Penelitian adalah hal

penting dalam berbagai bidang kehidupan manusia di bumi ini. Perkembangan ilmu pengetahuan dan teknologi tidak terlepas dari aktivitas dunia penelitian, demikian juga di bidang pendidikan dan kesehatan. Perkembangan ataupun kemajuan di berbagai hal di kedua bidang tersebut sangat dipengaruhi oleh aktivitas atau keberhasilan penelitian di bidangnya masing-masing. Kehadiran buku ini adalah ingin menjawab semua permasalahan di

atas, baik yang dihadapi oleh peneliti, terutama penelitipemula maupun kesulitan yang dihadapi oleh mahasiswa baik sarjana maupun pasca sarjana dalam membuat proposal penelitian bidang kesehatan (keperawatan, kebidanan, kesehatan masyarakat, dan lain-lain).

Kesehatan merupakan salah satu kebutuhan paling mendasar bagi setiap manusia. Kesehatan setiap manusia menjadi salah satu faktor

yang menentukan kualitas hidup seorang manusia dan kualitas pembangunan nasional suatu bangsa. Oleh karena itu, negara memiliki kewajiban dalam melindungi hak kesehatan rakyatnya. Pemberian air susu ibu (ASI) secara eksklusif selama 6 bulan pertama kehidupan bayi telah terbukti mampu meningkatkan derajat kesehatan suatu bangsa. Hasil penelitian menunjukkan bahwa ASI eksklusif mampu menurunkan angka kematian ibu dan bayi

serta meningkatkan derajat kesehatan ibu dan bayi. Selain itu, pemberian ASI eksklusif selama 6 bulan pertama kehidupan bayi akan memberikan manfaat positif bagi kehidupannya di masa yang akan datang. Banyaknya manfaat ASI eksklusif tidak diikuti dengan angka capaian pemberian ASI eksklusif yang maksimal. Oleh karena itu, buku ini tidak hanya akan mengungkapkan banyaknya manfaat ASI eksklusif, tetapi juga mencantumkan

permasalahan dan hambatan yang dihadapi seorang ibu dalam memberikan ASI eksklusif. Semua paparan yang terdapat dalam buku ini didasarkan pada studi pustaka dari berbagai jurnal penelitian, buku, dan sumber pustaka lainnya. Harapannya, buku ini mampu menjadi landasan pembuatan regulasi pemberian ASI eksklusif dalam rangka mengakomodasi permasalahan dan hambatan yang dihadapi ibu selama ini dalam memberikan ASI eksklusif.

The publication of the Department of Health White Paper "The Health of the Nation" (1992) and "Our Healthier Nation" (1998) gave emphasis to the importance of nutritional health of the nation at all ages. It is clear that the achievement of specific targets for pregnancy and infancy as set out in the White Paper will involve the training of all health care professionals in nutrition education. This

book responds to the challenge and focuses on good nutrition for and during pregnancy, in low birth-weight infants, and during infancy. It has a strong public health emphasis, dealing with health prevention issues for the Nation's younger population. The text is written as a scientific reference book for those seeking to apply science in the support of a successful pregnancy and in the prevention of nutritional problems during foetal and early post-natal life. The

importance of optimal nutrition during these periods of life is emphasised by the overwhelming evidence that nutritional problems in early embryonic life may cause congenital malformations and during late foetal life and early post natal life may set the molecular programme for later disease development.

"This volume offers a comprehensive review of all the current knowledge on maternal role attainment since Reva Rubin's seminal work.

Drawing from research in nursing, maternal-child health, psychology, sociology, and social work, the book examines the psychological transition to motherhood from a contemporary, multidisciplinary perspective." "Special circumstances such as preterm birth and single parenthood are discussed, as well as the effects of maternal employment and maternal age (such as teens and older mothers). This volume should be of value for use in courses in maternity nursing,

women's studies, community and social psychology, and social work, as well as for health professionals providing care for the woman during pregnancy and early motherhood."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Melakukan penelitian epidemiologi klinis sebenarnya menarik, apalagi pekerjaan itu adalah tugas calon dokter

atau dokter spesialis sebagai salah satu syarat untuk memperoleh ijazah. Ternyata tidak jarang anak didik mengalami kesulitan menyelesaikan tugas tersebut dengan lancar; termasuk untuk memutuskan topik atau judul penelitiannya. Pengalaman penulis sebagai pembimbing dan juga reviewer di Komisi Etik membuktikan hal tersebut. Buku ini ditulis secara sederhana, sehingga sesuai untuk peserta didik dan peneliti muda, karena lebih mudah untuk dipahami.

