Argues that President Barack Obama is a dangerous radical who wants not only big government, but the Europeanization of the United States, and explains how citizens can roll back the liberal establishment and return to fundamental American values.

From the author of *Bowling Alone* and *Our Kids*, a "sweeping yet remarkably accessible" (The Wall Street Journal) analysis that "offers superb, often counterintuitive insights" (The New York Times) to demonstrate how we have gone from an individualistic "I" society to a more communitarian "We" society and then back again, and how we can learn from that experience to become a stronger, more unified nation. Deep and accelerating inequality; unprecedented political polarization; vitriolic public discourse; a fraying social fabric; public and private narcissism—Americans today seem to agree on only one thing: This is the worst of times. But we've been here before. During the Gilded Age of the late 1800s, America was highly individualistic, starkly unequal, fiercely polarized, and deeply fragmented, just as it is today. However as the twentieth century opened, America became—slowly, unevenly, but steadily—more egalitarian, more cooperative, more generous; a society on the upswing, more focused on our responsibilities to one another and less focused on our narrower self-interest. Sometime during the 1960s, however, these trends reversed, leaving us in today's disarray. In a sweeping overview of more than a century of history, drawing on his inimitable combination of statistical analysis and storytelling, Robert Putnam analyzes a remarkable confluence of trends that brought us from an "I" society to a "We" society and then back again. He draws inspiring lessons for our time from an earlier era, when a dedicated group of reformers righted the ship, putting us on a path to becoming a society once again based on community. Engaging, revelatory, and timely, this is Putnam's most ambitious work yet, a fitting capstone to a brilliant career.

NEW YORK TIMES BESTSELLER • "Comprehensive, enlightening, and terrifyingly timely."—The New York Times Book Review (Editors' Choice) WINNER OF THE GOLDSMITH BOOK PRIZE • SHORTLISTED FOR THE LIONEL GELBER PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Time • Foreign Affairs • WBUR • Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking: Is our democracy in danger? Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die* "What we desperately need is a sober, dispassionate look at the current state of affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that."—The Washington Post "Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of American democracy and politics."—Ezra Klein, Vox "If you only read one book for the rest of the year, read *How Democracies Die*. . . . This is not a book for just Democrats or Republicans. It is a book for all Americans. It is nonpartisan. It is fact based. It is deeply rooted in history. . . . The best commentary on our politics, no contest."—Michael Morrell, former Acting Director of the Central Intelligence Agency (via Twitter) "A smart and deeply informed book about the ways in which democracy is being undermined in dozens of countries around the world, and in ways that are perfectly legal."—Fareed Zakaria, CNN

This book maps three waves of nativist populism in the post-war era, emerging into contemporary Neo-Nationalism. The first wave rose in the wake of the Oil Crisis in 1972. The second was ignited by the Collapse of Communism in 1989, spiking with the 9/11 terrorist attacks. The third began to emerge after the Financial Crisis of 2008, soaring with the Refugee Crisis of 2015. Whether the

Coronavirus Crisis of 2020 will lead to the rise of a fourth wave remains to be seen. The book traces a move away from liberal democracy and towards renewed authoritative tendencies on both sides of the Atlantic. It follows the mainstreaming of formerly discredited and marginalized politics, gradually becoming a new normal. By identifying common qualities of Neo-Nationalism, the book frames a threefold claim of nativist populists in protecting the people: discursively creating an external threat, pointing to domestic traitors, and positioning themselves as the true defenders of the nation.

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Part history, part political analysis, and part memoir, Mexifornia is an intensely personal work by one of our most important writers. Victor Davis Hanson, known for his military histories and his social commentary, is a fifth-generation Californian who lives on a family farm in the Central Valley and has written eloquent elegies on the decline of agrarianism, *Fields Without Dreams* and *The Land Was Everything*. Here too, he ponders what has changed in California over the past quarter century, examining how the state and the Southwest more broadly—indeed, the entire nation—have been altered by hemorrhaging borders. Hanson admires the ambition and vigor of immigrants who have helped make California strong, but he indicts the disordered immigration policies that led to the present mess. He also illuminates the ways those policies are harmful to people who have come from Mexico and Central America seeking a better life in the United States. Nearly twenty years after the first publication of *Mexifornia*, Hanson offers an update on the continuing tragedy of illegal immigration. At the same time, he remains hopeful that our traditions of integration, assimilation, and intermarriage may yet remedy a predicament created by politicians and ideologues.

