Life of Petrarch Cambridge University Press

The Eros comics line is intended for mature readers and often contains adult language, sexual situations and nudity.Italian cartoonist Giovanna Casotto specializes in lushly rendered, outrageously explicit short stories that range from S/M action to group sex and beyond.

Bitch in Heat Last Gasp

In the past few decades, marine organisms, including macroalgae and microalgae, have been extensively explored as potential sources of bioactive compounds with applications in various fields such as pharmaceuticals, biomedicine, cosmetics and foodstuffs. Marine polysaccharides, such as chitin/chitosan, ulvans, fucans, alginates and carrageenans, are biochemical compounds with several important properties such as anticoagulant and/or antithrombotic, immunomodulatory, antitumor, antilipidemic, hypoglycemic, antibiotic, anti-inflammatory and antioxidant properties. Due to their biocompatible, nontoxic and biodegradable nature, marine polysaccharides offer a better alternative to be used in advancement of the biomedical field. This book focuses on marine polysaccharides; their derivatives, blends, composites and hydrogels; and their multifaceted applications in various fields. The book also discusses the various aspects of marine polysaccharides from the point of view of chemistry and related applications. It is an important reference for marine biotechnologists, natural product scientists, students, researchers and academicians working in the area of materials science, marine science and polymer chemistry.

Scorpiace Milkweed Editions

“An anthology of nature writing by people of color, providing deeply personal connections to—or disconnects from—nature.” —NPR From African American to Asian American, indigenous to immigrant, “multiracial” to “mixed-blood,” the diversity of cultures in this world is matched only by the diversity of stories explaining our cultural origins: stories of creation and destruction, displacement and heartbreak, hope and mystery. With writing from Jamaica Kincaid on the fallacies of national myths, Yusef Komunyakaa connecting the toxic legacy of his hometown, Bogalusa, LA, to a blind faith in capitalism, and bell hooks relating the quashing of multiculturalism to the destruction of nature that is considered “unpredictable”—among more than thirty-five other examinations of the relationship between culture and nature—this collection points toward the trouble of ignoring our cultural heritage, but also reveals how opening our eyes and our minds might provide a more livable future. Contributors: Elmaz Abinader, Faith Adiele, Francisco X. Alarcón, Fred Arroyo, Kimberly Blaeser, Joseph Bruchac, Robert D. Bullard, Debra Kang Dean, Camille Dungy, Nikky Finney, Ray Gonzalez, Kimiko Hahn, bell hooks, Jeanne Wakatsuki Houston, Pualani Kanaka’ole Kanahele, Robin Wall Kimmerer, Jamaica Kincaid, Yusef Komunyakaa, J. Drew Lanham, David Mas Masumoto, Maria Melendez, Thyllias Moss, Gary Paul Nabhan, Nalini Nadkarni, Melissa Nelson, Jennifer Oladipo, Louis Owens, Enrique Salmon, Aileen Suzara, A. J. Verdelle, Gerald Vizenor, Patricia Jabbeh Wesley, Al Young, Ofelia Zepeda “This notable anthology assembles thinkers and writers with firsthand experience or insight on how economic and racial inequalities affect a person’s understanding of nature . . . an illuminating read.” —Bloomsbury Review “[An] unprecedented and invaluable collection.” —Booklist

Casa Howhard - tomes 1 et 2 Nantier Beall Minoustchine Publishing

Tertullian (c. AD 160 - 225) was one of the first theologians of the Western Church & ranks among the most prominent of the early Latin fathers. His wide-ranging literary output offers a valuable insight into the Christian Church at a crucial stage in its development.

Comparative Vertebrate Neuroanatomy Evolution and Adaptation Second Edition Ann B. Butler and William Hodos The Second Edition of this landmark text presents a broad survey ofcomparative vertebrate neuroanatomy at the introductory level,representing a unique contribution to the field of evolutionaryneurobiology. It has been extensively revised and updated, withsubstantially improved figures and diagrams that are usedgenerously throughout the text. Through analysis of the variationin brain structure and function between major groups ofvertebrates, readers can gain insight into the evolutionary historyof the nervous system. The text is divided into threesections: * Introduction to evolution and variation, including a survey ofcell structure, embryological development, and anatomicalorganization of the central nervous system; phylogeny and diversityof brain structures; and an overview of various theories of brainevolution * Systematic, comprehensive survey of comparative neuroanatomyacross all major groups of vertebrates * Overview of vertebrate brain evolution, which integrates thecomplete text, highlights diversity and common themes, broadensperspective by a comparison with brain structure and evolution ofinvertebrate brains, and considers recent data and theories of theevolutionary origin of the brain in the earliest vertebrates,including a recently proposed model of the origin of the brain inthe earliest vertebrates that has received strong support fromnewly discovered fossil evidence Ample material drawn from the latest research has been integratedinto the text and highlighted in special feature boxes, includingrecent views on homology, cranial nerve organization and evolution,the relatively large and elaborate brains of birds in correlationwith their complex cognitive abilities, and the current debate onforebrain evolution across reptiles, birds, and mammals. Comparative Vertebrate Neuroanatomy is geared to upper-levelundergraduate and graduate students in neuroanatomy, but anyoneinterested in the anatomy of the nervous system and how itcorresponds to the way that animals function in the world will findthis text fascinating.

