Joe Girard was an example of a young man with perseverance and determination. Joe began his working career as a shoeshine boy. He moved on to be a newsboy for the Detroit Free Press at nine years old, then a dishwasher, a delivery boy, stove assembler, and home building contractor. He was thrown out of high

school, fired from more than forty jobs, and lasted only ninety-seven days in the U.S. Army. Some said that Joe was doomed for failure. He proved them wrong. When Joe started his job as a salesman with a Chevrolet agency in Eastpointe, Michigan, he finally found his niche. Before leaving Chevrolet, Joe sold enough cars to put him in the Guinness Book of World Records as 'the world's greatest salesman' for twelve consecutive years. Here, he shares his winning techniques in this step-by-step book, including how to: o Read a customer like a book and keep that customer for life o

Convince people reluctant to buy by selling them the right way o Develop priceless information from a two-minute phone call o Make word-of-mouth your most successful tool Informative, entertaining, and inspiring, HOW TO SELL ANYTHING TO ANYBODY is a timeless classic and an indispensable tool for anyone new to the sales market.

Inhaltsangabe:Introduction:
This thesis represents
the results of my research
in synchronization of
television during my
graduation project. I will
describe a solution, which
is actually standardized
and give a solution on
how to implement it in
this document. It is a
pleasure to thank the
people who made this
thesis possible. First of all
these are my supervisors
Oskar van Deventer and
Michael Maruschke, who
supported me by
reviewing my work and
discussion on content. I
also would like to thank
Ray van Brandenburg and
Hans Stokking, who were
always open for
discussion. This work was
done at TNO Information
and communication
technology. The part of
TNO this thesis is placed

has its main research
topic in media
technologies and content
delivery systems.
Research is done in
cooperation with Dutch
and international
companies as well, as
with international
research groups. TNO is
also a member in the
NGNLab project, which
main purpose is Next
Generation Networks and
topics related to that. The
purpose of this thesis is to
create a proof of concept
of the synchronization
system for IPTV described
by ETSI TS 182 027 [2]
and ETSI TS 183 063 [1]
by using the protocol
extension to RTCP from
ETSI TS 183 063 Annex W.
During planing,
implementation and
evaluation specifications
have to be proofed and
requirements, for a
sufficient work have to be
generated, if the
standardized environment
is not clear defined on
some part of the
implementation or not
sufficient. This document
should give the reader an
overview of the necessary
requirements and the way
of development of the
proof of concept. This
thesis is divided into
seven chapters. The first
chapters are the
theoretical base, followed
by the planing and

evaluation of the
prototyped IDMS system.
In chapter two an
overview of the thesis
background and
necessary protocols
needed for
communication is given.
This is completed by a
description of the network
framework, which will be
the platform for the
synchronization approach.
The extension for
television usage of the
network described in
chapter two is explained
in chapter three. The
Software analyzed for the
usage in the prototyped
implementation is
described in chapter four.
The necessary
modifications and
extensions to this
software and structure of
the applications used to
build the environment for
the described
implementation
completes the theoretical
part of the thesis. Chapter
five shows these software
planing. Chapter six gives
and overview of [...]
