Evaluation offers a forward-thinking, evidence-based vision of technology-enhanced higher education that taps into today's digital access opportunities for more dynamic, agnostic, and inclusive learning experiences. The recent ubiquity of digital devices has fostered a new generation of learners who are technologically adept, engage in rapid social co-construction of knowledge, and expect increased choice and personalisation of educational content and

environment. Colleges and universities, however, continue to apply their technology tools into outdated, passive pedagogies. Based on theory and empirical research, this book's innovative framework guides scholars and practitioners toward instructional design and evaluation approaches that leverage the anytime-anywhere potential of wireless networked devices to foster flexible learning experiences and device-neutral assignments. Each

chapter is rich with designs, deliveries, and evaluations of lesson plans, projects, and other real-world course works exemplifying the procedures and principles that will rejuvenate learning amid the globalisation, commodification, and massification of higher education.

Misbehaving: The Making of Behavioral Economics Trafford Publishing

This book aims to raise awareness about the possibility of achieving

the goals of the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD), in order for all disabled people to enjoy the benefit of human rights. The stories of people who have been supported to enjoy their rights and their citizenship will enable readers to focus on how services and support can enable people with a learning disability to have their rights upheld, with an outcome of citizenship, independence and achievement. Despite the

UNCRDP being in place since 2006, a significant number of learning disability service provider organisations and professionals in the UK are not aware of its existence. This book aims to bridge the gap between policy and practice to demonstrate the value of a human rights approach as the foundation for services and support for people with a learning disability.

prepared specially for Christians so as to appreciate the relationship between money and spirituality. It is a personal finance book covering all the tenets of managing money God has blessed you in a godly money. The overriding aim is to help someone not to worship money but the True and Living God. The book will immensely help you to master money as designed by God. As you read this book open your heart to the leading of the Lord God so that at the end of it all His name

will be honored and glorified. About two-thirds of Jesus' parables deal with money or material possessions. Over 2300 biblical passages refer to money or material possessions. There are only about 500 on prayer, and less than 500 on the subject of faith. Surely, if God gives it this much emphasis, we need to take the subject seriously. Finances are a spiritual battleground. Money is the god of the world. It is everywhere worshipped. The love of money is the controlling factor in most

lives. Money is deceitful. It is a lying lord, whom the world serves. You cannot serve God and money, for money is the image of a rival god. We need to be wise about money. Yes use money; do not avoid it, do not evade it and do not pretend it is beneath you. That is unspiritual. On the other hand, do not make it your god. My primary aim being to offer you, dear readers, new ideas, new ways of looking at the subject of money. This book will not teach you any specific formula. Instead it will

teach you how to learn and what to learn.

change the way you think about economics. Nobel laureate Richard H. Thaler has spent his career studying the radical notion that the central agents in the economy are humans—predictable, error-prone individuals. Misbehaving is his arresting, frequently hilarious account of the struggle to bring an academic discipline back down to earth—and change the way we think about economics, ourselves, and our world. Traditional economics assumes rational actors.

Early in his research, Thaler realized these Spock-like automatons were nothing like real people. Whether buying a clock radio, selling basketball tickets, or applying for a mortgage, we all succumb to biases and make decisions that deviate from the standards of rationality assumed by economists. In other words, we misbehave. More importantly, our misbehavior has serious consequences. Dismissed at first by economists as an amusing sideshow, the

study of human miscalculations and their effects on markets now drives efforts to make better decisions in our lives, our businesses, and our governments. Coupling recent discoveries in human psychology with a practical understanding of incentives and market behavior, Thaler enlightens readers about how to make smarter decisions in an increasingly mystifying world. He reveals how behavioral economic analysis opens up new

ways to look at everything from household finance to assigning faculty offices in a new building, to TV game shows, the NFL draft, and businesses like Uber. Laced with antic stories of Thaler's spirited battles with the bastions of traditional economic thinking, *Misbehaving* is a singular look into profound human foibles. When economics meets psychology, the implications for individuals, managers, and policy makers are both profound and entertaining. Shortlisted

Segment Reporting

Taylor & Francis This book offers both marketing and sales professionals a rare combined insight into both worlds to continuously capture customer intelligence and create value, by blending detailed research with academic rigor and commercial experience of the authors in both Europe and North

America. It has never been easier to produce great marketing content and sales collateral. And yet, 90% of the content that marketing produces is NEVER used by sales. Why not? Because it's not relevant to the audience or the prospect doesn't even know the content exists. Furthermore 58% of deals end up in "no decision" because Sales has not presented value effectively. Companies are creating lots of noise but failing to resonate with the customers. So what? The danger, aside

from marketing wasting tens of millions of dollars on ineffective content and tools, is that customers will disengage. 94% of prospects say they have completely disengaged with vendors because of irrelevant content. In order to grow fast, the authors argue, Sales and Marketing teams need to slow down. They need to work together to truly understand their customers' needs, wants, motivations and pain points so that they can offer customized "value". The book sets out how to

establish a formal program to continuously capture customer intelligence and insights – the shiny gems of understanding that help prospects to connect the dots – so that value can be consistently articulated in marketing and sales conversations. By integrating the best ideas and practice from commercial experience and academic research the authors show how to create value across the entire marketing and sales value chain – not only get a new customer,

but to continue to create value for future purchases by creating "post-sales" value.

With extensive experience in payroll outsourcing projects, like ADP Global View and other HR solutions, we've gained valuable insights for management and tools for those involved in such projects. Transferring data to new outsourcing providers often requires structured Excel tables,

which they can quickly integrate into their systems. However, legacy systems produce differently structured data, especially with platforms like ADP Global View which aligns with SAP-HR-Infotypes. Even within two SAP-HR systems, disparities arise, necessitating the process of data cleansing, mapping, and transferring. Our tools, including MATCHMAKER and MAPPING-TOOL, streamline this process, providing a structured method to address

challenges faced during data transfers from legacy to new systems. It's crucial for the company (the data owner) to supply accurate data to the outsourcing provider. This book is a comprehensive guide for our MATCHMAKER and MAPPING-TOOL software, designed to bridge gaps with template files, like the ADP Spread-Sheet-Loader and its 40+ sheets (SSL-infotypes). Our software aids HR professionals, project managers, and analysts in delivering quality data

effortlessly and on schedule. Management recognizes the importance of adhering to project timelines to ensure a successful launch. MATCHMAKER and MAPPING-TOOL, with an Excel-like interface, empower even those with basic Excel knowledge to execute tasks typically reserved for programmers or analysts. Implementing these tools can boost team performance in such projects. This book, while supporting our software users and aiding on-the-job training, also offers

guidance to management in such ventures.
