Synopsis:Que feriez-vous si un beau matin, vous appreniez que votre nom n'est pas celui que vous portez, que vous êtes en fait une puissante enchantresse la tête d'un riche et respecté clan de sorciers, que votre pire cauchemar se réalise sous vos yeux et qu'une simple bête vue fasse faire apparaître le mage Merlin et le roi Arthur en notre siècle ? Alors, bienvenue dans le fantastique monde d'Etna qui vous ensorcèlera de la première à la dernière page ! Voici la grande série ETNA, ou comment une simple mortelle peut avoir accès au monde des dieux. Critique du style inhabituel de l'auteur qu'on aime Alex Tremm, reconnu pour sa plume dite "exotique" et/ou "cinématographique", tant aussi scénariste, il allie avec humour les genres fantastique, fantasy, romance, paranormal et suspense policier. Tout cela est nécessaire pour raconter la vie tourmentée, les amours et les nombreuses aventures de la nouvelle Héritière de Morgana, la puissante enchantresse qui a surtout gaffé en ramenant Merlin et Arthur en notre siècle, avant son couronnement, allant ainsi la légende arthurienne au complet. De plus, des tomes de cet auteur sont déjà traduits en anglais, espagnol, portugais et italien. (Note => La série Etna est la traduction de la série Lolith complètement réécrite pour l'anglais.) Commentaires de critiques littéraires: Babydragonbooks: J'ai beaucoup ri et me suis bien amusé ! Ce premier tome a le mérite d'être vraiment drôle et de savoir l'être au bon moment. Verdict : un livre super, qui m'a fait passer des moments de lecture très agréables ! Je suis passé par le rire, l'étonnement, la curiosité, la peur... Les intrigues qui se mêlent promettent d'en faire une grande série selon moi et j'ai hâte de m'attaquer au prochain tome... Ça promet, car c'est un vrai gros COUP DE COEUR ! Mordus de lecture : C'est un livre extrêmement simple à lire, rapide, prenant et attachant. Le mélange de notre monde avec la légende du roi Arthur, et de tous ses personnages (Arthur, Merlin, Guenièvre, Viviane, Morgane...) est vraiment très recherché ! Je le recommande vraiment car c'est une découverte extraordinaire qui m'a vite conquise !!! Geekbygirls : Dès le premier chapitre, on sait déjà d'avance que nous allons acheter toute la série ! Je me suis très vite attaché à notre enchantresse et je n'ai pas réussi à me détacher de ma lecture ! Alex Tremm est un écrivain qu'on aime (oui, certaines expressions nous font rire, mais fait aussi le charme du livre) qui nous fait rentrer directement dans l'histoire et manie avec grand art les mots. Pour résumer, j'ai adoré ce premier tome ainsi que les suivants puisque je suis déjà en train de finir le Tome 3 de cette saga qui nous découvre de l'intérieur ! Livretoile : Le style d'Alex Tremm est vraiment agréable à lire. Il évite aux maximums toutes les descriptions inutiles et laisse notre imagination travailler. Le gros point positif du livre est le fait que l'on découvre le monde magique en même temps qu'elle. On comprend rapidement qu'elle est invisible et que chaque situation peut finir différemment. L'intrigue est importante, car on se demande jusqu'où ses pouvoirs vont croître. Elle surprend tout le monde, même Merlin, à chaque fois qu'elle s'en sert. Conclusion : Un livre plein de magie où chaque personnage est bien travaillé et fort différent. Je le recommande à toutes les personnes qui apprécient le fantastique. *Body and Gender, Soul and Reason in Late Antiquity* Oxford University Press

This anthropological study offers a crucial contribution to scholarly debates about the making of African modernity by considering the implementation and reception of gender reform in the West African context. Historically, attempts at implementing gender reform in West Africa have been met with suspicion. Beyond the perception that such reforms subvert traditional structures of authority and community, many worry that these efforts are inextricably connected to Western imperialism and colonialism. Ludovic Lado's *The Politics of Gender Reform in West Africa* examines the politics of a legislative process entirely driven by the state and meant to narrow the gender gap in Ivorian society. Lado discusses the legislative processes by which states have sought to reduce the gender gap between men and women, probes the potential impact of this reform on the condition of women by exploring the practice of civil marriage in Abidjan, and assesses the reception of the reform among Catholics and Muslims in Côte d'Ivoire. Throughout this readable and engaging study, Lado examines how the relationship between secular powers and religious authorities has determined the direction gender reforms have taken. Although the predominant focus in this text remains on gender reforms in Côte d'Ivoire, Lado also discusses their correlates in Niger, Senegal, and Mali. He shows that the success or failure of gender reforms in West Africa has relied on the interaction of various power relationships that structure the international, national, local, religious, and domestic arenas within which West Africans go about their lives. The book concludes with an informed reflection on the relationship among religions, the state, and gender reforms that highlights some of the issues at stake in the domestication of hegemonic modernity in Africa.

