Chemistry McGraw-Hill Education

Designed for the two-semester general chemistry course, Chang's textbook has often been considered a student favorite. This best-selling textbook takes a traditional approach. It features a straightforward, clear writing style and proven problem-solving strategies. The strength of the seventh edition is the integration of many tools that are designed to inspire both students and instructors. The textbook is the foundation for the technology. The multi-media package for the new edition stretches students beyond the confines of the traditional textbook.

Chang, Chemistry, AP Edition McGraw-Hill Education

The seventh edition of General Chemistry continues the tradition of presenting only the material that is essential for a one-year general chemistry course. It strikes a balance between theory and application by incorporating real-world examples; helping students visualize the three-dimensional atomic and molecular structures that are the basis of chemical activity; and developing problem-solving and critical thinking skills. Although the seventh edition incorporates many impressive features, such as conceptual idea review, animations correlated to the text, and hand-drawn worked examples, General Chemistry is still 200 to 300 pages shorter and much less expensive than other two-semester textbooks. Dr. Chang and Dr. Goldsby's concise-but-thorough approach will appeal to efficiency-minded instructors and value-conscious students.

Student Study Guide for Chemistry McGraw-Hill Higher Education

By Brandon J. Cruickshank (Northern Arizona University) and Raymond Chang is a success guide written for use with General Chemistry. It aims to help students hone their analytical and problem-solving skills by presenting detailed approaches to solving chemical problems. Solutions for all of the text's even-numbered problems are included.

Intends to bridge the gap in the McGraw-Hill general chemistry offerings. This textbook contains the Visualizing Art two-page spreads which detail a process for the students and provide them with the answer to What is the Point? "Chemistry, First Edition", by Julia Burdge has been created to bridge the gap in the McGraw-Hill general chemistry offerings. This textbook offers a clear writing style written with the students in mind. Julia uses her background of teaching hundreds of general chemistry students per year and creates content to offer more detailed explanation on areas where she knows they have problems. Sitting down with the art house, Julia Burdge worked with the artist to create the style and major art pieces in her text. Out of these discussions, came the creation of the Visualizing Art two-page spreads which detail a process for the students and provide them with the answer to What is the Point?. With outstanding art, a consistent problem-solving approach, interesting applications woven throughout the chapters, and a wide range of end-of-chapter problems, this is a solid first edition text.
