Brewer's Theatre Boston : Plays, Incorporated

A Pulitzer Prize-winning reporter for the Los Angeles Times discusses the hundreds of murders that occur in the city each year, and focuses on the story of the dedicated group of detectives who pursue justice at any cost in the killing of Bryant Tennale.

Marriage, Divorce, and Remarriage Public Record Office Publications

This practical coursebook introduces all the basics of semantics in a simple, step-by-step fashion. Each unit includes short sections

of explanation with examples, followed by stimulating practice exercises to complete in the book. Feedback and comment sections follow each exercise to enable students to monitor their progress. No previous background in semantics is assumed, as students begin by discovering the value and fascination of the subject and then move through all key topics in the field, including sense and reference, simple logic, word meaning and interpersonal meaning. New study guides and exercises have been added to the end of each unit to help reinforce and test learning. A completely new unit on non-literal language and metaphor, plus updates throughout the text significantly expand the scope of the original edition to bring it up-to-date with modern teaching of semantics for introductory courses in linguistics as well as intermediate students.

**Lingua Franca Communication** John Benjamins Publishing

This book shows the effects of globalization on language in social context, identifying the city as the key site for the realization of these effects. It challenges assumptions that hold sustainable linguistic diversity to be inherently non-urban while regarding the city as an unproblematic site for understanding the social function of language.

**The Substance of Style** Peter Lang Pub Incorporated

Buddhism teaches that the mind is the source of 100 percent of all unhappiness: anxiety, agitation, desire, anger, grief. Through understanding how our mind works, it is possible to tame it—and to discover that happiness, wisdom, compassion, and clarity are actually inherent qualities in all of us. Much has been written of this subject, but Rob Nairn's book is the first to express the principles of Buddhist psychology in a way that is so easy to understand and enjoyable to read—while remaining remarkably accurate and complete. Each chapter includes exercises that bring the truth of the teaching home.

A History of the Balkans 1804-1945 One World/Ballantine

Contains a blend of facts and anecdotes on the theatre, ranging from biographies of writers, performers and directors; to plot summaries of major plays and descriptions of famous first performances

The Gas Heart Krishnamurti Foundation America

Whether it's sleek leather pants, a shiny new Apple computer, or a designer toaster, we make important decisions as consumers every day based on our sensory experience. Sensory appeals are everywhere, and they are intensifying, radically changing how Americans live and work. The twenty-first century has become

the age of aesthetics, and whether we realize it or not, this influence has taken over the marketplace, and much more. In this penetrating, keenly observed book, Virginia Postrel makes the argument that appearance counts, that aesthetic value is real. Drawing from fields as diverse as fashion, real estate, politics, design, and economics, Postrel deftly chronicles our culture's aesthetic imperative and argues persuasively that it is a vital component of a healthy, forward-looking society. Intelligent, incisive, and thought-provoking, *The Substance of Style* is a groundbreaking portrait of the democratization of taste and a brilliant examination of the way we live now.

Progression and Regression in Language Cambridge University Press

A relatively new yet flourishing field, Language and Globalization can be confusing and difficult to navigate for students and scholars. To help make sense of the diverse and voluminous scholarship, this new four volume collection will include key research from a broad spectrum of disciplines, but also from a wide range of geographical, regional and historical contexts.

*Conceptualizing 21st-Century Archives* Weidenfeld & Nicolson

Italy, the country with a hundred cities and a thousand bell towers, is also the country with a hundred cuisines and a thousand recipes. Its great variety of culinary practices reflects a history long dominated by regionalism and political division, and has led to the common conception of Italian food as a mosaic of regional customs rather than a single tradition. Nonetheless, this magnificent new book demonstrates the development of a distinctive, unified culinary tradition throughout the Italian peninsula. Alberto Capatti and Massimo Montanari uncover a

network of culinary customs, food lore, and cooking practices, dating back as far as the Middle Ages, that are identifiably Italian: o Italians used forks 300 years before other Europeans, possibly because they were needed to handle pasta, which is slippery and dangerously hot. o Italians invented the practice of chilling drinks and may have invented ice cream. o Italian culinary practice influenced the rest of Europe to place more emphasis on vegetables and less on meat. o Salad was a distinctive aspect of the Italian meal as early as the sixteenth century. The authors focus on culinary developments in the late medieval, Renaissance, and Baroque eras, aided by a wealth of cookbooks produced throughout the early modern period. They show how Italy's culinary identities emerged over the course of the centuries through an exchange of information and techniques among geographical regions and social classes. Though temporally, spatially, and socially diverse, these cuisines refer to a common experience that can be described as Italian. Thematically organized around key issues in culinary history and beautifully illustrated, *Italian Cuisine* is a rich history of the ingredients, dishes, techniques, and social customs behind the Italian food we know and love today.

