RadTool Nuclear Medicine MCQs

Horizon Books (A Division of Ignited Minds Edutech P Ltd)

This book, in MCQ format, is a comprehensive tool that will help Nuclear Medicine and Radiology residents and attending physicians to understand concepts in nuclear medicine. Questions cover clinical applications of nuclear medicine techniques to the cardiovascular, pulmonary, endocrine, skeletal, gastrointestinal, genitourinary, and central nervous systems. In addition, topics in physics, radiopharmacy, and radiation

safety are addressed. The MCQ format closely resembles that used in board examinations in nuclear medicine. Each question has four possible answers, only one of which is correct. About 60% of the questions are linked to clinical cases, with each case having four questions on average, along with one or two images. The remainder of the questions are free-standing, with or without an image. Answers are concise but are supported by references to the literature when necessary. Pearls in boxes are used to highlight the most important pieces of information. While the questions are scrambled, as in board exams, an index categorizes each question into one of the systems or topics.

Written to help haematology and general medical trainees evaluate their own knowledge, and particularly useful for those preparing for the Part 1 examination of the Royal College of Pathologists. This exam-centered book will also be of use to core medical trainees preparing for the examinations of the Royal College of Physicians and the Royal Australasian College of Physicians and to haematology and general medicine trainees in other countries where methods of examination are similar. The 150 questions are presented in two formats, Single Best Answer and Extended Matching Question, and comes complete with detailed

feedback and, when appropriate, relevant references are given for each question so that those who select the wrong answer will understand why another answer is better. Quick reference question book, ideal for examination preparation Includes 50 SBA questions, ideal for the Part 1 and Part 2 MRCP examinations, which although having a general medical slant, are also appropriate for haematology specialist trainees Includes 70 SBA multiple choice questions appropriate for haematology specialist trainees but also useful to core medical trainees Includes 30 EMQs suitable for those taking Part 1 of the FRCPATH examination Questions come complete with fully referenced answers and discussion points This book provides an educational tool for training as well as an ideal way to prepare for examinations and is also of value to those who examine in haematology and haematopathology.

MCQs Chemistry Academic Press

Among the wide variety of written methods of assessment, multiple choice questions (MCQs), especially the single best option variety, remain the staple of examinations administered to medical students. MCQs are used extensively by

medical schools and also in the initial steps of examinations by licensing bodies. Their logistical advantage of allowing testing of large number of students and broad sampling of topics in a relatively short time remains unchallenged by any other formats of written examinations. The format and wording of the stem of a MCQ, play an essential role in determining what is being assessed. In its simplest form a MCQ can ask about an isolated fact. Such a 'context-free' MCQ tests rote knowledge only. Higher order skills, such as interpretation and problem solving are best tested using a 'context-rich' stem, in which the question is embedded in a meaningful context. In medical subjects, context enrichment most often takes the form of a clinical vignette. The advantages of enriching the stem with a clinical vignette are two-fold. First, it allows for the assessment of higher order cognitive skills. Second, information is thought to be better recalled when the learning context is similar to retrieval context. In this book, MCQs are based on clinical vignettes. The clinical context will increase commitment of the student to acquire and retain basic knowledge of

medical biochemistry.

The chapter "Bioinformatics MCQs" covers topics of history, databases, and applications of bioinformatics. The chapter "Biological Membranes and Transport MCQs" covers topics of chemical composition and transport of membranes. The chapter "Biotechnology and Recombinant DNA MCQs" covers topics of DNA in disease diagnosis and medical forensics, genetic engineering, gene transfer and cloning strategies, pharmaceutical products of DNA technology, transgenic animals, biotechnology and society. The chapter "Cancer MCQs" covers topics of molecular basis, tumor markers and cancer therapy.

The chapter "DNA Replication, Recombination and Repair MCQs" covers topics of DNA and replication of DNA, recombination, damage and repair of DNA. The chapter "Environmental Biochemistry MCQs" covers topics of climate changes and pollution. The chapter "Free Radicals and Antioxidants MCQs" covers topics of types, sources and generation of free radicals. The chapter "Gene Therapy MCQs" covers topics of approaches for gene therapy. The chapter "Genetics MCQs" covers topics of basics, patterns of inheritance and genetic disorders. *Class 11-12 Biology MCQ PDF Book (Grade 11-12 Biology eBook Download)* Disha Publications

The second edition of Essentials of Biochemistry has been fully updated to provide medical students with a thorough understanding of the fundamentals of biochemistry. This comprehensive manual covers a multitude of topics within biochemistry, with chapters dedicated to specific diseases such as AIDS and cancer. Each chapter begins with an introductory abstract and keywords, and ends with multiple choice questions and answers to assist learning and revision. Key points

Thoroughly revised, new edition providing medical students with fundamentals of biochemistry Each chapter includes multiple choice questions and answers for revision Presents 290 images, illustrations, tables and flow charts Previous edition published in 2008

Neuro-Oncology Explained Through Multiple Choice Questions Oxford

University Press

Intensive care medicine is a dynamic and evolving specialty, requiring its practitioners to be part physician, physiologist and anaesthetist. This requires a firm foundation of knowledge and an ability to apply this to the clinical situation. This book contains 270 multiple-choice questions allowing self-assessment of the breadth of knowledge required of the modern intensivist. The book is divided into three papers each consisting of 60 multiple true false (MTF) and 30 single best answer (SBA) questions covering areas including resuscitation, diagnosis, disease management, organ support, and ethical and legal aspects of practice. The MTF questions test factual knowledge and understanding of the evidence base underpinning intensive care medicine, while the SBA questions test the ability of the candidate to prioritise, compete options and make the best decision for the patient. Each question is peer reviewed and accompanied by concise and detailed explanatory notes with references to guide further reading. All the authors are practising intensive care physicians with firsthand experience of professional

examinations in the specialty. This book will appeal to intensive care physicians approaching professional examinations worldwide, including the European Diploma, American Board and Faculty of Intensive Care Medicine examinations. In addition, it will appeal to intensive care nurses and allied healthcare professionals wishing to update their knowledge as part of continuing professional development, and to physicians sitting professional examinations in related specialties requiring knowledge of intensive care medicine such as general medicine, general surgery and anaesthesia. This new book will complement the existing international best-selling title 'Multiple Choice Questions in Intensive Care Medicine' (ISBN 978 1 903378 64 9), also written by Dr Steve Benington.