**The Right and Radical Right in the Americas** Simon and Schuster

Canada In Decay is the first scholarly book questioning the undemocratic policy of mass immigration and racial diversification in Canada. The entire Canadian political establishment, the mainstream media and the academics, are all in harmonious unison with the banks and corporations, in promoting two myths to justify mass immigration. The first myth this book demolishes is the claim that immigration into Canada "enriches the country", by demonstrating that mass immigration is not only leading to Euro-Canadians becoming a small minority in their own homeland, but because of the disparity in the birth-rate, the Euro-Canadian population is likely to become almost extinct. The second myth this book demolishes is the regularly repeated claim that Canada is a "nation of immigrants" by demonstrating that Canada was founded by Indigenous Quebecois, Acadians, and English speakers. This book also exposes the rewriting of Canada's history in the media, schools, and universities, as an attempt to rob Euro-Canadians of their own history by inventing a past that conforms to the ideological goals of a future multiracial and multicultural Canada. Canada In Decay explains the origins of the ideology of immigrant multiculturalism and the inbuilt radicalizing nature of this ideology, and argues that the "theory of multicultural citizenship" is marred by a double standard which encourages minorities to affirm their collective cultural rights while Euro-Canadians are excluded from affirming theirs. "Canada In Decay is a bold, compelling, and often devastating deconstruction of the Left-Liberal narrative which has dominated Canadian politics since the 1970s. It is bound to put on the defensive both the politically correct Left and the globalist Right not just in Canada but across the entire western world." -- Grant Havers, author of *Leo Strauss and Anglo-American Democracy: A Conservative Critique*.

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

At this pivotal moment in recent Western history, Richard Duchesne tackles what may be the most crucial question for people of European descent: 'What makes us unique?' Casting aside the dominant cultural Marxist narratives and dismissing the popular media attacks on concepts of 'whiteness', Duchesne draws on a range of historical examples, sources and philosophies to examine the origins of European man, his achievements, and the nature of the Faustian spirit that has driven his innovation and creativity. In an age of multiculturalism and globalism one might ask the question 'Whither Western Man?' *Faustian Man in a Multicultural Age* digs deeply in our origins and development to try and point the reader towards the answer.

Historically Canadians have considered themselves to be more or less free of racial prejudice. Although this conception has been challenged in recent years, it has not been completely dispelled. In *Colour-Coded*, Constance Backhouse illustrates the tenacious hold that white supremacy had on our legal system in the first half of this century, and underscores the damaging legacy of inequality that continues today. Backhouse presents detailed narratives of six court cases, each giving evidence of blatant racism created and enforced through law. The cases focus on Aboriginal, Inuit, Chinese-Canadian, and African-Canadian individuals, taking us from the criminal prosecution of traditional Aboriginal dance to the trial of members of the 'Ku Klux Klan of Kanada.' From thousands of possibilities, Backhouse has selected studies that constitute central moments in the legal history of race in Canada. Her selection also considers a wide range of legal forums, including administrative rulings by municipal councils, criminal trials before police magistrates, and criminal and civil cases heard by the highest courts in the provinces and by the Supreme Court of Canada. The extensive and detailed documentation presented here leaves no doubt that the Canadian legal system played a dominant role in creating and preserving racial discrimination. A central message of this book is that racism is deeply embedded in Canadian history despite Canada's reputation as a raceless society. *International Deficit Thinking: Educational Thought and Practice* explores the incontrovertible reality of the persistent and pervasive academic achievement gap in many countries between marginalized students (primarily of color) and their economically advantaged White counterparts. For example, *International Deficit Thinking* discusses the cases of low-socioeconomic Black and Mexican American students in the United States, Indigenous Māori students in New Zealand, and immigrant Moroccan and Turkish pupils in Belgium. The predominant theoretical perspective that has been advanced to

explain the school failure of marginalized students is the deficit thinking paradigm—a parsimonious, endogenous, and pseudoscientific model that blames such students as the makers of their own school failure. Deficit thinking asserts that the low academic achievement of many marginalized students is due to their limited intellectual ability, poor academic achievement motivation, and being raised in dysfunctional families and cultures. Drawing from, in part, critical race theory, systemic inequality analysis, and colonialism/postcolonialism, award-winning author and scholar Richard R. Valencia examines deficit thinking in education in 16 countries (e.g., Canada; Peru, Australia; England; India; South Africa). He seeks to (a) document and debunk deficit thinking as an interpretation for school failure of marginalized students; (b) offer scientifically defensible counternarratives for race-, class-, language-, and gender-based differences in academic achievement; (c) provide suggestions for workable and sustainable school reform for marginalized students.

*The Strange Death of Europe* is the internationally bestselling account of a continent and a culture caught in the act of suicide, now updated with new material taking in developments since it was first published to huge acclaim. These include rapid changes in the dynamics of global politics, world leadership and terror attacks across Europe. Douglas Murray travels across Europe to examine first-hand how mass immigration, cultivated self-distrust and delusion have contributed to a continent in the grips of its own demise. From the shores of Lampedusa to migrant camps in Greece, from Cologne to London, he looks critically at the factors that have come together to make Europeans unable to argue for themselves and incapable of resisting their alteration as a society. Murray's "tremendous and shattering" book (*The Times*) addresses the disappointing failures of multiculturalism, Angela Merkel's U-turn on migration, the lack of repatriation and the Western fixation on guilt, uncovering the malaise at the very heart of the European culture. His conclusion is bleak, but the predictions not irrevocable. As Murray argues, this may be our last chance to change the outcome, before it's too late.

