Since the 1960s, the Native peoples of northeastern Canada, both Inuit and Innu, have experienced epidemics of substance abuse, domestic violence, and youth suicide. Seeking to understand these transformations in the capacities of Native communities to resist cultural, economic, and political domination, Gerald M. Sider offers an ethnographic analysis of aboriginal Canadians'

changing experiences of historical violence. He relates acts of communal self-destruction to colonial and postcolonial policies and practices, as well as to the end of the fur and sealskin trades. Autonomy and dignity within Native communities have eroded as individuals have been deprived of their livelihoods and treated by the state and corporations as if they were disposable. Yet Native peoples' possession of valuable resources provides them with some income and power to

negotiate with state and business interests. Sider's assessment of the health of Native communities in the Canadian province of Labrador is filled with potentially useful findings for Native peoples there and elsewhere. While harrowing, his account also suggests hope, which he finds in the expressiveness and power of Native peoples to struggle for a better tomorrow within and against domination.

American Synagogues is the first book to explore the exceptional architecture of modern American synagogues in the twentieth century, and this intriguing book relates the fascinating history of the Jewish people in America and how it is expressed in twentieth-century synagogue design. The book features all new photography of synagogues in many styles from a dozen states, many never before published in any form. The synagogues were

designed by European masters, the best-known modern American architects, and by important contemporary architects including Frank Lloyd Wright, Philip Johnson, and Minoru Yamasaki.

In an effort to challenge the ways in which colonial power relations and Eurocentric knowledges are reproduced in participatory research, this book explores whether and how it is

possible to use arts-based methods for creating more horizontal and democratic research practices. In discussing both the transformative potential and limitations of arts-based methods, the book asks: What can arts-based methods contribute to decolonising participatory research and its processes and practices? The book takes part in ongoing debates related to the need to decolonise research, and investigates practical contributions of arts-based methods in the

practice-led research domain. Further, it discusses the role of artistic research in depth, locating it in a decolonising context. The book will be of interest to scholars working in art history, design, fine arts, service design, social sciences and development studies. [Environmental Policy in the European Union](#) Springer
Why are students today not learning biology, appreciating its importance in their lives, or pursuing it as a career?

Experts believe dismal learning experiences in biology classes are causing the vast majority of students to miss information that could help them lead healthier lives and make more intelligent decisions as adults. How can we improve the teaching of biology throughout the school curriculum? *Fulfilling the Promise* offers a vision of what biology education in our schools could be--along with practical, hard-hitting recommendations on how to make that vision a

reality. Noting that many of their recommended changes will be controversial, the authors explore in detail the major questions that must be answered to bring biology education to an acceptable standard: how elementary, middle, and high-school biology education arrived at its present state; what impediments stand in the way of improving biology education; how to properly prepare biology teachers and encourage their continuing good performance; and what

type of leadership is needed to improve biology education. *Fulfilling the Promise*
David Lee
This book addresses customized laser vision correction, an integral management option for the treatment of irregular corneas. This type of treatment reshapes the corneal surface in order to improve both the quality and the quantity of vision by reducing high order aberrations. Beginning with an introduction to the basics of this science, each type of customized

laser vision correction is discussed in a clear and didactic format for rapid attainment of information. Throughout this practical clinical guide, examples are supported with the most recent scientific material and a step-by-step systematic methodology is included to fit all levels of ophthalmologists.

Coffeeshops are the most famous example of Dutch tolerance. But in fact, these cannabis distributors are highly regulated. Coffeeshops are permitted to break the law, but not the rules. On the premises, there cannot be minors, hard drugs or more than 500 grams. Nor can a coffeeshop advertise, cause nuisance or sell over five grams to a person in a day. These rules are enforced by surprise police checks, with violation punishable by closure. In Grey Area,

Scott Jacques examines the regulations with a huge stash of data, which he collected during two years of fieldwork in Amsterdam. How do coffeeshop owners and staff obey the rules? How are the rules broken? Why so? To what effect? The stories and statistics show that order in the midst of smoke is key to Dutch drug policy, vaporising the idea that prohibition is better than regulation. Grey Area is a timely contribution in light of the blazing reform to cannabis policy

worldwide. Praise for Grey Area 'This book is original and highly topical. Logical and well structured, the discussion is firmly located in a large body of contemporary theory. The writing style is conversational, open and accessible. The quality, amount and depth of the empirical work that Jacques has undertaken made me feel that I was there, visiting the coffeeshops with him. Rarely have I seen something as careful and detailed as this work.'

