This is the first volume

specifically dedicated to competition in inflection and word-formation, a topic that has increasingly attracted attention. Semantic categories, such as concepts, classes, and feature bundles, can be

expressed by more than one form or formal pattern. This departure from the ideal principle "one form – one meaning" is particularly frequent in morphology, where it has been treated under diverse headings, such as blocking, Elsewhere Condition, Pāṇini's Principle, rivalry, synonymy, doublets, overabundance, suppletion and other terms. Since these research traditions, despite the heterogeneous terminology, essentially refer to the same underlying problems, this volume unites the phenomena studied in this field of linguistic morphology under the more general heading of competition. The volume features an extensive state of the

art report on the subject and 11 research papers, which represent various theoretical approaches to morphology and address a wide range of aspects of competition, including morphophonology, lexicology, diachrony, language contact, psycholinguistics, sociolinguistics and language acquisition.

This collection brings together the latest research into the syntax, semantics, phonology, phonetics and morphology of the Celtic languages. Based on presentations given at the Formal Approaches to Celtic Linguistics Conference in 2009, this book contains articles by

leading Celtic linguists on Breton, Modern Irish, Old Irish, Scottish Gaelic, and Welsh, on a wide variety of topics ranging from the syntax and semantics of clefts to the articulatory phonology of fortis sonorants.

Bibliothèque des écrivains de la Compagnie de Jésus ou notices bibliographiques

Walter de Gruyter
This book deals with the ways in which French is used in different circumstances and settings in France and abroad, with the language attitudes of French speakers and with language policy. It is concerned to examine not only the linguistic data, but also the social, political and economic environment in which contemporary French is used. At the

same time it offers an introduction to contemporary sociolinguistic theory, methods and results. After a brief historical introduction and a review of approaches to regionalism, Professor Ager looks at such questions as the conflicts between standard French and regional languages such as Breton, the changing role of French in the world; the distinctiveness of social and professional varieties such as the language of the working class, scientists or immigrants and language variation correlating with interactional factors such as formality or medium. A final chapter deals with language attitude, language policy and

language planning. This volume sets language information in its social context and shows how to investigate and evaluate both language variation and the social and political reaction to it.

What is the relationship between phonetics and phonology? Are phonological features innate and universal, and do they have fixed phonetic correlates? These questions have received renewed prominence in theoretical debates, and this book explores

them from a modular, substance-free perspective. This in-depth analysis of Breton serves not only to introduce important data from this endangered language into the theoretical landscape but also to demonstrate the viability of a modular phonological framework. The book introduces a minimalist system of phonological representations built up on a language-specific basis, and integrates it with a fully-fledged computational framework, showcasing the numerous empirical and conceptual advantages of a substance-free view of phonology. Presenting the first comprehensive analysis of the sound patterns of a Breton

variety treated in a substance-free phonological framework, this book will enhance the understanding of Celtic phonology and offers a valuable reference for postgraduate students, academics and researchers working in phonological theory and Celtic studies.

Bibliothèque des écrivains de la Compagnie de Jésus, ou: Notices bibliographiques 1° de tous les ouvrages publiés par les membres de la Compagnie de Jésus ... 2° des apologies, des controverses religieuses, des critiques littéraires et scientifiques suscitées à leur sujet Springer Nature

This title explores the wide variety of cases in which the plural of

nouns is lexical. Using tools from formal semantics and theoretical morphology, it analyses the countless number of examples of word-dependent irregularities in the form and meaning of plural.

Catalogues of Manuscripts and Books for Sale by Thomas Thorpe BRILL

This handbook comprises an in-depth presentation of the state of the art in word-formation. The five volumes contain 207 articles written by leading international scholars. The XVI chapters of the handbook provide the reader, in both general articles and individual studies, with a wide variety of perspectives: word-formation as a linguistic discipline

(history of science, theoretical concepts), units and processes in word-formation, rules and restrictions, semantics and pragmatics, foreign word-formation, language planning and purism, historical word-formation, word-formation in language acquisition and aphasia, word-formation and language use, tools in word-formation research. The final chapter comprises 74 portraits of word-formation in the individual languages of Europe and offers an innovative perspective. These portraits afford the first overview of this kind and will prove useful for future typological research. This handbook will provide an essential reference for both

advanced students and researchers in word-formation and related fields within linguistics.

Volontà Walter de Gruyter GmbH & Co KG
This handbook provides a comprehensive and thorough survey of our current insights into the diversity and unity found across the 6000 languages of this planet. The 125 articles include inter alia chapters on the patterns and limits of variation manifested by analogous structures, constructions and linguistic devices across languages (e.g. word order, tense and aspect, inflection, color terms and syllable structure). Other chapters cover the history, methodology and the theory of typology, as well as the

relationship between language typology and other disciplines. The authors of the individual sections and chapters are for the most part internationally known experts on the relevant topics. The vast majority of the articles are written in English, some in French or German. The handbook is not only intended for the expert in the fields of typology and language universals, but for all of those interested in linguistics. It is specifically addressed to all those who specialize in individual languages, providing basic orientation for their analysis and placing each language within the space of what is possible and common in the languages of the world.

Selected Papers on Indo-European Linguistics Oxford

University Press
Work on the movement of phrasal categories has been a central element of syntactic theorising almost since the earliest work on generative grammar. However, work on the movement of lexical elements, heads, has flourished only in recent years, stimulated originally by Chomsky's Empty Category Principle, and later by the work of Travis, Baker and Pollock. Parallel to these theoretical concerns, much attention has been focused on the description of verb-second languages and on the movement operations which place the verb in its 'second' position. This volume

represents the latest work in an important field, from some of its leading researchers, and puts forward many ideas about relevant principles and parameters of Universal Grammar. It will have a significant impact on its field.

This series of
HANDBOOKS OF
LINGUISTICS AND

COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an

verview and orientation. To attain these objectives, the series will aim for a standard comparable to that of the leading handbooks in other disciplines, and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings, and up-to-date methodology. The editors, both of the series and of the individual volumes, and the individual contributors, are committed to this aim. The languages of publication are English, German, and French. The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the

various handbooks; however no inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended, and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set time-table for the publication of the whole series. Each volume will be a self-contained work, complete in itself. The order in which the handbooks are published does not imply any rank ordering, but is determined by the way in which the series is organized; the editor of the whole series enlist a competent editor for

each individual volume. Once the principal editor for a volume has been found, he or she then has a completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervenes where questions of delineation between individual volumes are concerned. It is felt that this (*modus operandi*) is best suited to achieving the objectives of the series, namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume.

This volume questions the present-day assumption holding the Italian academies to be the model for the European literary and learned society, by juxtaposing them to other types of contemporary literary and learned associations in several Western European countries.

From the papers presented at the 26th LSRL, this volume offers a selection of a contributions on phonological issues and on syntax. Most of the grammatical phenomena discussed are treated within the

frameworks of the Minimalist Program, Distributed Morphology, or Optimality Theory. It was apparent from the diversity of the papers delivered, that these approaches are exposing novel phenomena, which enrich and widen our knowledge and understanding of language. The analyses undertaken in these articles range over a variety of (dialects of) Romance languages.