The dramatic real life stories of four young people caught up in the mass exodus of Shanghai in the wake of China's 1949 Communist revolution—a heartrending precursor to the struggles faced by emigrants today. "A true page-turner . . . [Helen] Zia has proven once again that history is something that happens to real people."—New York Times bestselling author Lisa See NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR AND THE CHRISTIAN SCIENCE MONITOR • FINALIST FOR THE PEN/JACQUELINE BOGRAD WELD AWARD FOR BIOGRAPHY Shanghai has historically been China's jewel, its richest, most modern and westernized city. The bustling metropolis was home to sophisticated intellectuals, entrepreneurs, and a thriving middle class when Mao's proletarian revolution emerged victorious from the long civil war. Terrified of the horrors the Communists would wreak upon their lives, citizens of Shanghai who could afford to fled in every direction. Seventy years later, members of the last generation to fully recall this massive exodus have revealed their stories to Chinese American journalist Helen Zia, who interviewed hundreds of exiles about their journey through one of the most tumultuous events of the twentieth century. From these moving accounts, Zia weaves together the stories of four young Shanghai residents who wrestled with the

decision to abandon everything for an uncertain life as refugees in Hong Kong, Taiwan, and the United States. Benny, who as a teenager became the unwilling heir to his father's dark wartime legacy, must decide either to escape to Hong Kong or navigate the intricacies of a newly Communist China. The resolute Annuo, forced to flee her home with her father, a defeated Nationalist official, becomes an unwelcome exile in Taiwan. The financially strapped Ho fights deportation from the U.S. in order to continue his studies while his family struggles at home. And Bing, given away by her poor parents, faces the prospect of a new life among strangers in America. The lives of these men and women are marvelously portrayed, revealing the dignity and triumph of personal survival. Herself the daughter of immigrants from China, Zia is uniquely equipped to explain how crises like the Shanghai transition affect children and their families, students and their futures, and, ultimately, the way we see ourselves and those around us. *Last Boat Out of Shanghai* brings a poignant personal angle to the experiences of refugees then and, by extension, today. "Zia's portraits are compassionate and heartbreaking, and they are, ultimately, the universal story of many families who leave their homeland as refugees and find less-than-welcoming circumstances on the other side."—Amy Tan, author of *The Joy Luck Club*

In this 2013 book (now reissued for the first time) bestselling author and broadcaster Douglas Murray, with trademark wit, delivers an alarming analysis of the post-9/11 world. It is a devastating satire on the climate of fear in the West today. Murray's analysis is wildly entertaining yet ultimately profound: "If absolutely everybody in the world agrees on something - from the President of the United States to most film-stars, pop-stars, Popes, Bishops, atheists, writers, film-makers, brain-boxes and everyone else - then surely they must be right. Well, no. I think they are wrong. Wildly, terribly, embarrassingly and dangerously wrong, " writes Murray. ISLAMOPHILIA shows how so many

of the celebrities above, have, at some point chosen to abandon any hope or wish to criticize Islam and instead decided to profess some degree of love for it. Love, that Murray points out in the book, is often irrational and certainly misguided: Murray is not afraid to name and shame, and the book's tour includes Sebastian Faulks and Martin Amis, Boris Johnson, South Park, Tony Blair, Ridley Scott, David Cameron, Liam Neeson, Justin Bieber, Random House Publishers, the BBC, Richard Dawkins, the Prince of Wales and even George Bush. Yes, George Bush. "They may have done this for a range of good and bad reasons. Some of them have to done it to save other people. Some of them have done it to save themselves. Some of them have done it because they are too stupid to do anything else and others because clever people can be really dumb at times." Murray goes on to detail the extraordinary strategic cultural efforts made in recent years to "rewrite the last few millennia of history, minimising and denigrating the impact of actual scientists and promoting the claims of Islamic proselytisers". And he has fighting words for the version of history depicted by Ridley Scott and others in Hollywood. Artists and writers have been caught off-guard, he alleges, "Having poked at empty hornets nests for so many years they have forgotten the courage required to do the necessary poking at full ones." He concludes, "Let's be clear. For the record I don't think everybody needs to spend their time being offensive about Islam. Not only is there no need to be offensive all the time, but most Muslims just want to get on with their lives as peacefully and successfully as everybody else. But there is an un-evenness in our societies that needs to be righted...to think that the answer to any criticism of Islam or Muslims is a delegitimizing of critics and an indulgence in self-pity is not to make an advance. It is to pave the way for self-harm. For all of us. Where people are telling lies we should not be fearful to correct them. And where people are fearful - and genuine reasons to be so do keep coming along - people should remind themselves of something. Which is that just as bravery in one person instils bravery in others, so cowardice in one person has a tendency to be catching."