This book provides a broad overview of the topic Bioinformatics with focus on data, information and knowledge. From data acquisition and storage to visualization, ranging through privacy, regulatory and other practical and theoretical topics, the author touches several fundamental

aspects of the innovative interface between Medical and Technology domains that is Biomedical Informatics. Each chapter starts by providing a useful inventory of definitions and commonly used acronyms for each topic and throughout the text, the reader finds several real-world examples, methodologies and ideas that complement the technical and theoretical background. This new edition includes new sections at the end of each chapter, called "future outlook and research avenues," providing pointers to future challenges. At the beginning of each chapter a new section called "key problems", has been added, where the author discusses possible traps and unsolvable or major problems.

The thoroughly Revised & Updated 3rd Edition of Objective Chemistry Chapter-wise MCQ for JEE Main/ BITSAT/ NEET/ AIIMS is a collection of carefully selected MCQ's for Engineering and Medical entrance exams. The book follows the pattern and flow of class 11 and 12 syllabus as prescribed by NCERT. The unique feature of the new edition is the inclusion of new exam-centric questions and marking of questions into Critical Thinking; Toughnut & Tricky. The book contains 'Chapter-wise MCQs' which covers all the important concepts and applications required to crack the mentioned exams. The book contains 31 chapters covering a total of around 3000 MCQs with solutions. Also covers a chapter on Analytical Chemistry. The solutions to the questions is provided immediately after the chapter. The solutions have been prepared in a manner that a student can

easily understand them. This is an ideal book to practice and revise the complete syllabus of the mentioned exams. The book will help to give finishing touches to your preparation of each chapter.

Providing a clear explanation of the relevant medical science behind the individual medical specialties, Basic Science for Core Medical Training and the MRCP, is an indispensable part of a candidate's MRCP preparation. Directly linked to the Royal College exam, the book follows the same systems-based approach as the syllabus for accurate and effective revision. With full coverage of basic science for the medical specialities, the book features material on genetics, cellular, molecular and membrane biology, and biochemistry. Content is presented in an illustrated and easy-to-read format, ensuring that the basic science for each medical specialty is more approachable and accessible. A focus on how the basic sciences aid understanding of clinical practice is reinforced through key tables of differential diagnoses and pharmacology.

Ten multiple choice questions at the end of each chapter consolidate learning and enable candidates to test their knowledge.

The book also covers common examination errors and areas of misunderstanding to aid learning and help candidates avoid common pitfalls.

This fourth edition of the best-selling textbook, Human Genetics and Genomics, clearly explains the key principles needed by medical and health sciences students, from the basis of molecular genetics, to clinical applications used in the treatment of both rare and common conditions. A newly expanded Part 1, Basic Principles of Human Genetics, focuses on introducing the reader to key concepts such as Mendelian principles, DNA replication and gene expression. Part 2, Genetics and Genomics in Medical Practice, uses case scenarios to help you engage with current genetic practice. Now featuring full-color diagrams, Human Genetics and Genomics has been rigorously updated to reflect today's genetics teaching, and includes updated discussion of genetic risk assessment, "single gene" disorders and therapeutics. Key learning features include: Clinical snapshots to help relate science to practice 'Hot topics' boxes that focus on the latest developments in testing, assessment and treatment 'Ethical

issues' boxes to prompt further thought and discussion on the implications of genetic developments 'Sources of information' boxes to assist with the practicalities of clinical research and information provision Self-assessment review questions in each chapter Accompanied by the Wiley E-Text digital edition (included in the price of the book), Human Genetics and Genomics is also fully supported by a suite of online resources at www.korfgenerics.com, including: Factsheets on 100 genetic disorders, ideal for study and exam preparation Interactive Multiple Choice Questions (MCQs) with feedback on all answers Links to online resources for further study Figures from the book available as PowerPoint slides, ideal for teaching purposes The perfect companion to the genetics component of both problem-based learning and integrated medical courses, Human Genetics and Genomics presents the ideal balance between the bio-molecular basis of genetics and clinical cases, and provides an invaluable overview for anyone wishing to engage with this fast-moving discipline. *Intensive Care Medicine MCQs EduGorilla*

Molecular Diagnosis of Genetic Diseases

Bushra Arshad

This book provides a detailed overview of the latest developments in the rapidly evolving specialty of Neuro-Oncology arranged in approximately 500 questions arranged in multiple-choice and matching formats. It features insight into the latest World Health Organization classification of

central nervous system tumors and molecular genetics with information on how to apply a range of intraoperative adjuncts. Guidance on the latest therapeutic techniques such as stem-cell and immunotherapy in clinical practice is also discussed. To assist the reader in developing a deep understanding of the topics, the questions in all chapters are accompanied by relevant explanations to reinforce the key points covered. Neuro-Oncology Explained Through Multiple Choice Questions is a practical and up-to-date resource on how to diagnose, treat and manage a variety of disorders related to neuro-oncology. Its clear, easy-to-follow format and recognition of critical concepts make it an important resource for neurosurgical and oncology trainees preparing for certification examinations and the more experienced practitioners seeking an overview of the latest developments within the field.
