 A Depth Psychology Study of Immigration and Adaptation: The Migrant's Journey brings current academic research from a range of disciplines into a 12-stage model of human migration. Based on Joseph Campbell's hero's journey, this depth psychology model addresses pre-migration reasons for leaving, the ordeals of the journey and challenges of post-migration adaptation. One-third of migrants return to homelands while those who remain in newlands face the triple challenges of building a new life, a new identity and sense of belonging. While arrivées carry

homelands within, their children, the second generation, born and raised in the newland usually have access to both cultures which enables them to make unique contributions to society. Vital to successful newland adaptation is the acceptance and support of immigrants by host countries. A Depth Psychology Study of Immigration and Adaptation will be an important resource for academics and students in the social sciences, clinical psychologists, health care and social welfare workers, therapists of all backgrounds, policy makers and immigrants themselves seeking an understanding of the inner experiences of migration.
A Depth Psychology

Model of Immigration and Adaptation McGill-Queen's Press - MQUP
This book offers a brand new point of view on immigration detention, pursuing a multidisciplinary approach and presenting new reflections by internationally respected experts from academic and institutional backgrounds. It offers an in-depth perspective on the immigration framework, together with the evolution of European and international political decisions on the management of immigration. Readers will be introduced to new international decisions on the protection of human rights, together with international measures

concerning the detention of immigrants. In recent years, International Law and European Law have converged to develop measures for combatting irregular immigration. Some of them include the criminalization of illegally entering a member state or illegally remaining there after legally entering. Though migration has become a great challenge for policymakers, legislators and society as a whole, we must never forget that migrants should enjoy the same human rights and legal protection as everyone else.