*Semantics* Harper Collins

This publication brings together examples of the work of a variety of people and institutions concerned with archives and education. It explores the use of primary sources as teaching aids from Key Stage 1 through to A Level and beyond, offering practical ideas for making history come alive through the use of original materials found in local and national record offices.

Stradanja srba u Konjicu i Tarčinu W. W. Norton & Company

The book traces the development of descriptive systems, the creation and management of computer-generated records, and the curation of digital materials.

*Italian Cuisine* John Benjamins Publishing

A new educational paradigm for youth mindfulness. "If you are a teacher, or an educator, or involved in school administration and curriculum development, the book you hold in your hands has the potential to transform your life, the lives of your students, and the life of the school itself, as well as education in America."—Jon Kabat-Zinn, PhD, from the Foreword With attention spans waning and stress on the rise, many teachers are looking for new ways to help students concentrate, learn, and thrive. *The Way of Mindful Education* is a practical guide for cultivating attention, compassion, and well-being not only in these students, but also in teachers themselves. Packed with lesson plans, exercises, and considerations for specific age groups and students with special needs, this working manual demonstrates the real world application of mindfulness practices in K-12 classrooms. Part I, *Why Mindful Education Matters*, explains what mindfulness is, the science behind its benefits for students and educators, and the inspiring work that is already underway in the Mindful Education movement. In Part II, *Begin with Yourself*, we are reminded that in order to teach mindfully, we need to be mindful. Here teachers will learn the when, where, and how of mindfulness so they can effectively embody its practices with their students. Mindfulness practices offer teachers self-care and attention skills that prepare them to teach with greater energy and mastery. Discover how simple exercises can help manage stress, focus attention, develop compassion, and savor positive experiences in everyday

life. Part III, *Cultivating a Mindful Classroom*, explores the qualities of a mindful teacher, the ingredients of a mindful learning environment, and helpful skills for appropriate, supportive work with cultural diversity, student stress and trauma, and varying age groups and developmental stages. Finally, in Part IV, *Mindful Education Curriculum*, we learn eighteen ready-to-use mindfulness lessons for use in schools. These practical exercises, designed to foster skills like embodiment, attention, heartfulness, and interconnectedness, can be readily adapted for any age group and population, and the author draws from his extensive personal experience to offer a wealth of tips for introducing them to students in real-time. Decades of research indicate the impressive benefits of mindfulness in social, emotional, and cognitive development, and as an antidote to emotional dysregulation, attention deficits, and social difficulties. This book invites teachers, administrators, and anyone else involved in education to take advantage of this vital tool and become purveyors of a mindful, compassionate, ethical, and effective way of teaching.

**Language and Globalization** Concept Publishing Company  
The psychological revolution that Krishnamurti refers to is not only in the conscious mind, but also in the unconscious. He states, 'This is one of our difficulties, perhaps our major difficulty: to be free of the whole content of the unconscious.' This hidden part of our consciousness is the result of 'many thousands of years of man's endeavor; we are the sum total of his struggles, his hopes, his despairs, his everlasting search for something beyond, and this piling up of experience is still going on within us. To be aware of that conditioning, and to be free of it, demands a

great deal of attention.'

Lepenski Vir Cambridge University Press

The Balkans have often been a flashpoint of conflict in European history. The recent civil war has torn the country apart and the region faces an uncertain future. This authoritative study provides an account of the history of the whole area from the first major nationalist rising against its Ottoman rulers in 1804 to the aftermath of World War II. Covering the former Yugoslavia, Albania, Greece, Bulgaria and Romania, it provides a Balkan-wide overview as well as histories of specific states and sets the context to the recent conflict.

