HARPER YARELI

The Expressive Eye CUP Archive
Each of Thomas Hardy's novels is filled with striking visual images -- characters, interior settings, buildings, village scenes, and open tracts of land. These images are all rendered with a vitality and energy immediately recognizable as Hardy's own. In fact, Hardy, whose style owed much to his abilities as a draughtsman, once remarked that he saw his narratives as a series of images. J. B. Bullen explores this fascinating link between the image and the idea in the fiction of Thomas Hardy,

and demonstrates how Hardy approached his work from a particular "point of view" which not only determined the lighting, composition, and structure of his literary visual effects, but which also allowed him to express emotions and ideas in the direct, "vividly visible" fashion that is the hallmark of his greatest fiction.

Expressive Spaces in Digital 3D Cinema Springer

The way we tell stories influences how others react to our emotions, and impacts how we cope with emotions ourselves. *Stories of Change* Springer

This best-selling book is an easy-to-read introduction to the ideas and practices of narrative therapy. It uses accessible language, has a concise structure and

includes a wide range of practical examples. *What Is Narrative Practice?* covers a broad spectrum of narrative practices including externalisation, remembering, therapeutic letter writing, rituals, leagues, reflecting teams and much more. If you are a therapist, health worker or community worker who is interesting in applying narrative ideas in your own work context, this book was written with you in mind.

Expressive Writing Gecko 2000

A Clinician's Guide to Foundational Story Psychotherapy draws together a range of theories and models to examine the use of narrative psychotherapy in clinical practice. Illustrated with case examples and biographical vignettes, the book

outlines the importance of foundational and life stories in treatment and delineates new techniques for co-assessing and changing stories. A wealth of concrete tools are included, such as the Foundational Story Interview and Family of Origin Map, as well as diagram templates and questionnaires for use during clinical sessions. Integrating theory and practical applications, *A Clinician's Guide to Foundational Story Psychotherapy* introduces a range of therapeutic options rooted in a narrative context and is a valuable resource for practicing and student psychotherapists.

Expressive Arts and Narrative as Forms of Healing Oxford University Press

Gregory Currie offers a reflection on the nature and significance of narrative in human communication. He shows that narratives are devices for manifesting the intentions of their makers in stories, argues that human tendencies to imitation and to joint attention underlie the pleasure of narrative, and discusses authorship, character, and irony.

Fact and Fiction Routledge

How have twentieth-century writers used

techniques in fiction to communicate the human experience of time? *Dramatizing Time in Twentieth-Century Fiction* explores this question by analyzing major narratives of the last century that demonstrate how time becomes variously manifested to reflect and illuminate its operation in our lives. Offering close readings of both modernist and non-modernist writers such as Wodehouse, Stein, Lewis, Joyce, Hemingway, Faulkner, Borges, and Nabokov, the author shares and unifies the belief, as set forth by the distinguished philosopher Paul Ricoeur, that narratives rather than philosophy best help us understand time. They create and communicate its meanings through dramatizations in language and the reconfiguration of temporal experience. This book explores the various responses of artistic imaginations to the mysteries of time and the needs of temporal organization in modern fiction. It is therefore an important reference for anyone with an interest in twentieth-century literature and the philosophy of time.

Communication Development and Disorders for Partners in Service

Academic Press

Applies narrative analysis to the study of social movements.

Writing With Emotion, Tension, and Conflict SIU Press

This book will inform the reader of the remarkably high comorbidity of language impairment with a range of psychopathologic disorders of childhood and adolescence and the implications of this association for clinical practice. The book describes and discusses this relationship, its etiology and consequences for the child, and clinical issues in treating the disorder. The focus is on children and adolescents with behavioral and emotional problems who constitute the largest population referred for clinical attention and does not consider children with severe disorders, such as autism. Findings from the literature, including the author's own research program, highlight the consequences of having problems with language and communication on inte

Expressive Intersections in Brahm's

Cambridge University Press

How can social workers integrate expressive arts methods as a complement

to their work to better support individual, group, and community growth? Expressive Arts for Social Work and Social Change explores the values and benefits of expressive arts (i.e., visual arts, movement and dance, expressive forms of writing and narrative, music, and performance) and the role they can play in social work practice and inquiry. Although previous research has illustrated the efficacy of expressive arts to individual therapeutic goals, this is the first work that looks at the use of these approaches to fulfill the values, ethics, and principles of the social work profession. The authors draw from current and emerging concepts related to green social work, including individual and collective well-being, Indigenous perspectives and practices, social justice and social action, and individual as well as collective creative expression. This book provides insight and advice that will benefit all human service professionals interested in expressive arts. [Looking Forward, Looking Back: Interactive Digital Storytelling and Hybrid Art Approaches](#) Oxford University Press

