#MeToo gained much-needed traction when celebrities began sharing their horrifying experiences in an effort to bring down a powerful studio mogul. Revelations of sexual harassment are often met with smearing and victim blaming, but many believe the Hollywood spotlight has a real chance of effecting change. Still, many feel threatened by this movement. Has #MeToo gone too far? Is its mission clear? Has it failed to include more marginalized groups? Will it be abandoned when Hollywood

moves on to its next cause? This volume presents diverse viewpoints that unpack the goals, triumphs, and shortcomings of this relatively young movement.

“My head is spinning. I couldn’t figure out who was out for revenge!! My eBook froze as I quickly tried to turn the pages!! Could not put it down!!... Don’t want to give anything away but don’t miss this book!!!” Goodreads Reviewer [REDACTED] It’s a sleepy morning in the leafy town of Oakhurst when Jo finds Britney’s body on a running trail. She stares into the girl’s blue eyes as she gently lifts her off the ground—and finds a tarot card... A few days ago, Detective Jo Fournier stood in the middle of the local college, looking at a truly horrifying scene: a well-respected staff member murdered in his office. And it was there that Jo met Britney—a smart and pretty student in the same department who was utterly distraught about the killing. One thought is now racing through Jo’s mind: who would want to kill them both? When another body turns up inside a cabin in the woods, Jo is the only person who can see the link between the murders—the killer left a tarot card with all three bodies. She desperately wants to stop the killing before anyone else dies. Jo knows how it feels to lose someone you love. Her failure to protect her fiancé on the night he was murdered has always haunted her. As the body count rises, no one else will take Jo’s theory seriously. She’s absolutely sure that the cards are the clue that will break this entire case wide open and lead them to the person who has stolen so many innocent lives. Rose Sayer joins forces with the Cockney pilot of a dilapidated

steam launch in a desperate journey along a Central African river

David Copperfield Random House

Running waters are enormously diverse, ranging from torrential

mountain brooks, to large lowland rivers, to great river systems whose basins occupy subcontinents. While this diversity makes river ecosystems seem overwhelmingly complex, a central theme of this volume is that the processes acting in running waters are general, although the settings are often unique. The past two decades have seen major advances in our knowledge of the ecology of streams and rivers. New paradigms have emerged, such as the river continuum and nutrient spiraling. Community ecologists have made impressive advances in documenting the occurrence of species interactions. The importance of physical processes in rivers has attracted increased attention, particularly the areas of hydrology and geomorphology, and the inter-relationships between physical and biological factors have become better understood. And as is true for every area of ecology during the closing years of the twentieth century it has become apparent that the study of streams and rivers cannot be carried out by excluding the role of human activities, nor can we ignore the urgency of the need for conservation. These developments are brought together in *Stream Ecology: Structure and function of running waters*, designed to serve as a text for advanced undergraduate and graduate students, and as a reference book for specialists in stream ecology and related fields.

- New York Times bestseller
- The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world

"At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can

do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to

see this planetary crisis as an opportunity to create a just and livable world.

WINNER OF THE MARK LYNTON HISTORY PRIZE • A prize-winning historian’s “effervescent” (The New Yorker) account of a close-knit band of wildly famous American reporters who, in the run-up to World War II, took on dictators and rewrote the rules of modern journalism “High-speed, four-lane storytelling . . . Cohen’s all-action narrative bursts with colour and incident.”—Financial Times NEW YORK TIMES EDITORS’ CHOICE • WINNER OF THE GOLDSMITH BOOK PRIZE • FINALIST FOR THE PROSE AWARD ONE OF THE BEST BOOKS OF THE YEAR: The New Yorker, Vanity Fair, NPR, BookPage, Booklist They were an astonishing group: glamorous, gutsy, and irreverent to the bone. As cub reporters in the 1920s, they roamed across a war-ravaged world, sometimes perched atop mules on wooden saddles, sometimes gliding through countries in the splendor of a first-class sleeper car. While empires collapsed and fledgling democracies faltered, they chased deposed empresses, international financiers, and Balkan gun-runners, and then knocked back doubles late into the night. *Last Call at the Hotel Imperial* is the extraordinary story of John Gunther, H. R. Knickerbocker, Vincent Sheean, and Dorothy Thompson. In those tumultuous years, they landed exclusive

interviews with Hitler and Mussolini, Nehru and Gandhi, and helped shape what Americans knew about the world. Alongside these backstage glimpses into the halls of power, they left another equally incredible set of records. Living in the heady afterglow of Freud, they subjected themselves to frank, critical scrutiny and argued about love, war, sex, death, and everything in between. Plunged into successive global crises, Gunther, Knickerbocker, Sheean, and Thompson could no longer separate themselves from the turmoil that surrounded them. To tell that story, they broke long-standing taboos. From their circle came not just the first modern account of illness in Gunther's *Death Be Not Proud*—a memoir about his son's death from cancer—but the first no-holds-barred chronicle of a marriage: Sheean's *Dorothy and Red*, about Thompson's fractious relationship with Sinclair Lewis. Told with the immediacy of a conversation overheard, this revelatory book captures how the global upheavals of the twentieth century felt up close.
