This book constitutes the refereed proceedings of the Second International Meeting on Innovation for Systems Information and Decision meeting, INSID 2020, held in Recife, Brazil, in December 2020. Due to the COVID-19 pandemic the conference was held virtually. The 8 papers presented in this volume were carefully reviewed and selected from a total of 84 submissions to the main conference. The selected papers reflect methodological improvements and advances in Multicriteria Decision-Making/Multicriteria Decision-Aid (MCDM/MCDA) oriented toward real-world applications and contribute to the understanding of relevant developments of current research on and future trends of Innovation for Systems Information and Decision.

As a veteran of the National Hockey League, Mike Fisher has a lot to be proud of. He plays for the Nashville Predators, was an alternate captain for the Ottawa Senators, has played in a Stanley Cup final, and has been nominated for the Selke Trophy as the best defensive forward in the league. But it's not just his guts, grits, and talent that have taken him to the top. His power comes from the top--he puts his faith in Christ first and has demonstrated his love for God both on and off the ice.

Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related

seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.

This comprehensive collection of nearly 200 investigations, demonstrations, mini-labs, and other activities uses everyday examples to make physics concepts easy to understand. For quick access, materials are organized into eight units covering Measurement, Motion, Force, Pressure, Energy & Momentum, Waves, Light, and Electromagnetism. Each lesson contains an introduction with common knowledge examples, reproducible pages for students, a "To the Teacher" information section, and a listing of additional applications students can relate to. Over 300 illustrations add interest and supplement instruction.

This book makes the case for why we should care about islands and their sustainability. Islands are hotspots of biocultural diversity and home to 600 million people that depend on one-sixth of the earth's total area, including the surrounding oceans, for their subsistence. Today, they are at the frontlines of climate change and face an existential crisis. Islands are, however, potential "hubs of innovation" that are uniquely positioned to be leaders in sustainability and climate action. This volume argues that a full-fledged program on "island industrial ecology" is urgently needed, with the aim of offering policy-relevant insights and strategies to sustain small islands in an era of global environmental change. The nine contributions in this volume cover a wide range of applications of socio-metabolic research, from flow accounts to stock analysis and their relationship to services in space and time. They offer insights into how reconfiguring patterns of resource use will allow island governments to build resilience and adapt to the challenges of climate change.

Engaging students and cultivating understanding in a world of diversity. Human Sexuality in a World of Diversity, 9/e examines the rich diversity found in human sexuality. More significantly, the text places an emphasis on cultivating understanding in a world of increasing diversity through personal engagement. Students are encouraged to reflect upon their own beliefs and experiences throughout the text in order to foster a more personal and impactful learning experience. The text also helps students develop their own opinions by promoting critical thinking skills, personal sexual health awareness, and responsible decision-making. MyDevelopmentLab is an integral part of the Rathus / Nevid / Fichner-Rathus program. Key learning applications include Video Series for Human Sexuality, "My Life, My Sexuality," Assessment, and Personalized Study Plan. Teaching & Learning Experience Personalize Learning - MyDevelopmentLab is an online homework, tutorial, and assessment program. It helps students prepare for class and instructor gauge individual and class performance. Improve Critical Thinking - Critical Thinking boxes are integrated into the margins. Boxes ask students to delve deeper into the material and reconsider their own opinions and ideas. Engage Students - The newly updated "Real Students Real Questions" feature increases students' critical thinking skills by incorporating real questions from actual college students, as posed to instructors. Explore Research - Throughout the text, "A Closer Look" boxes provide in-depth discussions of scientific techniques and skill-building exercises such as "Breast Self-Examination," "Self-Examination of the Testes," and "What to Do If You Suspect You Have Contracted an STD." Understand Sexuality - Through new and updated features like "My Life, My Sexuality," and "A World of Diversity" the authors strengthen comprehension of the material while fostering greater reflection and understanding. Support Instructors - The 9th edition is accompanied by a rich instructor support package, including new video embedded PowerPoints, a heavily updated Instructor's Manual and Test Bank that are organized according to in-text Learning Objectives for ease of use, and MyDevelopmentLab with the new Human Sexuality Video Series. 0205989322 / 9780205989324 Human Sexuality in a World of Diversity (Case) Plus NEW MyPsychLab with eText -- Access Card Package Package consists of: 0205206514 / 9780205206513 NEW MyPsychLab with Pearson eText -- Valuepack Access Card 0205909469 / 9780205909469 Human Sexuality in a World of Diversity (case) *Gifted Hands* BoD - Books on Demand