Stories are central to our world. We form our families, our communities, and our

nations through stories. It is through stories of our everyday experiences that each of us constructs an autobiographical self, a narrative identity, that confers a sense of coherence and meaning to our individual lives. In this volume, Robyn Fivush describes how this deeply personal autobiographical self is socially and culturally constructed. *Family Narratives and the Development of an Autobiographical Self* demonstrates that, through participating in family reminiscing, in which adults help children learn the forms and functions of talking about the past, young children come to understand and evaluate their experiences, and create a sense of self defined through individual and family stories that provide an anchor for understanding self, others, and the world. Fivush draws on three decades of research, from her own lab and from others, to demonstrate the critical role that family stories and family storytelling play in child development and outcome. This volume is essential reading for students and researchers interested in psychology, human development, and family studies.

Dramatizing Time in Twentieth-Century Fiction Crossway

The idea of storytelling goes beyond the borders of language, culture, or traditional education, and has historically been a tie that bonds families, communities, and nations. Digital storytelling offers opportunities for authentic academic and non-academic literacy learning across a multitude of genres. It is easily accessible to most members of society and has the potential to transform the boundaries of traditional education. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant and responsive, the connections between digital storytelling and disciplinary literacy warrant considered exploration. *Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education* develops a conceptual framework around pedagogical connections to digital storytelling within K-12 disciplinary literacy practices. This essential reference book supports student success through the integration of digital storytelling across content areas and grade levels. Covering topics that include immersive storytelling, multiliteracies,

social justice, and pedagogical storytelling, it is intended for stakeholders interested in innovative K-12 disciplinary literacy skill development, research, and practices including but not limited to curriculum directors, education faculty, educational researchers, instructional facilitators, literacy professionals, teachers, pre-service teachers, professional development coordinators, teacher preparation programs, and students. The Routledge Handbook of Music Signification Peeters Publishers
 “This exceptionally fine collection brings together many of the best analysts of Brahms, and nineteenth-century music generally, in the English-speaking world today.” —Nineteenth-Century Music Review Contributors to this exciting volume examine the intersection of structure and meaning in Brahms’s music, utilizing a wide range of approaches, from the theories of Schenker to the most recent analytical techniques. They combine various viewpoints with the semiotic-based approaches of Robert Hatten, and address many of the most important genres in which Brahms composed. The essays reveal the

expressive power of a work through the comparison of specific passages in one piece to similar works and through other artistic realms such as literature and painting. The result of this intertextual re-framing is a new awareness of the meaningfulness of even Brahms’s most “absolute” works. “Through its unique combination of historical narrative, expressive content, and technical analytical approaches, the essays in *Expressive Intersections in Brahms* will have a profound impact on the current scholarly discourse surrounding Brahms analysis.” —Notes *Academic Skills Problems* Lulu.com
 What kind of animals are human beings? And how do our visions of the human shape our theories of social action and institutions? In *Moral, Believing Animals*, Christian Smith advances a creative theory of human persons and culture that offers innovative, challenging answers to these and other fundamental questions in sociological, cultural, and religious theory. Smith suggests that human beings have a peculiar set of capacities and proclivities that distinguishes them significantly from other animals on this planet. Despite the

vast differences in humanity between cultures and across history, no matter how differently people narrate their lives and histories, there remains an underlying structure of human personhood that helps to order human culture, history, and narration. Drawing on important recent insights in moral philosophy, epistemology, and narrative studies, Smith argues that humans are animals who have an inescapable moral and spiritual dimension. They cannot avoid a fundamental moral orientation in life and this, says Smith, has profound consequences for how sociology must study human beings.

A Study of the Narrative Skills in 6-year-olds with Normal, Impaired, and Late Developing Language Walter de Gruyter GmbH & Co KG

"Now in a revised and expanded fifth edition that reflects current research and best practices in direct assessment and intervention, this text addresses a perennial need for school practitioners and practitioners in training. Presented is a comprehensive, problem-solving-based approach for working with K-12 students who are struggling with reading, writing,

or mathematics. The book provides a framework for evaluating the instructional environment as well as each student's context and unique learning needs; planning instructional modifications; and monitoring progress. The companion workbook, available separately, contains practice exercises and reproducible forms. Subject areas/key words: school psychology texts, assessing, curriculum-based, evaluations, measurement, measures, testing, observation, reading, mathematics, writing, multi-tiered systems of support, MTSS, RTI, learning disabilities, difficulties, struggling readers, students, handbooks Audience: School psychologists, K-12 school administrators, special educators, and classroom teachers; graduate students and researchers in these fields. Together with the companion workbook, will serve as a text in graduate-level courses on academic assessment and intervention"--

Language Impairment and Psychopathology in Infants, Children, and Adolescents Oxford University Press
This volume collects documentation of the 2017 International Conference on Interactive Digital Storytelling Art

Exhibition and new scholarly texts from the artists involved. The work traces themes of Time & Tempo across Digital Poetics and Literature, Digital Heritage, and Urban Space and Politics.

