Fundamentals of Nursing Made Incredibly Easy! Cambridge University Press

On a cold February night in 1991, a group of soldiers and officers of the Indian Army pushed their way into two villages in Kashmir, seeking out militants assumed to be hiding there. They pulled the men out of their homes and subjected many to torture, and the women to rape. According to village accounts, as many as 31 women were raped. Twenty-one years later, in 2012, the rape and murder of a young medical student in Delhi galvanized a protest movement so widespread and deep that it reached all corners of the world. In Kashmir, a group of young women, all in their twenties, were inspired to re-open the Kunan-Poshpora case, to revisit their history and to look at what had happened to the survivors of the 1991 mass rape. Through personal accounts of their journey, this book examines questions of justice, of stigma, of the responsibility of the state, and of the long-term impact of trauma.

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the bitingly satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

How did Central Park become a vibrant gem in the heart of New York City? Follow the visionaries behind the plan as it springs to green life. In 1858, New York City was growing so fast that new roads and tall buildings threatened to swallow up the remaining open space. The people needed a green place to be -- a park with ponds to row on and paths for wandering through trees and over bridges. When a citywide contest solicited plans for creating a park out of barren swampland, Calvert Vaux and Frederick Law Olmsted put their heads together to create the winning design, and the hard work of making their plans a reality began. By winter, the lake opened for skating. By the next summer, the waterside woodland known as the Ramble opened for all to enjoy. Meanwhile, sculptors, stone masons, and master gardeners joined in to construct thirty-four unique bridges, along with fountains, pagodas, and band shells, making New York's Central Park a green gift to everyone. Included in the end matter are bios of Vaux and Olmsted, a bibliography, and engaging factual snippets.

Why do we measure time in the way that we do? Why is a week seven days long? At what point did minutes and seconds come into being? Why are some calendars lunar and some solar? The organisation of time into hours, days, months and years seems immutable and universal, but is actually far more artificial than most people realise. The French Revolution resulted in a restructuring of the French calendar, and the Soviet Union experimented with five and then six-day weeks. Leofranc Holford-Strevens explores these questions using a range of fascinating examples from Ancient Rome and Julius Caesar's imposition of the Leap Year, to the 1920s' project for a fixed Easter. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.