Ronald V. Clarke, Rutgers

University, USA 'This book examines the intricacies of operating between law and rules in Amsterdam coffeeshops. Based on an extensive fieldwork, it is arguably the most comprehensive criminological analysis of the issue to date. This is an important work, from an excellent writer, that I warmly recommend to both students and researchers.'

This is an accessible but

sophisticated introduction to, and analysis of, the increasingly important role of the European Union in environmental policy. The book ranges widely over the emergence and evolution of the EU role in this critical field of policy, the relationship between policies made at the EU and member state levels, and the nature of the environmental policy process. The book ends with in-depth studies of EU activities in key policy areas--from air quality and waste management

to global warming--and sums up the successes and failures of EU policy to date.

Paula Lillard, director of a Montessori school ranging in age from 18 months to fifteen years, provides a clear and cogent

introduction to the Montessori program for the elementary and later years. In detailed accounts, Lillard shows how children acquire the skills to answer their own questions, learn to manage freedom with responsibility, and maintain a high level of intellectual stimulation by using the Montessori method. This is an essential handbook for parents and teachers who have chosen the Montessori alternative for the older child.

Learning to Write/Writing to Learn provides a basic guide to writing as a way

of learning, drawing the reader into an expanded notion of what writing is and how it is created. As you read the chapters, the ideas seem at first only a synthesis of masters like Elbow, Emig, Murray, Graves, Britton, and Moffett. But upon closer look, there is more to the book than a litany of already published ideas. Mayher, Lester, and Pradl use their own means of organization to extend the dialogue to present concerns. The book is like a long description of what a good writing class,

writing group, or writing institute can be.

Schocken

'This is the kind of book that troubles grey-suited committees of academic peers. It's too enjoyable. But that, given its subject, is just what it ought to be, and it treats that subject seriously . . . There isn't a "dull" page anywhere in the book.' – Professor Peter Thomson, *Studies in Theatre and Performance*
Comedy is changing: stand-up comedians routinely sell out stadia, their audience-figures

swollen by panel-show appearances and much-followed Twitter feeds. Meanwhile, the smaller clubs are filling up, with audiences as well as aspirants. How can we make sense of it all? This new edition of *Getting the Joke* gives an insider's look at the spectrum of modern comedy, re-examining the world of stand-up in the internet age. Drawing on his acclaimed first edition, Oliver Double focuses in greater detail on the US scene and its comedians (such as David Cross,

Sarah Silverman, Louis CK, Demetri Martin and Margaret Cho); the 'DIY' comedy circuit and its celebrated apostles and visionaries, from Josie Long to Stewart Lee; the growing importance of the solo stand-up show; the role played by Twitter (including an interview with the organiser of the world's first comedy gig on Twitter), and the driving force that is the TV guest slot, be it on Mock the Week or Live at the Apollo. With expanded sections on joke construction, as well as

ways to challenge the audience, and a host of new and updated exercises to guide the aspiring comedian, this new edition of *Getting the Joke* is the only book to combine the history of stand-up comedy with an analysis of the elements and methods that go into its creation. Featuring a range of interviews with working comedians - from circuit veterans to new kids on the block - combined with the author's vast experience, this is a must read for any aspiring stand-up

comedian.

Tools for Teaching Health
Cambridge University Press

This book focuses upon the hunting of seals and whales in the North Atlantic region, and how the activities of urban-based environmentalism has prompted responses from diverse northern peoples associated with self-determination, human rights, and sustainable development. However, the relevance of an expanding environmentalism implicitly challenges the

interests and very survival of local peoples and their distinctive cultures. An historical analysis of these hunting societies reveals that although often understood as traditional and marginal, they are modern, dynamic, and pro-active. The authors argue that their 'indigenoussness' is more usefully understood in terms of power relations within the international community. In examining the discourses in both camps, the authors find

that despite the polarized and opposed positions each side takes, common ground still exists. Emerging Markets from a Multidisciplinary Perspective Penguin Every woman needs a little jump start in life. Donna Partow knows how to make it happen. In Becoming the Woman God Wants Me to Be, author Donna Partow shows women how to reenergize their lives in 90 days. She covers

everything from faith and family to fitness and fashion (with lots more) in this comprehensive plan for greater vitality in life and intimacy with God. This in-depth study of Proverbs 31:10-31 will make women feel in control and on top of things as they study and even memorize that famous passage about the ideal woman of God. This positive, life-affirming book includes a leader's guide, making it perfect for small group use.
