metaphors" that cannot be translated back into conceptual language. "Absolute metaphors" answer the supposedly naïve, theoretically unanswerable questions whose relevance lies quite simply in the fact that they cannot be brushed aside, since we do not pose them ourselves but find them already posed in the ground of our existence. They leap into a void that concepts are	unable to fill. An afterword by the translator, Robert Savage, positions the book in the intellectual context of its time and explains its continuing importance for work in the history of ideas. Seneca A&C Black In this volume, a group of distinguished scholars reinterpret concepts and canons of Islamic thought in Arab, Persian, South Asian, and Turkish traditions.	They demonstrate that there is no unitary "Islamic" position on important issues of statecraft and governance. They recognize that Islam is a discursive site marked by silences, agreements, and animated controversies. Rigorous debates and profound disagreement s among Muslim theologians, philosophers, and literati have taken place over such questions as:
---	--	--

What is an Islamic state? Was the state ever viewed as an independent political institution in the Islamic tradition of political thought? Is it possible that a religion that places an inordinate emphasis upon the importance of good deeds does not indeed have a vigorous notion of "public interest" or a systematic theory of government? Does Islam provide an edifice, a

common idiom, and an ideological mooring for premodern and modern Muslim rulers alike? The nuanced reading of the Islamic traditions provided in this book will help future generations of Muslims contemplate a more humane style of statecraft.

Novelle Di Matteo Bandello

A must-have volume for all wine lovers and those who love orange wine. Written by renowned orange wine expert and award winning writer Simon J. Woolf, *Amber Revolution* is the world's first book to tell the full, forgotten story of this ancient wine (white wine made like a red wine) and its modern struggle to gain acceptance. It is a tale of lost identity, the

fight for survival, and pioneering winemakers--from the Caucasus to the Adriatic. White grapes are left in contact with their skins for days, weeks or months during fermentation, creating stunning complexity, unusual aromas and intense flavors. The extended skin contact gives these wines bold amber, russet, or orange tints. The technique is ancient, but the hype is new and fast

growing. This book includes profiles of 180 of the best producers from 20 countries worldwide and is crammed full of all the information you need to find the best orange wines worldwide together with tips for how to buy, enjoy, food-match and age them. Beautifully illustrated with over 150 specially commissioned photos, Amber Revolution is an essential reference work for any wine lover, sommelier,

 In this book the bestselling author and psychoanalyst Massimo Recalcati offers a fundamental re-examination of what 'being a mother' means today, in a world where new social and sexual freedoms mean that motherhood is no longer the sole destiny of women. Questioning the belief that a mother's love is natural and unconditional,

he paints a more complex and troubling picture of the mother-child relationship, observing that mothers may even resent their children as a result of unresolved conflicts between different dimensions of love. The mother's hands not only nurture but can also potentially harm. Recalcati argues that it is precisely in these competing demands that motherhood fulfils its function: only

if the mother is 'not-all-mother' can a child experience the absence that enables it to access the symbolic and cultural world. Recalcati cuts through conventional wisdom to offer a fresh perspective on the changing nature of motherhood today. An international bestseller, this book will appeal to a wide general readership, as well as to students and scholars of gender studies, psychoanalysis

s and related disciplines. *ANTROPOS IN THE WORLD - luglio 2021* Franklin Classics Trade Press In this new book Zygmunt Bauman and Riccardo Mazzeo examine the contentious issue of the relation between literature (and the arts in general) and sociology (or, more generally, a branch of the humanities claiming scientific status). While many commentators see literature

and sociology as radically different vocations, Bauman and Mazzeo argue that they are bound together by a common purpose and a shared subject matter. Despite the many differences in terms of their methods and their ways of presenting their findings, novels and sociological texts are not at cross-purposes. Indeed, it is precisely their differences that make them at once indispensable

to each other and mutually complementary. The writers of novels and of sociological texts may explore their world from different perspectives, seeking and producing different types of 'data', but their products bear the unmistakable marks of their shared origin. They feed each other and depend on each other in terms of their agenda, their discoveries and the contents of their messages. In

a world characterized by the continuous search for new sensations and the fetishism of consumption, they bring fundamental existential questions back to the public agenda. Literature and sociology reveal the truth of the human condition only when they stay in one another's company, remaining attentive to each other's findings and engaged in a continuous dialogue. For

only together can they rise to the challenging task of untangling and laying bare the complex intertwining of biography and history as well as of individual and society that totality we are constantly shaping while being shaped by it.

