and subaltern studies at work today, offers a critique of such historiography by taking issue with the Hegelian concept of World-history. That concept, he contends, reduces the course of human history to the amoral record of states and empires, great men and clashing civilizations. It renders invisible the quotidian experience of ordinary people and casts off all that came

before it into the nether-existence known as "Prehistory." On the Indian subcontinent, Guha believes, this Western way of looking at the past was so successfully insinuated by British colonization that few today can see clearly its ongoing and pernicious influence. He argues that to break out of this habit of mind and go beyond the Eurocentric and statist limit of World-history historians

should learn from literature to make their narratives doubly inclusive: to extend them in scope not only to make room for the pasts of the so-called peoples without history but to address the historicity of everyday life as well. Only then, as Guha demonstrates through an examination of Rabindranath Tagore's critique of historiography, can we recapture a more fully human past of

"experience and wonder."

Pāṇini's grammar is the oldest surviving grammar of Sanskrit, dating back to the fifth century BCE. In its completeness of coverage of linguistic elements and its theoretical and analytical sophistication, Pāṇini's grammar is surprisingly modern. It has long provided inspiration for many ideas in modern linguistics, and continues to attract scholars'

attention in the fields of Sanskrit and linguistics. Pāṇinian Studies collects seventeen essays on Pāṇinian linguistics in a single volume dedicated to Professor S. D. Joshi, a stalwart scholar of Pāṇinian grammar. The contributors, all scholars of international acclaim and students and friends of Professor Joshi, include Ashok Aklujkar, Pandit V. B. Bhagwat, Saroja Bhate, Gopikamohan Bhattacharya, Johannes Bronkhorst, George Cardona, Achyutananda Dash, Madhav M. Deshpande, Peter Edwin Hook, Daniel H. H. Ingalls, V. N. Jha, Dinabandhu Kar, Paul Kiparsky, Bimal Krishna Matilal, G. B. Palsule, K. Kunjunni Raja, and J. A. F. Roodbergen. Taken together, their contributions encompass the wide range of interests and specializations within the field of Pāṇinian studies. and Probability New Age International The integrity of knowledge that emerges from research is based on individual and collective adherence to core values of objectivity, honesty, openness, fairness, accountability, and stewardship. Integrity in science means that the organizations in which research is conducted encourage those involved to exemplify these values in every step

of the research process. Understanding the dynamics that support " or distort " practices that uphold the integrity of research by all participants ensures that the research enterprise advances knowledge. The 1992 report *Responsible Science: Ensuring the Integrity of the Research Process* evaluated issues related to scientific responsibility and the conduct of research. It

provided a valuable service in describing and analyzing a very complicated set of issues, and has served as a crucial basis for thinking about research integrity for more than two decades. However, as experience has accumulated with various forms of research misconduct, detrimental research practices, and other forms of misconduct, as subsequent empirical

research has revealed more about the nature of scientific misconduct, and because technological and social changes have altered the environment in which science is conducted, it is clear that the framework established more than two decades ago needs to be updated. *Responsible Science* served as a valuable benchmark to set the context for this most recent analysis and

to help guide the committee's thought process. Fostering Integrity in Research identifies best practices in research and recommends practical options for discouraging and addressing research misconduct and detrimental research practices. *Combinations, Permutations, Probabilities* Remedia Publications
