Current Issues in  
Economic Integration

Editions Eyrolles

The permanent struggle for optimisation can be seen as one of the most

significant cultural principles of contemporary Western societies: the demand for improved performance and efficiency as well as the pursuit of self-improvement are considered necessary in order to keep pace with an accelerated, competitive modern-ity. This affects not only work and education, but also family life, parent-child relationships and intimate relationships in respect to the body and the self, in regard to the public as well as the private realm.

Bringing together contributions from renowned scholars from the fields of sociology, psychology and psychoanalysis, this book explores the impacts of optimisation on culture and psyche, examining the contradictions and limitations of optimisation, in conjunction with the effects of social transformations on individuals and shifts in regard to the meaning of 'pathology' and 'normality'. *Problèmes économiques*

Metaichmio Publications  
L'historien futur de la rue Notre-Dame devra me faire causer. Je lui fournirai des renseignements précieux, des souvenirs piquants (...) car la rue Notre-Dame se dépouille de sa vieille physionomie, la rue Notre-Dame des anciens jours s'en va rapidement. Elle n'est plus étroite et resserrée sur tout son parcours ; le chemin de fer urbain augmente le nombre des passants, trouble les conciliabules des flâneurs au coin des rues, et leur donne le

scandale de la vitesse. (...) Que de souvenirs dans cet étroit espace, que de flâneurs y ont promené leur curiosité, leurs caprices, leurs ennuis. Demandez à vos grands-parents qui voguent dans les eaux de la soixantaine sous pavillon neutre, comme on y flânait autrefois, plus gaiement, plus familièrement qu'aujourd'hui. La ville n'avait alors qu'une rue, la rue Notre-Dame, il y avait une rivière dans la rue Craig ; on allait à la chasse rue Sherbrooke ; il

fallait être armé jusqu'aux dents pour se risquer vers le Beaver Hall. L'été on faisait des parties de canots, de la Place-Viger au Griffintown ; on pouvait pêcher à la ligne Place-à-Foin.

### **Wages, Bonuses and Appropriation of Profit in the Financial Industry**

Primento  
Les crises financières ne constituent pas des accidents insignifiants. Elles nous parlent de notre économie. Elles en révèlent, brutalement, les mécanismes et les défauts. Pédagogique, ce

guide décrypte les grandes crises, sans oublier la crise de **L'alter management (RTAMST)** Armand Colin  
La monnaie est une construction sociale qui permet aux hommes d'échanger plus facilement. Vous découvrirez dans cet ouvrage les conditions de sa création et de sa diffusion à travers l'expérience des sociétés monétaires. À mesure de l'expansion des échanges, vous observerez que ses formes et son contrôle ont

évolué. Aujourd'hui surgissent des cryptomonnaies. • Quelle est leur nature ? • Comment les banques centrales peuvent-elles assurer aujourd'hui la redistribution d'une quantité de monnaie adéquate ? • Comment éviter qu'un excès d'émission n'engendre une forte inflation ou des bulles financières ? • Comment sortir d'une situation de déflation et de déclin de l'activité grâce au crédit ? • De quels moyens les banques centrales disposent-elles

pour lutter contre l'inflation ?

### **La dissertation**

**d'économie** Cambridge University Press  
This book is a study of the response that the police take to modern urban riots. It takes a principally police perspective on the lead-up to a riot, the police response, and the evaluation of the police response. The book is based on the development and analysis of four extensive case study riots: France 2005, London 2011, Ferguson 2014, and Baltimore

2015. The methodological approach to the case studies is comparative and includes an interactive framework that incorporates a number of key variables. These variables examine how each riot began, how they developed, the response strategies and tactics used by the police, and how the riots eventually ended. The first section looks at defining riots and examines the riot literature and research to date. The second section analyses the current

police response to rioting. The third and final section includes an analysis and comparison of the case study riots, along with an examination of how the police response to riots could be improved. With its focus on police practices, this unique volume will be useful for researchers, students, police, law enforcement, and policy makers.

#### The European Debt Crisis

Pontificia Universidad Jave  
Recent events in the global financial markets and macro economies have served as a strong

reminder for a need of a coherent theory of capitalist crisis and analysis. This book helps to fill the gap with well-grounded alternative articulations of the forces which move today's economic dynamics, how they interact and how ideas of foundational figures in economic theory can be used to make sense of the current predicament. The book presents a comprehensive collection of reflections on the origins, dynamics and implications of the interlinked crises of the

