Beccaria's influential  
Treatise On Crimes and  
Punishments is  
considered a foundation  
work in the modern field  
of criminology. As  
Newman and Marongiu  
note in their introduction  
to the work, three master  
themes of the  
Enlightenment run  
through the Treatise: the  
idea of the social contract,  
the idea of science, and  
the belief in progress. The  
idea of the social contact  
forms the moral and  
political basis of the  
work's reformist zeal. Th e

idea of science supports a  
dispassionate and  
reasoned appeal for  
reforms. The belief in  
progress is inextricably  
bound to the idea of  
science. All three provide  
the necessary foundation  
for accepting Beccaria's  
proposals. It is virtually  
impossible to ascertain  
which of several versions  
of the Treatise that  
appeared during his  
lifetime best reflected  
Beccaria's own thought.  
His use of many ideas of  
Enlightenment thinkers  
also makes it diffi cult to  
interpret what he has

written. While  
Enlightenment thinkers  
wanted to break the  
chains of religion and  
advocated free men and  
free minds, there was  
considerable  
disagreement as to how  
this might be achieved,  
except in the most  
general terms. The editors  
have based this  
translation on the  
Francioni (1984) text, by  
far the most exhaustive  
critical Italian edition of  
Dei delitti e delle pene.  
This edition is  
undoubtedly the last that  
Beccaria personally

oversaw and revised. This new translation, which includes an outstanding opening essay by the editors, is a welcome introduction to Beccaria and to the modern beginnings of criminology. Who Gets Detained? Peter Lang

The U.S. government's power to categorize individuals as terrorist suspects and therefore ineligible for certain long-standing constitutional protections has expanded exponentially since 9/11, all the while remaining resistant to oversight. *Crimes of Terror: The Legal and Political Implications of Federal Terrorism Prosecutions* provides a comprehensive

and uniquely up-to-date dissection of the government's advantages over suspects in criminal prosecutions of terrorism, which are driven by a preventive mindset that purports to stop plots before they can come to fruition. It establishes the background for these controversial policies and practices and then demonstrates how they have impeded the normal goals of criminal prosecution, even in light of a competing military tribunal model. Proceeding in a linear

manner from the investigatory stage of a prosecution on through to sentencing, the book documents the emergence of a "terrorist exceptionalism" to normal rules of criminal law and procedure and questions whether the government has overstated the threat posed by the individuals it charges with these crimes. Included is a discussion of the large-scale spying and use of informants rooted in the questionable "radicalization" theory; the material support

statute--the government's chief legal tool in bringing criminal prosecutions; the new rules regarding generation of evidence and the broad construction of that evidence as relevant at trial; and a look at the special sentencing and confinement regimes for those convicted of terrorist crimes. In this critical examination of terrorism prosecutions in federal court, Professor Said reveals a phenomenon at odds with basic constitutional protections for criminal

defendants.  
Code of Virginia Rowman & Littlefield  
Law changes as new developments affect society. The dawn of a new century provides a marking point for the evaluation of trends in law and policy. This book examines emerging issues that will shape society's rules and legal processes in the twenty-first century. By identifying developments affecting technology, demography, and politics, the authors evaluate impacts on law and criminal justice. Many

of the issues discussed, including the expanding Latino population, new technologies for investigations, weapons, and executions, health crises in prisons, DNA testing, and the «war on terrorism», will have profound effects on the fates of individuals drawn into the justice system.  
*Briefs of Leading Cases in Corrections* UTET Giuridica  
This exploration of penal censure is inspired by the 40th anniversary of the publication of Andreas von Hirsch's *Doing Justice*,

which opened up a fresh set of issues in theorisation about punishment that eventually led von Hirsch to ground his proposed model of desert-based sentencing on the notion of penal censure. Von Hirsch's work thus provides an obvious starting-point for an exploration of the importance of censure for the justification of punishment, both within his theory of just deserts and from the perspectives of other theoretical approaches. It also

provides an opportunity for engaging with censure more broadly from philosophical, sociological-anthropological and individual-psychological perspectives. The essays in this collection map the conceptual territory of censure from these different perspectives, address issues for desert theory that arise from fuller understandings of censure, and consider afresh the role of censure within the jurisprudence of punishment. They show that analyses of censure

from different vantage points can significantly enrich punishment theory, not least by providing a conceptual basis for perceiving common ground between and thus connecting different strands of penal theory. *E drejta penale (pjesa e posaçme)* Routledge This contemporary, comprehensive, case-driven textbook from award-winning professor Matthew Lippman combines clear explanations of foundational concepts with thought-provoking

On September 11, 1857, a group of Mormons aided by Paiute Indians brutally murdered some 120 men, women, and children traveling through a

remote region of southwestern Utah. Within weeks, news of the atrocity spread across the United States. But it took until 1874—seventeen years later—before a grand jury finally issued indictments against nine of the perpetrators. Mountain Meadows Massacre chronicles the prolonged legal battle to gain justice for the victims. The editors of this two-volume collection of documents have combed public and private manuscript collections from across the United

States to reconstruct the complex legal proceedings that occurred in the massacre’s aftermath. This exhaustively researched compilation covers a nearly forty-year history of investigation and prosecution—from the first reports of the massacre to the dismissal of the last indictment in 1896. Of special importance in Volume 2 are the transcripts of legal proceedings against John D. Lee—many of which the editors have transcribed anew from the

shorthand. The two trials against Lee led to his confession, conviction, and ultimately his execution on the massacre site in 1877, all documented in this volume. Historians have long debated the circumstances surrounding the Mountain Meadows Massacre, one of the most disturbing and controversial events in American history, and painful questions linger to this day. This invaluable, exhaustively researched collection allows readers the opportunity to form

their own conclusions about the forces behind this dark moment in western U.S. history. **Mountain Meadows Massacre** DIANE Publishing Prisoners' Self-Help Litigation Manual, in its much-anticipated fourth edition, is an indispensable guide for prisoners and prisoner advocates seeking to understand the rights guaranteed to prisoners by law and how to protect those rights.
