Much of the common knowledge about standardized tests is simply wrong, and these misunderstandings have led to the distortion of the education of children and the judgments made about them. The Myths of Standardized Tests debunks these assumptions, proposing better ways to judge the success of our schools and offering readers suggestions for ways they can help reduce the burden of tests on their children.

Hanging Out and Hanging on: From the Projects to the Campus

chronicles the progress of students from Hartford and Manchester, Connecticut, who are enrolled in the Dual College Enrollment Program (DCEP) at Eastern Connecticut State University. "Hanging Out" sets the stage for describing the program by first reaching back in time to tell of Dr. Núñez's own beginnings in Puerto Rico and Newark, New Jersey, of her struggles as a non-English speaking elementary school student and her triumphs in high school and college. The next section of the book describes the lives of Latinos in Connecticut and the social, economic, and educational challenges they have faced over time. Her personal experiences and desire to improve the lives of the underprivileged led Dr. Núñez to create the DCEP Program. Through the words of faculty and staff and the personal accounts of six DCEP students, you will read stories of desperation and hope, of struggle and triumph, of heart-breaking failure and stunning success. We hope their story can serve as a model for other communities to follow.

"'Computerised Test Generation for Cross-National Military Recruitment' by Prof. Sidney H. Irvine is a handbook for use in occupational psychology, test construction and psychometrics. The book describes the development of the British Army Recruitment Battery (BARB) by Prof. Irvine and his colleagues at the University of Plymouth. BARB is a computer-administered selection battery that is still in use to this day and is capable of developing new parallel tests for every candidate in the

recruitment process. In telling the story, Sidney Irvine describes not only the development of the battery itself, funded by the UK Ministry of Defence, but all the work that went on before and afterwards, in the United Kingdom, with European allies and in the United States. _x000D_ Prof. Irvine argues that judicious application of the current state-of-the art in psychometric selection tests can be used to maximise retention and minimise attrition. As such, this long-awaited book will be of great interest to psychologists, psychometricians, test developers, those involved in personnel selection and all with an interest in military history, in particular the history of military science. With a foreword and chapter introductions from a worldwide array of subject matter experts, the book also has a full subject index and an extensive bibliography. I commend it heartily." — Professor Jamie Hacker Hughes CPsychol CSci FBPsS, Former Defence Consultant Advisor in Psychology, Ministry of Defence, United Kingdom.

State education departments and school districts face an important challenge in implementing a new law that requires

disadvantaged students to be held to the same standards as other students. The new requirements come from provisions of the 1994 reauthorization of Title I, the largest federal effort in precollegiate education, which provides aid to "level the field" for disadvantaged students. *Testing, Teaching, and Learning* is written to help states and school districts comply with the new law, offering guidance for designing and implementing assessment and accountability systems. This book examines standards-based education reform and reviews the research on student assessment, focusing on the needs of disadvantaged students covered by Title I. With examples of states and districts that have track records in new systems, the committee develops a practical "decision framework" for education officials. The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement. *Testing, Teaching, and Learning* will be an important tool for all involved in educating disadvantaged students—state and local administrators and classroom teachers.

The inspiring story of one of the greatest moments in civil rights history seen through the eyes of four young people at the center of the action. The 1963 Birmingham Children's March was a turning point in American history. In the streets of Birmingham, Alabama, the fight for civil rights lay in the hands of children like Audrey Hendricks, Wash Booker, James Stewart, and Arnetta Streeter. *We've Got a Job* tells the little-known story of the 4,000 black elementary, middle, and high school students who

voluntarily went to jail between May 2 and May 11, 1963. The children succeeded—where adults had failed—in desegregating one of the most racially violent cities in America. By combining in-depth, one-on-one interviews and extensive research, author Cynthia Levinson recreates the events of the Birmingham Children's March from a new and very personal perspective.

