#### Introduction to UEFA Euro 2024 qualifying Welbeck

This is the first book exploring the concept of home advantage (HA), the well-known beneficial effect that players and teams derive from performing at home in all sports throughout the world. Despite the fact that the existence of HA dates back to the origins of organized sport in the late 19th century, its root causes and how they operate and interact with each other are still unclear and remain the topic of intense research involving many disciplines, all with the potential objective of improving team and individual performance. This book covers a broad review of HA divided into three different sections: (i) Section 1 focuses on the theory of HA in sport (the concept of this phenomenon, its quantification, and factors supposedly associated with the HA are explored; (ii) Section 2 analyses the effects of HA in sports related to both male and female athletes, in relation to tactics and

strategies, fans, referees, travel, situational variables and the home disadvantage; and (iii) Section 3 studies the HA as it applies to specific sports worldwide such as outdoor sports (football, rugby, cricket, and Australian Football), indoor sports (basketball, futsal, handball, water polo and volleyball), US professional sports, individual sports, racket sports, combat sports, minor sports, disabled sports and the Olympic Games. This book has been written in cooperation with top leading experts in this field worldwide. The book offers a better understanding of the HA effect for MSc and PhD students, athletes, coaches, performance analysts, sport psychologists, sociologists, sport scientists and sport journalists.

Sports law has been growing with increasing rapidity over the years since the first edition of this book was published in 1999, regularly making headlines as well as leading to a developing body of law practised by specialist lawyers. This revised work, by leading practitioners in the field, with a foreword by Lord Coe, provides a coherent framework for understanding the principles of sports law in this area, as well as a deep analysis of its key features. The subject is split into various areas of practice: first, regulatory rules, which embrace the constitutional aspect of organised sport, including the disciplinary procedures of the various governing organisations; second, broadcasting and marketing resulting from the commercial exploitation, including sponsorship, of sports clubs, sporting events and players; and third, player's rights and obligations, which embraces a wide range of legal issues

including club transfers and player contracts, and issues arising from employment (including discrimination law), personal injury and criminal law. Special attention is paid to the impact of EU and Human Rights law as well as to the influential jurisprudence of the Court of Arbitration for Sport. London 2012 provides an appropriate point at which to assess the current state of the law, as well as a look to the future. The target readership extends from solicitors, barristers and legal advisers, to sports organisations and clubs, corporations involved in marketing and sponsorship, media companies, academics teaching sports law, and sports administrators. "I commend it to everyone who has to administer sport as well as to those who have to advise the administrators or argue cases in the field on whatever side. It is a gold medal book." From the Foreword by Lord Coe KBE

This book analyses the careers, governance and management practices of some of the institutional sports leaders who have had the greatest impact on global sport in the 120 years since Baron Pierre de Coubertin revived the Olympic Games. Through their positions in major sports organisations, their influence, the examples they set, their successes and failures, and their ability to bring about change, these notable individuals controlled and continue to control the development of Olympic and international sport. The portraits included within this collection provide a critical analysis of these leaders' careers by examining sports management from a biographical perspective, and allowing readers to understand the challenges and obstacles faced by international sport's top

administrators. The contributors explore the interactions between these leaders' career paths and their strategies, both within their organisations and in the overall sporting context. Global Sport Leaders will be of interest to students and scholars across a range of disciplines including sports management, sociology, politics, history and international relations.

Beach Soccer Histories is the first text to consider the sport as a historical, social and cultural phenomenon, to define its traditions, and present leading research on the development and significance of football played on sand. Following a period of expansive, rapid growth, beach soccer is an internationally governed professional sport, which has come a long way from its origins in Rio de Janeiro in the 1920s. The sand-based variant is distinguished from football by a range of factors, including the dramatic impact of the playing surface. Yet, the game has undergone very little academic scrutiny. This research adopts and adapts qualitative methods related to oral history and football studies, including extensive archival research, semi-structured interviews, and textual and thematic analyses. As it looks beneath the game's contemporary reach, it considers origins, organisations – including FIFA's influence – and the beach cultures that underpin its sporting and historical development. This the most comprehensive exploration of beach soccer and a century of its existence. Beach Soccer Histories examines the game's historical development, critical moments and movements in its progress, successes and contentions, and its contemporary state of play with a view to deepening

and advancing our understanding of the game.

*Critical Toponymy: Place names in political, historical and commercial landscapes* contains a selection of double-blind peer-reviewed papers from the 4th International Symposium on Place Names that took place 18-20 September 2017 in Windhoek, Namibia. These papers present current thinking on how the critical turn in social sciences is manifested in toponymic research, not only locally but also internationally. As such it includes research on place names from South Africa, Namibia, Zimbabwe, Austria, Slovenia, Central America and even the former Czechoslovakia. The contributions show that the etymology of place names are never purely linguistic – social, political, commercial and other factors influence the giving, use and adaptations of these linguistic and cultural artefacts. Furthermore, given their high symbolic content, place names also serve as political and commercial currency. Place names are therefore important symbolic markers in preserving or changing cultural identities, and in marking or facilitating socio-political changes and relations. *Critical Toponymy* showcases the many ways in which the representational potential of place names can be deployed in different contexts. Scholars as well as practitioners in toponymy and sociolinguistics will find this an illuminating read.

In doing so, it highlights the diversity of research currently being undertaken in the field and touches on areas which remain overlooked or underdeveloped. The chapters in this book were originally published as a special issue of *Sport in History*.

2016 marks the 50th anniversary of the 1966 FIFA World Cup, hosted in England. While football does not generate discriminatory behaviour, it often replicates the very same social issues that concern any given society. Evidently, football has witnessed an alarming increase in the number of disturbing incidents on the grounds of racism, ethnocentrism, sectarianism, homophobia, and sexism. Given the variety of forms that discrimination can take, it is imperative that football addresses with effect all such anti-social phenomena in order to continue to promote notions pertaining to social inclusion, equality, and cultural diversity – all central to the game's philosophy and overall popularity. Assessing the nature and causes of discrimination in football is key to identifying the much-needed remedies, but also because discrimination poses a serious challenge

to long-established practices deeply rooted in democracy. Discrimination in Football provides a comprehensive and in-depth investigation into these key issues affecting football today. This new book will appeal to academics and students with an interest in social science, law, sport, and humanities as well as football fans and professionals in the football industry.

The book is an introduction to sports law, in particular International (worldwide) and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of "sport specificity" (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and European Sports Law (*capita selecta*): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football ("soccer") is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law perspective.