U.S. and global economies. The book is a thoughtful collaboration between Japanese heterodox economists of the Japan Society of Political Economy (JSPE) and non-Japanese scholars. It provides a unique immersion in different, sophisticated approaches to political economy and to the crisis. The book illustrates with the understanding of Marx's crisis theory and how it can serve as a powerful framework for analyzing the contemporary sub-prime

world crisis. The book explains the subprime loan crisis as a crisis in a specific phase of the capitalist world system and concludes that it is a structural one which destroys the existing capital accumulation regime. It pays attention to structural changes and to how these changes beget profound and controversial consequences. The result is a must-read - one which truly contributes to the resurgence of radical analyses of the political economy, free from the

market optimism of the main-stream economics. *Analyse économique et historique des sociétés contemporaines* De Boeck Supérieur Bilingual Dictionary of Terms Banks. Finances. Money. Financial Markets / Banques. Finances. Monnaie. Marchés Financiers METODES Editions Collection Culture & Savoir (C&S) François Elandi This bilingual work, fruit of a team of specialists and professionals, deals with banking, finance, and stock market practices

with — more than 25,000 words and terms used in French and in British and North American English of today; — convenient examples to better assimilate the terms used, contributing to make the work the most precise reference in its specialty; and — a cross-reference system to more precise definitions and complementary expressions to other words and terms inside the development of a word or an expression. It is intended for —high

school pupils and students of higher education, —professional users, and —the general public. In order for them to —acquire and develop their professional lexicological heritage; —master the exact terminology in the practice linked to their activity or profession; —perfect their knowledge in banking, finance, and stock exchange practice; and —better communicate efficiently. Cet ouvrage bilingue, fruit d'une équipe de spécialistes et

de professionnels, traite des pratiques bancaires, financières et boursières, avec : —Plus de 25000 mots et termes utilisés en français et en anglais britannique et nordaméricain ; —Des exemples pratiques pour mieux assimiler l'emploi de ces termes, contribuant à faire de l'ouvrage la référence la plus précise dans sa spécialité ; —Un système de renvois à des définitions et explications complémentaires et plus précises à d'autres mots et termes au sein du

développement d'un mot ou d'une expression. Il est destiné : —A l'élève des lycées et collèges ou à l'étudiant de l'enseignement supérieur ; —A l'utilisateur professionnel ; —Au grand public. Pour : —Acquérir et développer son patrimoine lexicologique professionnel ; —Maîtriser la terminologie exacte dans la pratique liée à son activité ou à sa profession ; —Perfectionner ses connaissances dans la pratique bancaire,

financière et boursière ;  
 —Mieux communiquer  
 efficacement.  
*Cette fois, c'est différent*  
 Pearson Education France  
 The Marketization of  
 Religion provides a novel  
 theoretical understanding  
 of the relationship  
 between religion and  
 economy of today's world.  
 A major feature of today's  
 capitalism is  
 'marketization'. While the  
 importance that  
 economics and  
 economics-related  
 phenomena have  
 acquired in modern  
 societies has increased

since the consumer and  
 neoliberal revolutions and  
 their shock waves  
 worldwide, social sciences  
 of religion are still lagging  
 behind acknowledging the  
 consequences of these  
 changes and  
 incorporating them in  
 their analysis of  
 contemporary religion.  
 Religion, as many other  
 social realities, has been  
 traditionally understood  
 as being of a completely  
 different nature than the  
 market. Like oil and  
 water, religion and the  
 market have been mainly  
 cast as indissoluble into

one another. Even if  
 notions such as the  
 marketization,  
 commoditization or  
 branding of religion and  
 images such as the  
 religious and spiritual  
 marketplace have become  
 popular, some of the  
 contributions aligned in  
 this volume show how this  
 usage is mostly  
 metaphorical, and at the  
 very least problematic.  
 What does the  
 marketization of religion  
 mean? The chapters  
 provide both theoretical  
 and empirical discussion  
 of the changing dynamics

of economy and religion in today's world. Through the lenses of marketization, the volume discusses the multiple, at times surprising, connections of a global religious reformation. Furthermore, in its use of empirical examples, it shows how different religions in various social contexts are reformed due to growing importance of a neoliberal and consumerist logic. This book was originally published as a special issue of the journal Religion.

*Histoire de Montréal et de sa région* Routledge  
Financialization is one of the most innovative concepts to emerge in the field of political economy during the last three decades, although there is no agreement on what exactly it is. Profiting Without Producing puts forth a distinctive view defining financialization in terms of the fundamental conduct of non-financial enterprises, banks and households. Its most prominent feature is the rise of financial profit, in part extracted from

households through financial expropriation. Financialized capitalism is also prone to crises, none greater than the gigantic turmoil that began in 2007. Using abundant empirical data, the book establishes the causes of the crisis and discusses the options broadly available for controlling finance.

