"... the contributors to *Status and Identity in West Africa* have swept away the dust that has obscured the study of the societies of western Sudan and have made it possible to pursue the salutary work of decolonizing the history and sociology of these regions." — American Ethnologist "This discussion is among the most significant contributions that African studies can make to the contemporary global dialogue on multicultural issues." -- Choice "It is 'must' reading for anyone who works in African literature today." -- Research in African Literatures "...an indispensable guide to understanding the producers of art in the Mande world, including the art of the spoken word. The result of years of work by scholars from all over the world, The UNESCO General History of Africa reflects how the different peoples of Africa view their civilizations and shows the historical relationships between the various parts of the continent. Historical connections with other continents demonstrate Africa's contribution to the development of human civilization. Each volume is lavishly illustrated and contains a comprehensive bibliography. This fifth volume of the acclaimed series covers the history of the continent from the beginning of the sixteenth century to the close of the eighteenth century in which two themes emerge: first, the continuing internal evolution of the states and cultures of Africa during this period second, the increasing involvement of Africa in external trade--with major but unforeseen consequences for the whole world. In North Africa, we see the Ottomans conquer Egypt. South of the Sahara, some of the larger, older states collapse, and new power bases emerge. Traditional religions continue to coexist with both Christianity (suffering setbacks) and Islam (in the ascendancy). Along the coast, particularly of West Africa, Europeans establish a trading network which, with the development of New World plantation agriculture, becomes the focus of the international slave trade. The immediate consequences of this trade for Africa are explored, and it is argued that the long-term global consequences include the foundation of the present world-economy with all its built-in inequalities.

Situated along the Senegal River, the Kingdom of Waalo was the smallest of the Wolof states of Senegal, but it illustrates the broader consequences of a shift from trans-Saharan to trans-Atlantic commerce during a time of competing European, Muslim, and indigenous African forces. From the establishment of a French trading post in 1659 to the early nineteenth century, the history of Waalo

was closely tied to French interests in St. Louis, popular revolutionary Islamic movements, and internal rivalries between competing royal families and provincial leaders. Stimulating Waalo's socio-political changes were the devastations and fluctuations of the Atlantic slave trade, as well as the Muslim attack on its aristocracy. Torn by internal divisions, devastated by French and Berber incursions, Waalo's institutions and its economy declined. Residents of Waalo sought their own solutions only for external agents to ruin their efforts. By the nineteenth century, the French attempted to establish a plantation economy in Waalo, culminating in their military control of the state and the Senegal valley. This newly translated study is a vital tool in our understanding of Senegal's history, its place in the era of trans-Saharan and trans-Atlantic commerce, and its development into the present. The book should be of value to African studies scholars, anthropologists, and historians of Africa, colonialism, empire, and post-colonialism.

A comprehensive illustrated portrait of griots and griottes including extensive reference materials. *Annuaire de la presse française et du monde politique* Africa Research and Publications Central-Southern Italy and the Tyrrhenian Sea are the sites of extensive Plio-Quaternary magmatic activity. The rock compositions include crustal anatectic granites and rhyolites, tholeiitic, calc-alkaline, shoshonitic volcanics, and potassic to ultrapotassic and Na-alkaline volcanics. This very wide compositional variation makes Italian magmatism one of the most complex petrological issues, the understanding of which is a challenge for modern petrology and geochemistry. This book summarises the petrological, geochemical and volcanological characteristics of Italian Plio-Quaternary volcanism, and discusses petrogenetic hypotheses and possible geodynamics settings. The book is written for petrologists and geochemists, but fundamental geochemical information is well presented and the use of excessive jargon is avoided, making the book readable to a wide audience of Earth scientists.

Centenarian Eulalio Assumpcao has reached the end of his long life. From his modest bed in a Rio public hospital, as his mind falters, he grandly recounts his past to passing nurses, his visiting daughter and the whitewashed ceiling. His eccentric stories are seemingly nothing more than the ramblings of a dying man, yet as he overlaps each confused memory, they begin to coalesce into a brilliant and bitter eulogy for himself and for Brazil. Charting his own fall from aristocracy, Eulalio's feverish monologue sprawls across the last century, from his empire-building ancestors to his drug-deal.

Until now, the emphasis in studies of oral traditional works has been placed on addressing the correspondences among traditions--shared structures of "formula," "theme," and "story-pattern." Professor Foley argues that to give the vast and complex body of oral "literature" its due, we must first come to terms with the endemic heterogeneity of traditional oral epics, with their individual histories, genres, and documents, as well as both the synchronic and diachronic aspects of their poetics. This book explores the incongruencies among traditions and focuses on the qualities specific to certain oral and oral-derived works.

This comprehensive inventory of all known sarcophagi from the Jewish catacombs of Rome, is the first specialized treatment of this subject in monograph form. It describes and analyses each sarcophagus and provides full reference material which it critically examines. This work thus fills a lacuna in the literature on this field, which has up to now been confined to the treatment of early Christian and pagan sarcophagi of the period. ♦We have here a complete overview of the Jewish sarcophagi of ancient Rome, all of them illustrated by photographs and provided with extensive bibliographies. This work thus fills a lacuna in the literature on this field. ♦Journal for the Study of Judaism ♦Until this book, however, no one has attempted to assemble all of the Jewish sarcophagi separately in one place and to provide relevant information in the form of a well-ordered catalogue. For this reason, Konikoff's book provides a welcome resource for anyone interested in the material evidence of ancient Judaism and forms a good beginning for study of the sarcophagi, especially from a bibliographic point of view. ♦Gnomon .