Ghettoside Faith Library Publications

This book is the second part of a two-volume reader on the 'Dative'. In the first part, which appeared in 1996, eleven papers were presented providing a syntactic and semantic description of the category 'Dative' in eleven languages. The aim of this second part is to discuss several aspects of the Dative in greater detail. It contains eight papers dealing with theoretical considerations on 'dativity' as well as with contrastive, typological and diachronic issues. A major concern is the relation between form (case, grammatical relation) and meaning (semantic roles or other kinds of meaning). Most contributions in this volume represent cognitive and functional views or a critical discussion of them. As in the first volume, the linguistic material mainly stems from Germanic and Romance languages. Contemporary English is the basis for Davidse's theoretical claims; Pasicki studies the dative in Old English. Dutch appears especially in Geeraerts' semantic analysis, but also in the papers by Draye, Lamiroy & Delbecque and Van Langendonck. Draye, Lamiroy & Delbecque and Melis

also take German into consideration. Latin is dealt with by Melis and Van Langendonck. Modern Romance languages, especially French, provide further data for Melis and Lamiroy & Delbecque. Finally, Newman adduces a variety of languages for his typological analyses.

**The Communication of Ideas** Columbia University Press  
First published in 1994, this crosslinguistic collection looks at changes and developments in language involving gain or loss in structural complexity or utility. The dynamics of these processes of progression and regression are examined at the societal and the individual level, and the two are compared. In the former, the focus is on the social and cultural forces that influence groups of speakers to create new languages or abandon old ones. In the latter, the acquisition and attrition of both first and second languages are considered. Questions raised include: Can parallel structural patterning be observed in whole languages and in the individual's version of a language? Is there parallelism between progression and regression? Can changes occurring in progression and regression be interpreted in a typological framework? These are addressed from sociological, neuropsychological, and linguistic perspectives.

**A Psychological Revolution** Routledge  
Since antiquity, scholars have been fascinated by the phenomena of case. The explanation for this fascination is, as Hjelmslev already pointed out over fifty years ago, the fact that he who can unravel the meaning of case-relations, has the key to language structure as a whole. For over three years, a team of twenty scholars affiliated with the Linguistics Department of Leuven University in Belgium has concentrated on case phenomena in

different languages, both Indo- and non-Indo-European. It is the first time that such a large scale investigation into case has been undertaken. Noteworthy is also its reliance on computer-stored corpora of authentic material. The results are published as a series (Case and Grammatical Relations across Languages) of which the first volume, a bibliography, appeared in 1994. The first volume on the dative case contains 13 articles, each of which gives a detailed syntactic-semantic description of the dative or its counterparts in a particular language. In addition to the lexico-syntactic frames in which they occur, a number of textual and extra-linguistic factors are taken into account. Languages investigated are English (K. Davidse), German (L. Draye), Dutch (W. Van Belle & W. Van Langendonck), Afrikaans (L.G. de Stadler), Latin (W. Van Hoeske), French (L. Melis), Spanish (N. Delbecque & B. Lamiroy), Portuguese (R. de Andrade), Polish (B. Rudzka-Ostyn), Hungarian (G. Tóth), Pashto (W. Skalmowski), Hebrew (P. Swiggers) and Orizaba Nahuatl (D. Tuggy).

**Dictionary of Puppetry** Gegensatz Press  
Written in 1920 or 1921 first performed on June 10, 1921, next and most famously performed July 6, 1923. Modus ponens: If the purpose of Dada in general and The Gas Heart in particular was to piss people off, then both, especially the latter, succeeded marvelously. The purpose of Dada in general and The Gas Heart in particular was to piss people off. Therefore, ...  
*The Way of Mindful Education: Cultivating Well-Being in Teachers and Students* Penguin Books India  
Lingua francas are languages used for communication between individuals for whom they are not the first language. Based on

empirical work throughout, the individual contributions to this volume address lingua franca communication from sociolinguistic as well as from conversation analytic perspectives, or place this form of communication within the wider context of foreign language teaching. The volume as a whole attempts to broaden the traditional view of lingua francas as languages employed by non-native speakers to serve specific, restricted communicative purposes only. Instead, it is demonstrated that lingua francas have gained a number of varied functions, and that they are employed by a heterogeneous group of speakers for whom they do not always have the same status of a second or foreign language. The papers reveal intriguing similarities in form across different lingua francas, but also point at significant differences. As a result, it is proposed that approaches to teach lingua

francas such need to be developed on the basis of empirical evidence. Contents: C. Meierkord/K. Knapp: Approaching lingua franca communication - M. Meeuwis: The sociolinguistics of Lingala as a diaspora lingua franca: Historical and language ideological aspects - S. Fiedler: On the main characteristics of Esperanto-communication - M.
