About Love Independently Published

In this work, Xavier Lakshmanan argues for a textual linguistic approach to Christian theology. The book takes its shape in

conversation with Paul Ricoeur's philosophical thought, demonstrating how Ricoeur's hermeneutic philosophy can inform the way Christians interpret and appropriate biblical narratives without delimiting the potential of the text or eroding the distinctiveness of its language. The text can be appropriated in ways that address the fundamental questions of life. New meanings are constantly generated from the same text in order to describe and redescribe existence, and form human identity. The self is linked inseparably with narrative; every interpretation of narrative is at the same time a reinterpretation of the self and of its possibilities. In such interpretative processes, the reader interprets the text and the text interprets the reader at the same time through an interactive reading. Accordingly, the aim of interpreting the narratives is to open up the world of the text in front of the text and in front of the reader. Here what the text uncovers is the «textual» structure of existence itself. The reality that unfolds through language discloses the possibilities of existence, and in this way the text creates a future. A revised

identity emerges against the horizon of that future to give a coherent and dynamic account of the self against a horizon of hope.

This superbly illustrated book provides a comprehensive overview of guided endodontics, a technology-driven, contemporary treatment approach that represents a paradigm shift in endodontics. Guided endodontics is now the proven, safe, predictable and, clinically, the most effective method for management of calcified root canals and root-end resection surgeries. This book covers detailed step-by-step digital treatment planning and the clinical application of static guides and dynamic navigation systems for, both, surgical and non-surgical endodontic treatment. In essence, this novel technology utilizes preoperative CBCT scans and intra-oral 3D scans as well as uniquely developed special software, for virtual planning of the endodontic treatment. This book delineates 3D printing, CBCT, digital impression systems, static guide designing with different software and clinical application of static and dynamic navigation in endodontics and much more. The concluding chapter addresses the future trends in 3D guidance in endodontics, in particular, and dentistry in general.

Siegfried Kracauer was one of the most important German thinkers of the twentieth century. His writings on Weimar culture, mass society, photography and film were groundbreaking and they anticipated many of the themes later developed members of the Frankfurt School and other cultural theorists. No less remarkable were the circumstances under which he made these contributions. After his early years as a journalist in Germany, the rise of the Nazis forced Kracauer into exile – first in Paris and then, after a protracted flight via Marseilles and Lisbon, to the United States. The existential challenges, personal losses and unrelenting hardship Kracauer faced during these years of exile

formed the backdrop against which he offered his acute observations of modern life. Jörg Später provides the first comprehensive biography of this extraordinary man. Based on extensive archival research, Später's biography expertly traces the key influences on Kracauer's intellectual development and presents his most important works and ideas with great clarity. At the same time, Später ably documents the intensity of Kracauer's personal relationships, the trauma of his flight and exile, and his embrace of his new homeland, where, finally, the 'groundlessness' of refugee existence gave way to a more stable life and, with it, some of the intellectually most fruitful years of Kracauer's career. The result is a vivid portrait of a man driven both by an urge to capture reality – to attend to the things that are 'overlooked or misjudged', that still 'lack a name', as he put it – and by a need to find his place in a hostile, threatening world.

In the Gospel of John, one aspect of Jesus' divinity is his lordship. Paul C.J. Riley examines Jesus' lordship through the use of one Christological title, kyrios, a word which can be translated as Lord, master, owner or sir. Because kyrios is often used by characters in the narrative, Riley considers it from a narrative

perspective. As a result, the first question he examines is how kyrios functions. In addition, due to textual variation for some occurrences of kyrios, the next question addressed is where kyrios is. From a firm narrative and textual foundation, the final question the author asks is what kyrios means. The answers to these three questions provide a comprehensive understanding of Jesus' divine lordship in the Gospel of John.

Jerusalem in the Achaemenid Period Bible and Theology in Africa This book increases awareness about Paul's community formation preaching which has been widely ignored in the contemporary homiletical field where the New Homiletic has exerted a strong influence. This interdisciplinary study suggests that contemporary preachers should preach shared narratives and communal norms for the creation of boundaries.

This book presents the first systematic study of Augustine's insights into passions as well as his approach to the therapy of emotions and their sanctification. Analysing various phases of Augustine's writings, this work explores the systematic structure of Augustine's tenets on emotions and on freedom from passions. The general context is Augustine's philosophical and theological convictions on the issue of amor sui and amor Dei. Based upon a detailed analysis of original Latin texts and a critical examination of recent research, the author demonstrates how the language and conception of passions are tightly linked with Augustine's developing views of the philosophical paradigm of emotions and his later theological disputes with schismatics and heretics. In offering a comprehensive account of freedom from passions in

Augustine's theological anthropology, this book makes a creative contribution to his understanding of the moral psychology of passions in social and political dimensions and the idea of the deification of emotions.

The Prairie: A Tale (1827) is a historical novel by James Fenimore Cooper, the third novel written by him featuring Natty Bumppo, his fictitious frontier hero, who is simply known as "the trapper"

in it. Chronologically The Prairie is the fifth and final installment of the Leatherstocking Tales. It depicts Natty in the final year of his life still proving helpful to people in distress on the American frontier. Continuity with The Last of the Mohicans is indicated by the appearance of the grandson of Duncan and Alice Heyward of The Last of the Mohicans and the noble Pawnee chief Hard Heart, whose name is English for the French nickname for the Delaware, le Coeur-dur. Natty is drawn to Hard Heart as a noble warrior in the likeness of his dear friend Uncas, "the last of the Mohicans."

The Gospel of Mark Deutscher Ärzteverlag

The term “Crisis of Representation” rose to fame through Michel Foucault. The crisis, in the context of this issue, has not only a political and economic dimension, but a cultural, aesthetic and religious one as well. Thus, a serious inquiry into this complex and multidimensional phenomenon requires an interdisciplinary approach. The issue targets the phenomena at hand through 15 contributions – all with unique and innovative approaches to the topic. One common aim that holds the issue together is the analysis of the nature of the crisis, which helps to find suitable theoretical frameworks. On the other hand, the term itself functions as a tool that enables the analysis of specific societal developments. Contributing authors brought with them expertise from their respective fields including philosophy, political sciences, theology, Islamic studies and religious studies. This allowed for a cross-disciplinary approach on the phenomenon with special foci on politics, religions, societies and finance, as well as theoretical developments on current philosophical and post-colonial discourses.

This volume presents a collection of approaches to the emerging field of video analysis in the social sciences. Although the importance of visual qualitative methods has increased, video analysis cannot draw upon a single method or methodology. Therefore this book will structure the diverse approaches in order to identify their traditions. It assembles studies from linguistic anthropology as well as conversation analysis, sociological hermeneutics, ethnography, phenomenology and finally focused ethnography. Practical questions will be asked, as for instance,

how the fact of being filmed affects the situation that is being filmed and theoretical questions will be posed, as for example, whether actions are subject to contingency or whether they are pre-determined.
