In the summer of 1955, early in the modern civil rights era, six African American golfers in Beaumont, Texas, began attacking the Jim Crow caste system when they filed a federal lawsuit for the right to play the municipal golf course. The golfers and their African American lawyers went to federal court and asked a conservative white Republican judge to render a decision that would not only integrate the local golf course but also set precedent for desegregation of other public facilities, as well. In Fair Ways, Beaumont native Robert J. Robertson chronicles three parallel stories that converged in this important case. He tells the story of the plaintiffs—avid golfers who had learned the game while working as caddies and waiters—and their young lawyers, recent graduates from Howard University law school, and the Republican judge just appointed to the bench by President Eisenhower. Would the judge apply the new principles of Brown v. Board of Education to the questions before him? Would he use federal judicial power to override state laws and outlaw local customs? Fair Ways gives an uncommonly vivid picture of racial segregation and the forces that brought about its end. Using public case papers, public records, newspapers, and oral histories, Robertson has recreated the scene in Beaumont on the eve of desegregation, describing in detail the parallel white and black communities that characterized the Jim Crow caste

system. Through this account, the forces at work in the South—education, military experience, rising expectations, the NAACP, and the rule of law—are personified dramatically by the golfers, the lawyers, and the judge.

Wading Through the Swamp chronicles the history of the era from the time of World War II to the present, highlighting the changes in our culture over that time. The author uses his life experiences from the bad person of his early years to his times as a judge to paint a picture of the evolution of our culture. The story moves from his boyhood years growing up, his black market years in North Africa, his time as a outlaw hunter and poacher and the time spent in the sport fishing industry on the Atlantic Coast. It moves then to his years as a lawyer and a judge and the unusual and interesting incidents and cases he was involved in over the 34 year span of his time in the legal fields. A portion of the book examines the unsolved murder of Rosemary Moon McIntyre and the corruption and the abuses of a prosecutor who shielded the primary suspect from the police investigation into her murder in order to protect his own political future.

Bartending makes for an interesting case study in that it brings together research on emotional labor and tipped front-line service jobs, as well as the contemporary increase in precarity in work and precarity in life. This project explores the material and identity processes of bartending, examining how a precarious job with high expectations of emotional labor in-turn affects the occupational and personal identities of those employed in the industry. Overall three overarching themes were identified: (1) When wages are outsourced to customers via tipping systems workers are exposed to particularly high emotional demands, rendering bartending a unique form of quid pro quo emotional labor. (2) Bartenders exist in a "default career" mode of employment that is stigmatized for being low-status low-skilled labor. (3) Performing emotional labor and managing stigma creates a divergence between bartender's personal and occupational identities resulting in constant identity work on and off the job.
