John Vigor turns the spotlight on twenty seaworthy sailboats that are at home on the ocean in all weather. These are old fiberglass boats, mostly of traditional design and strong construction. All are small, from 20 feet to 32 feet overall, but all have crossed oceans, and all are cheap. Choosing the right boat to take you across an ocean or around the world can be confusing and exasperating, particularly with a tight budget. Vigor sets out to remedy that in this book. He compares the designs and handling characteristics of 20 different boats whose secondhand market prices start at about \$3,000. Interviews with experienced owners (featuring valuable tips about handling each boat in heavy

weather) are interspersed with line drawings of hulls, sail plans, and accommodations. Vigor has unearthed the known weaknesses of each boat and explains how to deal with them. He rates their comparative seaworthiness, their speed, and the number of people they can carry in comfort. If you have ever dreamed the dream this book can help you turn it into reality.

This book is for the bare minimalist who wants maximum health benefits. The KISS principle for your well-being. Dr. Pearson outlines how to care for the muscular system quickly, the ligamentous structures, get the fundamental nutritional requirements, with a focus on the easiest way to care for the cardiovascular system. Flexibility is the key to life. While Einstein reminds us that nothing happens until something moves, Dr. Pearson reminds us that poor aging is the only thing that happens when nothing moves! If you feel confused and sense more and more you're not living up to your potential, take heart and know that the body is responsive to doing the right things, in particular doing the right things every single day. This manual, filled with excellent illustrations, will show you to easily stretch your body in less than 4 minutes a day while standing up and wearing street clothes. (Taking all the excuses away is essential!) In the additional 4 minutes a day, you will also learn how to use a roller not to stretch the muscles, but rather to lengthen the ligaments of the spine that are commonly the reason we end up hunched over, and worried about falling all the time. Dr. Kelli hopes you can live well up to the moment of your last breath, and not follow the slow downward spiral that so many people experience. Eight minutes to Ageless is your solution.

Robert Ludlum's bestselling Covert-One series continues with an exciting, ripped-from-the-headlines new novel by bestselling, award-winning thriller author Jamie Freveletti. On one evening in Washington, DC, several high-ranking members of government disappear in a mass kidnapping. Among the kidnapped is Nick

Rendel, a computer software coding expert in charge of drone programming and strategy. He is the victim with the most dangerous knowledge, including confidential passwords and codes that are used to program the drones. If revealed, his kidnappers could reprogram the drones to strike targets within the United States. Jon Smith and the Covert One team begin a worldwide search to recover the officials, but as the first kidnapping victims are rescued, they show disturbing signs of brainwashing or mind-altering drugs. Smith's investigation leads him to Fort Detrick, where a researcher, Dr. Laura Taylor, had been attempting to create a drug to wipe memory from soldiers suffering from post-traumatic stress syndrome. But Dr. Taylor's research was suspended almost a year ago, when she was placed in a mental institution. Now, if Smith doesn't figure out the brainwashing drug, and track down the kidnapped Nick Rendel, the kidnappers will soon have the power to carry out drone strikes anywhere in the world . . .