A unified, general theory of functional cognition is presented in this book. Its generality appears in the titles of the 13 chapters listed below. Its unity appears in the effectiveness of the same methods and concepts across all of these areas. Generality and unity both stem from the foundation axiom of purposiveness. The axiom of purposiveness has been made effective through capability for functional measurement of values, which embody the goal-directed character of purposiveness. This measurement capability is based on the general cognitive algebra established in information integration theory. Functional theory can thus be made precise and effective near the level of everyday phenomenology. The book is written at a relatively simple level, directed at readers in every field of psychology. Among its characteristics are: * self-sufficient theory near the level of everyday phenomenology; * foundation on structure of the internal world; and * solid grounding in experimental analysis.

An Economic Bill of Rights to Eliminate Poverty Test Prep Books

Poverty and inequality are at record levels. Today, forty-seven million Americans live in poverty, while the median is in decline. The top 20 percent now controls 89 percent of all wealth. These conditions have renewed demands for a new economic Bill of Rights, an idea proposed by F. D. Roosevelt, Truman and Martin Luther King, Jr. The new Economic Bill of Rights has a coherent plan and proclaims that all Americans have the right to a job, a living wage, a decent home, adequate medical care, good education, and adequate protection from economic fears of unemployment, sickness and old age. Integrating the latest economic and social data, *Ending Extreme Inequality* explores each of these rights. Each chapter includes: an analysis of the social problems surrounding each right; a historical overview of the attempts to right these wrongs; and assessments of current solutions offered by citizens, community groups and politicians. These contemporary, real-life solutions to inequality can inspire students and citizens to become involved and open pathways toward a more just society.

From the New York Times bestselling author of *Deacon King Kong* and *The Good Lord Bird*, winner of the National Book Award for Fiction: The modern classic that Oprah.com calls one of the best memoirs of a generation and that launched James McBride's

literary career. More than two years on The New York Times bestseller list. Who is Ruth McBride Jordan? A self-declared "light-skinned" woman evasive about her ethnicity, yet steadfast in her love for her twelve black children. James McBride, journalist, musician, and son, explores his mother's past, as well as his own upbringing and heritage, in a poignant and powerful debut, *The Color Of Water: A Black Man's Tribute to His White Mother*. The son of a black minister and a woman who would not admit she was white, James McBride grew up in "orchestrated chaos" with his eleven siblings in the poor, all-black projects of Red Hook, Brooklyn. "Mommy," a fiercely protective woman with "dark eyes full of pep and fire," herded her brood to Manhattan's free cultural events, sent them off on buses to the best (and mainly Jewish) schools, demanded good grades, and commanded respect. As a young man, McBride saw his mother as a source of embarrassment, worry, and confusion—and reached thirty before he began to discover the truth about her early life and long-buried pain. In *The Color of Water*, McBride retraces his mother's footsteps and, through her searing and spirited voice, recreates her remarkable story. The daughter of a failed itinerant Orthodox rabbi, she was born Rachel Shilsky (actually Ruchel Dwara Zylska) in Poland on April 1, 1921. Fleeing pogroms, her family emigrated to America and ultimately settled in Suffolk, Virginia, a small town where anti-Semitism and racial tensions ran high. With candor and immediacy, Ruth describes her parents' loveless marriage; her fragile, handicapped mother; her cruel, sexually-abusive father; and the rest of the family and life she abandoned. At seventeen, after fleeing Virginia and settling in New York City, Ruth married a black minister and founded the all-black New

Brown Memorial Baptist Church in her Red Hook living room. "God is the color of water," Ruth McBride taught her children, firmly convinced that life's blessings and life's values transcend race. Twice widowed, and continually confronting overwhelming adversity and racism, Ruth's determination, drive and discipline saw her dozen children through college—and most through graduate school. At age 65, she herself received a degree in social work from Temple University. Interspersed throughout his mother's compelling narrative, McBride shares candid recollections of his own experiences as a mixed-race child of poverty, his flirtations with drugs and violence, and his eventual self-realization and professional success. *The Color of Water* touches readers of all colors as a vivid portrait of growing up, a haunting meditation on race and identity, and a lyrical valentine to a mother from her son. This book was recently reprinted with a new cover. You may receive one of the two covers shown.