*Gender as a Political Instrument Forming New Boundaries by Ethnic and Religious Diasporas in European Union* Palgrave Macmillan

This book is about the social condition of Deaf people, told through a Deaf woman's autobiography and a series of essays investigating how hearing societies relate to Deaf people. Michel Foucault described the powerful one as the beholder who is not seen. This is why a Deaf woman's perspective is important: Minorities that we don't even suspect we have power over observe us in turn. Majorities exert power over minorities by influencing the environment and institutions that simplify or

hinder lives: language, mindsets, representations, norms, the use of professional power. Based on data collected by Eurostat, this volume provides the first discussion of statistics on the condition of Deaf people in a series of European countries, concerning education, labor, gender. This creates a new opportunity to discuss inequalities on the basis of data. The case studies in this volume reconstruct untold moments of great advancement in Deaf history, successful didactics supporting bilingualism, the reasons why Deaf empowerment for and by Deaf people does and does not succeed. A work of empowerment is effective if it acts on a double level: the community to be empowered and society at large, resulting in a transformation of society as a whole. This book provides instruments to work towards such a transformation.

Love is a key ingredient in the stereotypical fairy-tale ending in which everyone lives happily ever after. This romantic formula continues to influence contemporary ideas about love and marriage, but it ignores the history of love as an emotion that shapes and is shaped by hierarchies of power including gender, class, education, and social status. This interdisciplinary study questions the idealization of love as the ultimate happy ending by showing how the conteuses, the women writers who dominated the first French fairy-tale vogue in the 1690s, used the fairy-tale genre to critique the power dynamics of courtship and marriage. Their tales do not sit comfortably in the fairy-tale canon as they explore the good, the bad, and the ugly effects of love and marriage on the lives of their heroines. Bronwyn Reddan argues that the conteuses' scripts for love emphasize the importance of gender in determining the "right" way to love in seventeenth-century France. Their version of fairy-tale love is historical and contingent rather than universal and timeless. This conversation about love compels revision of the happily-ever-after narrative and offers incisive commentary on the gendered scripts for the performance of love in courtship and marriage in seventeenth-century France.

*Gender, Intellectual Sociability, and Political Culture in the French Third Republic, 1890-1914* Springer Nature

This book considers gender as a convenient tool for making new boundaries within the European Union. It offers a political analysis based on sociological surveys conveyed by the author in 2008-2021. It emphasizes the utmost necessity of a proper understanding of specific gender political technologies applied in ethnic and religious diasporas within the EU borders, by EU ruling elites, to avoid ideological collapse in relations with diaspora political groups and general members. The book demonstrates that uncritical application of EU gender equality programs within diasporas may transform gender to a dangerous political force destabilising the European Union. The monograph will be of interest for political science researchers, legislators, and administrators that work with political dimension of gender.

Beach highlights the importance of theatrical endeavors which women perceived as a powerful way to promote political opinions. This major new collection of essays by leading scholars of Renaissance Italy transforms many of our existing notions about Renaissance politics, economy, social life, religion, medicine, and art. All the essays are founded on original archival research and examine questions within a wide chronological and geographical framework - in fact the pan-Italian scope of the volume is one of the volume's many attractions. *Gender and Society in Renaissance Italy* provides a broad, comprehensive perspective on the central role that gender concepts played in Italian Renaissance society.

*A New Royal French Grammar* Oxford University Press

What does it mean to say that a human being is body and soul, and how does each affect the other? Late antique philosophers, Christians included, asked these central questions. The papers collected here explore their answers, and use those answers to ask further questions, reading Iamblichus, Porphyry, Augustine and others in their social and intellectual context. Among the topics dealt with are the following. Humans are mortal rational beings, so how does the mortal body affect the rational soul? The body needs food: what foods are best for the soul, and is it right to eat animal foods if animals are less rational than humans? The

body is gendered for reproduction: are reason and the soul also gendered? Ascetic lifestyles may free our bodies from the limitations of gender and desire, so that our souls are free to reconnect with the divine; but this need must be balanced with the claims of family and society. Philosophers asked whether life in the body is exile for the soul; Christians defended their claim that body as well as soul would live after death, and even the smallest fragment of a martyr's body is proof of resurrection.

