*Storying Later Life* Harper Collins

Canada's productivity expert returns with a totally fresh angle on how to do more with less. Throughout his experiments and research, Chris Bailey came across many little-known insights into how we focus (a key element of productivity), including the surprising idea that focus isn't so much a state of heightened awareness (as we'd assume), but a balance between two frames of mind. The most recent neuroscientific research on attention reveals that our brain has two powerful modes that can be unlocked when we use our attention well: a focused mode (hyperfocus), which is the foundation for being highly productive, and a creative mode (scatterfocus), which enables us to connect ideas in novel ways. Hyperfocus helps readers unlock both, so they can concentrate more deeply, think more clearly, and work and live more deliberately. Diving deep into the science and theories about how and why we bring our attention to bear on life's big goals and everyday tasks, Chris Bailey takes his unique approach to productivity to the next level in *Hyperfocus*, while retaining the approachable voice and perspective that made him a fast favourite.

NEW YORK TIMES BESTSELLER For the first time, Curtis "50 Cent" Jackson opens up about his amazing comeback—from tragic personal loss to thriving businessman and cable's highest-paid

executive—in this unique self-help guide, his first since his blockbuster New York Times bestseller *The 50th Law*. In his early twenties Curtis Jackson, known as 50 Cent rose to the heights of fame and power in the cutthroat music business. A decade ago the multi-platinum selling rap artist decided to pivot. His ability to adapt to change was demonstrated when he became the executive producer and star of *Power*, a high-octane, gripping crime drama centered around a drug kingpin's family. The series quickly became "appointment" television, leading to Jackson inking a four-year, \$150 million contract with the Starz network—the most lucrative deal in premium cable history. Now, in his most personal book, Jackson shakes up the self-help category with his unique, cutting-edge lessons and hard-earned advice on embracing change. Where *The 50th Law* tells readers "fear nothing and you shall succeed," *Hustle Harder, Hustle Smarter* builds on this message, combining it with Jackson's street smarts and hard-learned corporate savvy to help readers successfully achieve their own comeback—and to learn to flow with the changes that disrupt their own lives.

The international controversy (highlighted in Britain by the Bulger case) over the relationship between video nasties and crime is one that has a long prior history. Do books, films or magazines create a corrupting environment which encourages crime and moral decay? Dr. Springhall has written a highly perceptive and entertaining account of how commercial culture in Britain and America has been viewed, since its inception during the Industrial Revolution, as a force likely to undermine national morals. There has been wave after wave of scares: from the Victorian penny gaff theatres and penny dreadful novels to Hollywood gangster films, and American horror comics. A final chapter refers to video nasties, violence on television, 'gansta-rap' and computer games, each in turn playing the role of folk devils which must be causing delinquency. Why particular issues suddenly galvanize public attention, and why so many people have associated delinquency with entertainment, form the fascinating subjects of this groundbreaking book.

*Restoration of the Human Organism Through Concentration on Numbers* Peter Lang

In a world quickly becoming more virtual, human relations skills are being lost -- along with the skill of leadership. There is a vacuum of leadership in many of our major institutions: government, education, business, religion, the arts. This crisis has arisen in part because many of those institutions have been reinvented with the technological revolution we are experiencing. Scientific progress in general, and technological progress in particular, has been seen as a solution to many of our problems, and technology can distribute the answers to those problems far more quickly and efficiently across the globe. But in the midst of this technological boom, people are becoming isolated from each other. What's needed is a new type of leader -- one who can inspire and motivate others in the new virtual world while never losing sight of the timeless leadership principles. In this book, readers can learn all the secrets of leadership mastery: \* Gain the respect and admiration of others using little-known secrets of the most successful leaders. \* Get family, friends, and co-workers to do what you ask because they want to do it, not because they have to. \* Respond effectively when under crisis using proven techniques for thinking clearly and reducing anxiety under pressure. A valuable tool that stands next to the classic *How to Win Friends and Influence People*, *Leadership Mastery* offers a proven formula for success.

*The One Minute Manager Meets the Monkey* Berrett-Koehler Publishers

Adults often try to create a risk-free environment for children, but this can reduce their opportunities to manage their own risk, making it difficult for them to learn how to judge new situations. This practical guide shows how adults can share their own skills with young children and promote understanding of safety within an interesting learning environment. The first edition made a huge contribution to the debate around children and risk. Over ten years later, this new edition thoroughly re-examines the issues of the first edition and assesses recent developments such as risk-benefit analysis and the importance of outdoor experiences. Written for the full range of practitioners involved with children, it will support them to take the middle path of offering enough challenge to benefit children, while avoiding the extremes of over-protection or careless practice.