Opening Up by Writing It Down, Third Edition Indiana University Press
That's the advice James Pennebaker and John Evans offer in *Expressive Writing: Words That Heal*. This book will help you overcome the traumas and emotional upheavals that are keeping you awake. You'll resolve issues, improve your health, and build resilience. Based on nearly 30 years of scientific research, the book shows you how and when expressive writing can improve your health. Its clear explanations of the writing process will enable you to express your most serious issues and deal with them through writing.

Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education Oxford University Press, USA
Shortlisted for the 2013 Nursery World Awards! Margaret Carr's seminal work on Learning Stories was first published by SAGE in 2001, and this widely acclaimed approach to assessment has since gained

a huge international following. In this new full-colour book, the authors outline the philosophy behind Learning Stories and refer to the latest findings from the research projects they have led with teachers on learning dispositions and learning power, to argue that Learning Stories can construct learner identities in early childhood settings and schools. By making the connection between sociocultural approaches to pedagogy and assessment, and narrative inquiry, this book contextualizes Learning Stories as a philosophical approach to education, learning and pedagogy. Chapters explore how Learning Stories: - help make connections with families - support the inclusion of children and family voices - tell us stories about babies - allow children to dictate their own stories - can be used to revisit children's learning journeys - can contribute to teaching and learning wisdom This ground-breaking book expands on the concept of Learning Stories and includes examples from practice in both New Zealand and the UK. It outlines the philosophy behind this pedagogical tool for documenting how learning identities are constructed and

shows, through research evidence, why the early years is such a critical time in the formation of learning dispositions. Margaret Carr is a Professor of Education at the University of Waikato, New Zealand. Wendy Lee is Director of the Educational Leadership Project, New Zealand. [Emotion and Narrative](#) Lulu.com

Can traditional arts improve an older adult's quality of life? Are arts interventions more effective when they align with an elder's cultural identity? In *The Expressive Lives of Elders*, Jon Kay and contributors from a diverse range of public institutions argue that such mediations work best when they are culturally, socially, and personally relevant to the participants. From quilting and canning to weaving and woodworking, this book explores the role of traditional arts and folklore in the lives of older adults in the United States, highlighting the critical importance of ethnographic studies of creative aging for both understanding the expressive lives of elders and for designing effective arts therapies and programs. Each case study in this volume demonstrates how folklore and traditional

practices help elders maintain their health and wellness, providing a road map for initiatives to improve the lives and well-being of America's aging population.

The Designation of the Individual
Oxford University Press

Music and dance can change our sense of time. Both rely on synchronizing our attention and actions with sounds and with other people, both involve memory and expectation, and both can give rise to experiences of flow and pleasure. *Performing Time* explores our experience of time in dance and music, from the perspectives of performers and audiences, and informed by the most recent research in dance science, musicology, neuroscience, and psychology. It includes discussions of tempo and pacing, coordination and synchrony, the performer's experience of time, audiences' temporal expectations, the effect of extreme slowness, and our individual versus collective senses of time. At its core, the book addresses how time and temporality in music and dance relate to current psychological and neuroscientific theories as well as to the aesthetic aims of composers, choreographers and

performers. Bringing together new research on rhythm, time and temporality in both music and dance in one volume, the book contains overview chapters on the state of the art from leading researchers on topics ranging from the psychology, neuroscience, and philosophy of musical time to embodied timing in dance. In addition, numerous case studies regarding our temporal experience of music and dance are provided in shorter focus chapters, with their implications for further scientific study and artistic enquiry. *Performing Time* is an invaluable and comprehensive resource for students, researchers, educators, and artists alike, and for any reader interested in how the performing arts construct and play with time in our minds and bodies. Some chapters in this title are open access and available under the terms of a [CC BY-NC-ND 4.0 International] licence.

[A Rhetoric of Doing](#) W. W. Norton & Company

In *On with the Story*, Susan Wanner demonstrates how and why narrative is an extremely rich learning medium for adolescents.