This text is an original investigation in the complex relationship between women, gender, and language in a Muslim, multilingual, and multicultural setting. **Textiles and Gender in Antiquity** Taylor & Francis

This book explores how gender equality, a central part of the Nordic imaginary, is used in the political communication of Nordic states. The analyses presented move beyond conventional images and discourses of Nordic gender- and women-friendliness by critically investigating how and to what extent gender equality serves nation-branding in the Nordic region. Nation-branding is an unescapable part of globalisation, which is a market-oriented process dominated by the West and predicated on the creation of winners and losers. Hence, efforts to strengthen the national brand or reputation of specific Nordic countries with the aid of gender equality as a political and symbolic value inevitably help to reinforce already established global hierarchies where the Nordics play the role of moral superpower. This book comprises scholars from various fields of specialisation, and provides evidence and understanding for the growing interaction between gender-equality policies and nation-branding in all five Nordic countries. It does so by exploring a variety of policy fields and issues including women's rights, foreign policy, rape and legislation, female quotas and business policies, in addition to the index industry. The rise of the global indexes has reproduced forceful images of the Nordic countries as frontrunners of gender equality, which indeed help the Nordic countries to further position themselves as 'best at being good'. This book will be of great interest to students and scholars of Nordic gender equality in political science, sociology, law, criminology, political psychology and history, as well as those interested in nation branding, Nordic studies and exceptionalism. **Saints' Lives and the Rhetoric of Gender** BRILL

Through an analysis of the discourse practices of populist Far Right groups in France, Italy and Belgian Flanders, this book makes a ground-breaking contribution to our understanding of the ways in which homophobic discourse functions. It proposes an innovative heuristic for the conceiving of the interplay of language, context and culture: discourse ecology. The author brings linguistic theories, methods and ways of understanding and thinking about language to a study of the overt and covert homophobic discourses of three non-Anglophone populist movements, and grounds the interpretation of such practices in observable data. In doing so the book encourages us all to reconsider the power we give language in our activism and scholarship, as well as in our private lives.

**Gender and Practice** Walter de Gruyter GmbH & Co KG

This volume looks at how the issues of textiles and gender intertwine across three millennia in antiquity and examines continuities and differences across time and space – with surprising resonances for the modern world. The interplay of gender, identity, textile production and use is notable on many levels, from the question of who was involved in the transformation of raw materials into fabric at one end, to the wearing of garments and the construction of identity at the other. Textile production has often been considered to follow a linear trajectory from a domestic (female) activity to a more 'commercial' or 'industrial' (male-centred) mode of production. In reality, many modes of production co-existed and the making of textiles is not so easily grafted onto the labour of one sex or the other. Similarly, textiles once transformed into garments are often of 'unisex' shape but worn to express the gender of the wearer. As shown by the detailed textual source material and the rich illustrations in this volume, dress and gender are intimately linked in the visual and written records of antiquity. The contributors show how it is common practice in both art and literature not only to use particular garments to characterize one sex or the other, but also to undermine characterizations by suggesting that they display features usually associated with the opposite gender.

and selected open access locations. In Canada many public projects, programs, and services perform well, and many are very successful. However, these cases are consistently underexposed and understudied in the policy literature which, for various reasons, tends to focus on policy mistakes and learning from failures rather than successes. In fact, studies of public policy successes are rare not just in Canada, but the world over, although this has started to change (McConnell, 2010, 2017; Compton & 't Hart, 2019; Luetjens, Mintrom & 't Hart, 2019). Like those publications, the aims of Policy Success in Canada are to see, describe, acknowledge, and promote learning from past and present instances of highly effective and highly valued public policymaking. This exercise will be done through detailed examination of selected case studies of policy success in different eras, governments, and policy domains in Canada. This book project is embedded in a broader project led by 't Hart and OUP exploring policy successes globally and regionally. It is envisaged as a companion volume to OUP's 2019 offering Great Policy Successes (Compton and 't Hart, 2019) and to Successful Public Policy in the Nordic Countries (de La Porte et al, 2022). This present volume provides an opportunity to analyze what is similar and distinctive about introducing and implementing successful public policy in one of the world's most politically decentralized and regionally diverse federation and oldest democratic polities.

**The Discursive Ecology of Homophobia** Emerald Group Publishing

When, why and how can religion and culture be both sources, and places of expression for fundamentalisms, particularly in relation to politics? Those are the central questions asked throughout this book alongside a discussion on the result when religion, strengthened by culture, is used as a political tool to access moral and social power. Cultural and religious messages often form the basis of decisions, laws and programs made in politics, and have a direct effect on society in general, and on women and gender relations in particular. The various forms taken by fundamentalisms in some African countries and the contexts under which they have emerged, the ways in which they (re)shape identities and relationships between men and women are also analysed in this book. These fundamentalisms are frequently sources of concern in social debates, in feminist and feminine organizations as well as in academia and politics. The manipulation of cultures and religions are becoming progressively political, and consequently can cause social discrimination, or even physical, moral, and symbolic violence.