Stratigraphy, a branch of geology, is the science of describing the vertical and lateral relationships of different rock formations formed through time to understand the earth history. These relationships may be based on lithologic properties (named lithostratigraphy), fossil content (labeled biostratigraphy), magnetic properties (called magnetostratigraphy), chemical features (named chemostratigraphy), reflection seismology (named seismic stratigraphy), age relations (called chronostratigraphy). Also, it refers to archaeological deposits called archaeological stratigraphy. Stratigraphy is built on the concept "the present is the key to the past" which was first outlined by James Hutton in the late 1700s and developed by Charles Lyell in the early 1800s. This book focuses particularly on application of geophysical methods in stratigraphic investigations and stratigraphic analysis of layered basin deposits from different geologic settings and present continental areas extending from Mexico region (north America) through Alpine belt including Italy, Greece, Iraq to Russia (northern Asia).

This new edition of The Drinking Water Handbook is thoroughly revised and updated, and includes a comprehensive discussion of the Flint, Michigan lead contamination event, new coverage of contaminants in water, such as personal care products and pharmaceuticals (PCPP) and endocrine disruptors, and examines the security requirements for waterworks and ancillary procedures. It examines the process of producing drinking water— from sources of water, to the purification process, through distribution systems to the tap, and then to the actual use and reuse of water. It also reflects the latest advancements in treatment technologies and reviews new laws and regulations related to drinking water.

This book provides an overview of the current development status of remediation technologies involving electrochemical processes, which are used to clean up soils that are contaminated with different types of contaminants (organics, inorganics, metalloids and radioactive). Written by internationally recognized experts, it comprises 21 chapters describing the characteristics and theoretical foundations of various electrochemical applications of soil remediation. The book's opening section discusses the fundamental properties and characteristics of the soil, which are essential to understand the processes that can most effectively remove organic and inorganic compounds. This part also focuses on the primary processes that contribute to the application of electrochemically assisted remediation, hydrodynamic aspects and kinetics of contaminants in the soil. It also reviews the techniques that have been developed for the treatment of contaminated soils using electrochemistry, and discusses different strategies used to enhance performance, the type of electrode and electrolyte, and the most important operating conditions. In turn, the book's second part deals with practical applications of technologies related to the separation of pollutants from soil. Special emphasis is given to the characteristics of these technologies regarding transport of the contaminants and soil toxicity after treatment. The third part is dedicated to new technologies, including electrokinetic remediation and hybrid approaches, for the treatment of emerging contaminants by ex-situ and in-situ production of strong oxidant species used for soil remediation. It also discusses pre-pilot scale for soil treatment and the use of solar photovoltaic panels as an energy source for powering electrochemical systems, which can reduce both the investment and maintenance costs of electrochemically assisted processes.

Endoscopic Ear Surgery: Principles, Indications, and Techniques Increasingly used as an adjunctive tool in the diagnosis and management of ear disease, middle ear endoscopy has the potential to decrease patient morbidity, prevent disease recurrence, and reduce costs. Its capacity to uncover "hidden" anatomy within the small dimensions of the ear has made it essential for functional surgery, allowing surgeons to preserve key anatomic structures such as the cochlea and facial nerve. Now for the first time, the physicians who pioneered this groundbreaking minimally invasive technique review its indications, advantages, disadvantages, and surgical approaches: Written by the foremost leaders in the field, all members of the

International Working Group on Endoscopic Ear Surgery Features nearly 1,000 intraoperative endoscopic images filmed with high-definition cameras, plus outstanding line drawings that aid in understanding all concepts. Comprehensively covers the field, including chapters on endoscopic and combined endoscopic-microscopic management of cholesteatoma, surgical restoration of middle ear ventilation, myringoplasty, Meniere disease, tympanoplasty and stapes surgery, revision surgery, and much more. Demonstrates state-of-the-art endoscopic procedures in 19

instructive videos. From the unique anatomy and pathophysiology of the middle ear through diagnosis, surgical indications, procedures, and instrumentation, this book is indispensable for all otolaryngologists and neurotologists. It offers a full picture of the field today, as well as exploring the future possibilities of ear endoscopes alone or in combination with operative microscopes for the most effective treatment of middle ear pathologies. *Defender of Faith, Revised Edition* Springer
