AVILA GOODMAN

14 Fun Facts About the Milky Way

Learning Island

Titan was the first moon of Saturn to be discovered. It took another six years to find the next moon. Since then, 53 definite moons have been found around Saturn. Another nine moons are considered provisional. More study is needed to confirm that they are proper orbiting moons. Titan is covered in thick clouds and has a surface temperature of -178oC (-289oF). Beneath the atmosphere is a moon of rivers, lakes and oceans in a land of hydrocarbon sand dunes. Scientists believe Titan is a lot like Earth was millions of years ago. It may hold the answer to how life evolved on our planet. How much do you know about Titan? Do you know: What shape is Titan? What is beneath Titan's crust? Does Titan have seasons? Do Titan's lakes have waves? Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries, to books of knowledge. Many books are appropriate for hi-lo readers. Open the world of reading to a child by having them read for 15 minutes a day.

14 Fun Facts About Theodore Roosevelt

Learning Island

After William, the French Duke of Normandy, defeated King Harold of England at the Battle of Hastings, William became King of England. He built a fortress along the River Thames where he could maintain control of London and watch any invaders coming along the river. The fortress became The Tower of London. Over the years, it has been added to and destroyed. It has been a palace, zoo, Museum, Royal Mint, observatory, prison, and a place of execution and murder for many unlucky souls. Today, its

Towers display the secrets of its past while its ghosts wander the grounds at night. Do you know: Why are ravens kept at the Tower of London? What happened to the first prisoner held at the Tower? How many towers did King Henry III build? What happened to the original crown jewels of England? Why is the Garden Tower called the Bloody Tower? Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. Reading Level: 6.9 LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries, to books of knowledge. Many books are appropriate for hi-lo readers. Open the world of reading to a child by having them read for 15 minutes a day.

14 Fun Facts About the Taj Mahal

Learning Island

The Great Wall of China is a man-made wonder, spanning thousands of miles. It spreads from the Pacific Ocean in the East to the Gobi Desert and beyond in the west. Much of it has stood for hundreds of years, with some portions over 2000 years old. The Great Wall stood as a wall of defense for many years, against the warring states to the north. Then, in 1271, the Mongols invaded. Suddenly work on the wall came to a halt. While many parts of the wall are now in disrepair, many other parts have been restored or reconstructed. It still stands today as a great wonder of the world. Do you know: How old is the oldest part of the Great Wall? How long did it take to build the first Great Wall? How many workers died during construction of the Great Wall? Which dynasty built the longest wall? When was the wall we see today built? Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 10 and up. All measurements in American and metric. Reading Level: 6.6 LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries,

to books of knowledge. Many books are appropriate for hi-lo readers. Open the world of reading to a child by having them read for 15 minutes a day.

14 Fun Facts About Yellowstone: A 15-Minute Book Learning Island

The Danube is a romantic river. It begins in the Black Forest of Germany, slashes gorges through the mountains and meanders along broad plains. Many castles and palaces have been built along its banks. Many cities have been built, destroyed and rebuilt. A truly international river, it is a source of travel and trade for many European countries. Its basin collects water from many more before emptying into one of the largest deltas and national parks in the world. How much do you know about this European river? Do you know: How many countries does the Danube River run through? Which mountain range grew around the Danube River? How often does the Danube River freeze? The oldest castle in the world sits along the Danube. Which castle is it? What are Danube Pebbles? Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. 14 Fun Facts About Nebulas

Learning Island

There are eight regular satellites in orbit around Jupiter. These are moons that formed within the gravity field of Jupiter. They were formed at the same time and out of the same material as the planet itself. They have circular orbits and orbit in the same direction as the planet. The four largest are the Galilean moons. These are the ones seen from any telescope on Earth. But there are four more moons. These little known moons are odd shaped.

They orbit close to the planet, providing the material that makes up Jupiter's ring system. In order from Jupiter they are Metis,Adrastea, Amalthea and Thebe. This book is about these four moons. How much do you know about these moons? Do you know: How many rings does Jupiter have? How do these moons make the rings of Jupiter? What happens to Jupiter's rings? How big are the craters on Amalthea? What is the reddest object in our solar system? And much more. Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries, to books of knowledge. Many books are appropriate for hi-lo readers. Open the world of reading to a child by having them read for 15 minutes a day.

14 Fun Facts About Eclipses Learning Island

How much of America's rainfall ends up in the Mississippi River? Which mountain range grew around the Danube River? Are there more kinds of fish in the Amazon or in the ocean? The Thames was once a tributary of what European river? What is the "Ghost City" of the Yangtze? Learn the answer to these questions and many more fun facts in this group of seven 15-Minute Books. Rivers can have many fascinating facts. Surprise your friends, and even your parents with these fun facts. This compilation includes the following 15-minute books: 14 Fun Facts About the Amazon 14 Fun Facts About the Nile 14 Fun Facts About the Danube 14 Fun Facts About the Yangtze River 14 Fun Facts About the Mississippi River 14 Fun Facts About the River Thames 14 Fun Facts About Australia's Murray River Reading Level: 6.9 All measurements in American and metric. Open the world of reading to a child by having them read for 15 minutes a day.

14 Fun Facts About the Strange Moon Titan Learning Island

It was once thought that our solar system ended at Saturn. Then the first telescopes revealed Uranus and Neptune. Differences in the calculations of the gravity of these giants set off another search and Pluto was discovered. Pluto was then thought to be the last planet of our solar system. Beyond it was empty space - until astronomers started looking at comets. Huge balls of ice, zipping through the solar system, past the planets, around the sun and back out again. Where did they come from? Where did they go? And what made them come back? That's when scientists discovered the Kuiper Belt and the Oort Cloud. Reed this book and find out: How many types of comets are there? What formed the Kuiper Belt? How big is the Kuiper Belt? What is the Oort Cloud? How big is the Oort Cloud? How long does it take sunlight to reach the Oort Cloud? Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries, to books of knowledge. Many books are appropriate for hi-lo readers. Open the world of reading to a child by having them read for 15 minutes a day.

14 Fun Facts About the Ganges River Learning Island

Our galaxy contains about 200 billion stars. Astronomers believed that some of these stars must have solar systems with planets. They went looking - and found some. They call these planets extrasolar planets or exoplanets. Here are some fun facts about them. Do you know: Where are exoplanets? How many exoplanets have scientists discovered? How many types of exoplanets are there? Do all exoplanets orbit stars the way our planets orbit the

sun? And much more. Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. Reading level: 6.9 LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries, to books of knowledge. Many books are appropriate for hi-lo readers. Open the world of reading to a child by having them read for 15 minutes a day.

14 Fun Facts About the Galilean Moons of Jupiter Learning Island

On January 7, 1610, Italian astronomer Galileo Galilei turned his newly developed telescope to Jupiter. He discovered four objects orbiting the giant planet. It took him another night's observations to clearly distinguish between two of them. He called them "The Medicean planets", after the Medici family (who ruled Italy at the time), and gave them numbers. German astronomer Simon Marius also claimed to have seen these objects at about the same time. He never published any documentation, and the credit was given to Galileo. It was nearly 250 years later before they were given names. They are now known as the Galilean moons, Io, Europa, Ganymede and Callisto. They were created at the same time as Jupiter and contain 99.999 percent of all the mass in orbit around Jupiter. How much do you know about these moons? What would Ganymede be called if it did not orbit Jupiter? What is the most volcanic place in our solar system? Why does Europa have spots? Which moon is a good candidate for containing life? Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. Educational Versions include exercises designed to meet Common Core standards.