Opere Wentworth Press A New York Review Books Original An uncompromising contrarian, a passionate polemicist, a man of quick wit and wide learning, an anarchist, a pacifist, and a virtuoso of the slashing phrase, Dwight Macdonald was an indefatigable and indomitable

critic of America's susceptibility to well-meaning cultural fakery: all those estimable, eminent, prizewinning works of art that are said to be good and good for you and are not. He dubbed this phenomenon "Midcult" and he attacked it not only on aesthetic but on political grounds. Midcult rendered people complacent and compliant, secure in their

common stupidity but neither happy nor free. This new selection of Macdonald's finest essays, assembled by John Summers, the editor of *The Baffler*, reintroduces a remarkable American critic and writer. In the era of smart, sexy, and everything indie, Macdonald remains as pertinent and challenging as ever. *Epoca Atlantic Books (UK)* Henry Molise, a 50 year old, successful

writer, returns to the family home to help with the latest drama; his aging parents want to divorce. Henry's tyrannical, brick laying father, Nick, though weak and alcoholic, can still strike fear into the hearts of his sons. His mother, though ill and devout to her Catholicism, still has the power to comfort and confuse her children. This is typical of Fante's novels, it's autobiographical, and

brimming with love, death, violence and religion. Writing with great passion Fante powerfully hits home the damage family can wreck upon us all. Disclosing Adverse Events to Patients

Syracuse University Press

This revolutionary book is the only indepth reference to detail the processes, developments, and factors affecting the science of winemaking. Jamie Goode, a highly regarded expert on the subject,

skilfully opens up this complex subject and explains the background to the various processes involved and the range of issues surrounding their uses. He reports on the vital progress in winemaking research that has been made in the last decade and explains the practical application of science with reference to the range of winemaking techniques used around the world, as well as viticultural

practices, organics and ecology, and lifestyle influences. Written in a uniquely accessible style, the book is divided into three sections covering the vineyard, the winery and human interaction with wine. It also features over 80 illustrations and photographs to help make even the most complex topics clear, straightforward and easy to understand. [Memoirs of Henrietta Caracciolo](#)

This question is frequently posed, with widespread research into the social and economic impact of libraries.	Newspapers play an important role in forming public perceptions, but how do newspapers present libraries, their past, present and future? Nobody has yet taken the press to task on the quantity and quality of articles on libraries, however Libraries and Public Perception does just this, through comparative textual analysis of newspapers in Europe. After a	comprehensive and useful introductory chapter, the book consists of the following five chapters: Wondering about the future of libraries; Measuring the value of libraries; Libraries in the newspapers; Contemporary challenges and public perception; Which library model from the newspapers: a synthesis. Walking upright on two feet is a uniquely human skill. It defines us as

a species. It enabled us to walk out of Africa and to spread as far as Alaska and Australia. It freed our hands and freed our minds. We put one foot in front of the other without thinking - yet how many of us know how we do that, or appreciate the advantages it gives us? In this hymn to walking, neuroscientist Shane O'Mara invites us to marvel at the benefits it confers on our bodies and minds. In Praise of

Walking celebrates this miraculous ability. Incredibly, it is a skill that has its evolutionary origins millions of years ago, under the sea. And the latest research is only now revealing how the brain and nervous system performs the mechanical magic of balancing, navigating a crowded city, or running our inner GPS system. Walking is good for our muscles and posture; it helps to protect and repair organs, and can slow or turn back the ageing of our brains. With our minds in motion we think more creatively, our mood improves and stress levels fall. Walking together to achieve a shared purpose is also a social glue that has contributed to our survival as a species. As our lives become increasingly sedentary, we risk all this. We must start walking again, whether it's up a mountain, down to the park, or simply to school and work. We, and our societies, will be better for it.

In a field of mature bananas, plants can be seen at all stages of vegetative growth and fruit maturity, providing a fascination for anyone who has an interest in growing crops. Banana farmers in the tropics can harvest fruit

every day of the year. The absence of seasonality in production is an advantage, in that it provides a continuity of carbohydrate to meet dietary needs as well as a regular source of income, a feature that perhaps has been underestimated by rural planners and agricultural strategists. The burgeoning interest in

bananas in the last 20 years results from the belated realization that Musa is an under-exploited genus, notwithstanding the fact that one genetically narrow group, the Cavendish cultivars, supply a major export commodity second only to citrus in terms of the world fruit trade. International research interest in the

diversity of fruit types has been slow to develop, presumably because bananas and plantains have hitherto been regarded as a reliable backyard source of dessert fruit or starch supplying the needs of the household, and in this situation relatively untroubled by pests, diseases or agronomic problems.