Buku ini dibagi menjadi 2 bagian dengan judul yang sama, tetapi dengan anak judul yang berbeda, untuk mempermudah pembaca mengenali, bahwa kedua buku tersebut adalah berurutan. Buku pertama: MEMAHAMI PENELITIAN EPIDEMIOLOGI KLINIS SECARA MUDAH Membuat Proposal Penelitian, Jenis Penelitian, dan Rancang Bangun Pengumpulan Data Buku kedua: MEMAHAMI PENELITIAN EPIDEMIOLOGI KLINIS SECARA MUDAH Analisis Data dan Menulis Hasil Penelitian Dalam buku

pertama, diuraikan mengapa kita melakukan penelitian epidemiologi klinis, cara mencari topik penelitian, kemungkinan terjadinya serious research misconduct, pentingnya menulis keaslian penelitian, membuat pertanyaan penelitian, variabel penelitian epidemiologi klinis (bebas, tergantung, antara, luar, confounder, modifier) serta cara membuat definisi operasional variabel. Dijelaskan juga melakukan review literatur secara efisien,

cara menulis latar belakang penelitian, tinjauan pustaka, dan metode penelitian. Bagian terpenting dari penelitian adalah kerangka teoretis dan konseptual diuraikan lebih sederhana, konsep dan hubungan antarvariabel penelitian digambarkan dalam kedua kerangka tersebut. Selanjutnya dibahas populasi dan sampel, menentukan kriteria inklusi dan eksklusi, serta membuat alur penelitian untuk jenis-jenis penelitian epidemiologi klinis. Juga dibicarakan

membuat form dan kuesioner. Bagian inti dari buku ini ialah membicarakan jenis-jenis penelitian epidemiologis yang terdiri dari penelitian etiologik, intervensi, diagnostik, dan prognostik disertai dengan contoh-contoh. Juga dibicarakan tentang rancang bangun penelitian meliputi penelitian cohort, cross sectional, case control, dan acak (randomized trial). Setelah menyelesaikan buku pertama, Anda sebaiknya meneruskan ke buku kedua, karena dalam

buku kedua dibahas tentang cara melakukan analisis data dengan perangkat lunak dan cara menulis hasil penelitian, termasuk cara membuat gambar. Selamat menikmati.

Successful Breastfeeding

Deepublish

The new edition of this best selling handbook has been written to help midwives and other health professionals provide more effective advice and support for the breastfeeding women in their care. It offers clear,

research-based, and effective guidelines to answer such questions as: Why breastfeed? How does a baby breastfeed? How long and how often should feeds occur? What is the correct positioning and attachment of the baby? What factors are helpful or unhelpful in breastfeeding? What other antenatal and postnatal considerations are there? What if there are problems or special circumstances?

The Support of

Breastfeeding explores cultural support for and attitudes toward breastfeeding, advantages and disadvantages of artificial feeding, and breastfeeding support policies and resources. The exams at the end of Modules 1, 2, 3, and 4, while still useful in preparing For The IBCLC exam, are not eligible for CERPS or Continuing Education credits for registered dietitians or nurses. The Lactation Specialist Self Study Series is comprised of four

modules: Module 1: The Support of Breastfeeding (0-7637-0208-0) Module 2: The Process of Breastfeeding (0-7637-0195-5) Module 3: The Science of Breastfeeding (0-7637-0194-7) Module 4: The Management of Breastfeeding (0-7637-0193-9) the modules may be purchased separately, or as a complete set (0-7637-1974-9). *Metode Penelitian Kesehatan* Little Brown WHO and UNICEF jointly developed this global

strategy to focus world attention on the impact that feeding practices have on the nutritional status, growth and development, health, and thus the very survival of infants and young children. The strategy is the result of a comprehensive two-year participatory process. It is based on the evidence of nutrition's significance in the early months and years of life, and of the crucial role that appropriate feeding practices play in achieving optimal health

outcomes. The strategy is intended as a guide for action; it identifies interventions with a proven positive impact; it emphasizes providing mothers and families the support they need to carry out their crucial roles, and it explicitly defines the obligations and responsibilities in this regards of governments, international organizations, and other concerned parties. **Present Knowledge in Nutrition** Kencana This easy to use text provides practitioners and

researchers with a global view of current and emerging issues concerned with successful pregnancy outcomes and approaches that have been successful or show promise in ensuring a successful pregnancy. The fully updated and revised second edition expands its scope with topics not covered in the first edition including pregnancy and military service; sleep disorders during pregnancy; the gut microbiome during pregnancy and the newborn; requirement for

vitamin D in pregnancy; the environment—contaminants and pregnancy; preeclampsia and new approaches to treatment; health disparities for whites, blacks, and teen pregnancies; depression in pregnancy—role of yoga; safe food handling for successful pregnancy outcome; relationship of epigenetics and diet in pregnancy; caffeine during pregnancy; polycystic ovary syndrome; US Hispanics and preterm births; celiac disease and pregnancy;

cannabis use during pregnancy. The second edition of Handbook of Nutrition and Pregnancy will be a valuable resource for clinicians and other healthcare professionals who treat and counsel women of child-bearing age and pregnant women. Socio-legal Studies Dartmouth Publishing Company "The theme of The World Development Report 2007 is youth - young people between the ages of 12 to 24. As this population group seeks identity and

independence, they make decisions that affect not only their own well-being, but that of others, and they do this in a rapidly changing demographic and socio-economic environment. Supporting young people's transition to adulthood poses important opportunities and risky challenges for development policy. Are education systems

preparing young people to cope with the demands of changing economies? What kind of support do they get as they enter the labor market? Can they move freely to where the jobs are? What can be done to help them avoid serious consequences of risky behavior, such as death from HIV-AIDS and drug abuse? Can their creative energy be

directed productively to support development thinking? The report will focus on crucial capabilities and transitions in a young person's life: learning for life and work, staying healthy, working, forming families, and exercising citizenship. For each, there are opportunities and risks; for all, policies and institutions matter."
