom of such a move when many of the conditions necessary for its success are not present. It concludes that quality assurance can be useful in developing countries because it shows how a university's seemingly disparate activities are related to one another to serve a common goal and how the quality of these can best be improved by using an integrated approach. Quality assurance also provides more focus and direction to the work of the traditional university system. However, it must be modified to suit the conditions prevailing in developing countries by being simple in design, modest in expectations and realistic in requirements.

* A non-fiction, first-person account of human frailties falling victim to circumstance, this book is bristling in the vernacular, sexually explicit, and graphically descriptive in parts. * A married, 36-year old male teacher is falsely accused of having an affair with Ann, an 18-year old female student, in an Alternative School setting. * The involvement between this unlikely pair simmers in the heat of false accusation before bursting into a torrid love relationship. * The unknowing couple are stunned to learn they are not alone; the path they have traveled is neither unique nor novel, but a quite heavily traversed and well-worn thoroughfare. * The story ends in tragedy as Ann, stalked by Misfortune for most of her life, falls victim to a final adversity, an inoperable brain tumor. * Ann dies, the memories remain, and the love lives on.
