This long-awaited resource complements its companion volume on Classic Period monumental inscriptions. Authors Martha J. Macri and Gabrielle Vail provide a comprehensive listing of graphemes found in the Dresden, Madrid, and Paris codices, 40 percent of which are unique to these painted manuscripts, and discuss current and past interpretations of these graphemes. The New Catalog uses an original coding system developed for the Maya Hieroglyphic Database Project. The new three-digit codes group the graphemes according to their visual, rather than functional, characteristics to allow readers to see distinctions between similar signs. Each entry contains the grapheme's New Catalog code, an image, the corresponding Thompson number, proposed syllabic and logographic values, calendrical significance, and bibliographical citations. Appendices and an index of signs from both volumes contain images of all graphemes and variants ordered by code, allowing readers to search for graphemes by visual form or by their proposed logographic and phonetic values. Together the two volumes of the New Catalog represent the most significant updating of the sign lists for the Maya script proposed in half a century. They provide a cutting-edge reference tool critical to the research of Mesoamericanists in the fields of archaeology, art history, ethnohistory, and linguistics, and a valuable resource to scholars specializing in comparative

studies of writing systems and related disciplines.

The V W Golf was planned to be a worthy successor to the venerable Beetle, a move that required dynamic thinking and a clean drawing board if Volkswagen was to continue to hold its position as one of the top automobile manufacturers. Where the Golf differed from the crowd was its distinctive body design. For here was the world's first hatchback. When Volkswagen launched the Golf GTI, over thirty years ago, it could hardly have known the impact its compact and sporty model would have on the car-buying public. Through an uncertain birth to its class-topping iconic status of today, rarely does a new model of car make a whole new market segment for itself but the Golf was the original hot hatch, a car that others would copy but seldom equal.