The Nights of Luna (English version) John Wiley & Sons

Due to their unparalleled effectiveness and efficiency, polyfluorinated chemicals (PFC) have become essential in numerous technical applications.

However, many PFCs brought to market show limited biodegradability, and their environmental persistence combined with toxic and bioaccumulative potential have become a matter of concern in some instances. This volume highlights the synthesis of PFCs, focusing on substances with improved application and environmental properties, which are a challenge for synthetic chemists. Further, modern mass spectrometric techniques for the detection and identification of biotransformation products of PFCs are described. The sorption and leaching behavior of PFC in soil is also addressed in order to predict their fate in the environment. Several contributions discuss the monitoring of PFCs in European surface, ground and drinking waters, treatment options for PFC removal from drinking water, occurrence in food, and the human biomonitoring of PFCs.

Bollettino storico messinese Image Comics

People have relied on medicinal products derived from natural sources for millennia, and animals have long been an important part of that repertoire; nearly all cultures, from ancient times to the present, have used animals as a source of medicine. Ingredients derived from wild animals are not only widely used in traditional remedies, but are also increasingly valued as raw materials in the preparation of modern medicines. Regrettably, the unsustainable use of plants and animals in traditional medicine is recognized as a threat to wildlife conservation, as a result of which discussions concerning the links between traditional medicine and biodiversity are becoming increasingly imperative, particularly in view of the fact that folk medicine is the primary source of health care for 80% of the world’s population. This book discusses the role of animals in traditional folk medicine and its meaning for wildlife conservation. We hope to further stimulate further discussions about the use of biodiversity and its implications for wildlife conservation strategies.

Biography of the 14th century Italian scholar.

Paragone Aeon Books

"Visions of Giovanna is a collection of stories by Italian cartoonist Giovanna Casotto who loves exposing herself as the main character of her graphic stories. With a pervasive enthusiasm that brings heights of joy to page-bound character and flesh-and-blood reader alike, her stories not only satisfy on a purely physical level, but are also short character studies focusing on the subtle aspects of the sexual encounter.

Marine Polysaccharides Jenny Stanford Publishing

Kristina is a powerful vampire with an unquenchable lust - and not just for blood! She wakes back up in our age and quickly commandeers a man or two as hypnotised subjects for blood and raunchy lust. An X-rated Vampirella beautifully painted.

Woman Desired, Woman Desiring Humanoids, Incorporated

The aim of this open access book is to facilitate the identification and description of the different organs as well as pathogens and diseases affecting the most representative species of cephalopods focussed on *Sepia officinalis*, *Loligo vulgaris* and *Octopus vulgaris*. These species are valuable ‘morphotype’ models and belong to the taxonomic groups Sepioidea, Myopsida and Octopoda, which include most of the species with a high market value and aquaculture potential. The study is based on photographs at macroscopic and histological level in order to illustrate the role of the most important pathogens and related diseases from the view of a pathological diagnosis. The reader is able to familiarize with functional anatomy, necropsy and general histology of adults and paralarvae, as well as with the identification of different pathogens and pathologies. This work is thus an invaluable guide for the diagnosis of cephalopod diseases. Besides including pathogens for non-European cephalopod species, it also provides a useful contribution encouraging marine pathologists, parasitologists, veterinarians and those involved in fishery sanitary assessments, aquarium maintenance and aquaculture practices aiming to increase their knowledge about the pathology of cephalopods.

Animals in Traditional Folk Medicine Eurotica

Jean-Claude Forest's timeless Erotic Sci-Fi series recounting the spatial adventures of the beautiful titular character is now available in a brand new English-language adaptation.