**Au défi de la crise pour une gouvernance mondiale des économies**

Armand Colin  
Gaël Giraud y Cécile Renouard formulan 20 postulados

controversiales para generar cambios profundos en los sistemas financieros internacionales, como solución a la crisis económica mundial; la principal consecuencia de la caída del mercado de finca raíz de los Estados Unidos en el 2008. Este libro plantea modificaciones fundamentales a los modelos económicos e invita a considerar el rol de la responsabilidad social y ambiental de las empresas y a fijar límites a la expansión de la

esfera del mercado. Post-growth Economics and Society Cambridge Scholars Publishing  
The definitive report on what caused America's economic meltdown and who was responsible  
The financial and economic crisis has touched the lives of millions of Americans who have lost their jobs and their homes, but many have little understanding of how it happened. Now, in this very accessible report, readers can get the facts. Formed in May 2009, the Financial Crisis

Inquiry Commission (FCIC) is a panel of 10 commissioners with experience in business, regulations, economics, and housing, chosen by Congress to explain what happened and why it happened. This panel has had subpoena power that enabled them to interview people and examine documents that no reporter had access to. The FCIC has reviewed millions of pages of documents, and interviewed more than 600 leaders, experts, and participants in the

financial markets and government regulatory agencies, as well as individuals and businesses affected by the crisis. In the tradition of The 9/11 Commission Report, "The Financial Crisis Inquiry Report" will be a comprehensive book for the lay reader, complete with a glossary, charts, and easy-to-read diagrams, and a timeline that includes important events. It will be read by policy makers, corporate executives, regulators, government agencies, and the American people.

*Lost in Perfection* Xlibris Corporation  
Un ouvrage richement documenté qui revient sur les manquements réglementaires d'avant-crise et l'urgence d'une plus grande transparence à l'égard des épargnants et des investisseurs. La gravité de la crise financière ne signifie pas que les cadres juridiques antérieurs fussent totalement exempts de « diligences régulatrices ». L'étude de ses causes laisse plutôt penser que la régulation du système financier était défailante

dans ses paramètres et son application. De ce point de vue, la crise peut être perçue comme une crise de la régulation. Or, le système financier appelle une régulation spécifique en raison des caractéristiques des marchés qui le composent (banque, finance, assurance), complexes, innovants, globaux et interconnectés, donc menacés du risque systémique. Ce dernier justifie que les pouvoirs publics accomplissent de nouveaux efforts de régulation « systémique

», associant réglementation et supervision, pour, en termes de périmètre et d'objectifs, embrasser un paradigme «macroprudentiel» et renforcer la transparence et la protection du consommateur. Ces orientations sont décrites puis illustrées par les réglementations récentes européennes et américaine (Dodd-Frank), dont sont évalués les apports et/ou les effets pervers, relatives notamment : aux normes prudentielles ; aux

institutions d'importance systémique ; aux nouvelles architectures de supervision nationale, européenne et internationale ; à la transparence des produits dérivés, des plateformes de négociation et du système bancaire de l'ombre ; aux agences de notation ; aux stress tests ; aux abus de marché ; au trading à haute fréquence ; aux moyens et pouvoirs accrus offerts aux régulateurs ; et à la séparation entre banque de dépôts et banque d'investissement. Un

ouvrage de référence sur un sujet complexe en perpétuelle évolution. À PROPOS DE L'AUTEUR Docteur en droit, Margot Sève est avocate au sein du cabinet Skadden, Arps, Slate, Meagher & Flom LLP et membre du comité éditorial du Journal of Regulation. En 2012, elle soutient sa thèse à la Sorbonne " La régulation financière après la crise". À PROPOS DE L'ÉDITEUR Larcier Group, composé des marques d'édition juridique prestigieuses que sont Larcier, Bruylant, Promoculture-Larcier,

propose des solutions documentaires adaptées aux besoins spécifiques de tous les professionnels du droit belge, luxembourgeois et français (avocats, magistrats, notaires, juristes d'entreprise,...). Fournisseur historique et privilégié de toutes les sources du droit, son offre éditoriale est composée, notamment, de la base de données juridique la plus complète de Belgique (Strada lex), de plus de 300 nouvelles monographies par an, plus de 70 revues

juridiques, plusieurs collections de Codes, de logiciels de calculs et d'un riche catalogue de formations. Larcier Group est l'éditeur numéro 1 dans le segment juridique en Belgique. À côté de ce segment juridique, Larcier Group s'adresse également aux professions économiques et aux professions RH en Belgique avec sa marque Larcier Business et son offre éditoriale principalement numérique.  
Journalistic Translation Research Goes Global

INSEE  
We stand on the threshold of a "post-growth" world - one in which the relentless pursuit of economic growth has ceased to constitute a credible societal project. The symptoms that mark the end of an era are clear and incontrovertible: a return to the regularities of the past is illusory. The pursuit of economic growth no longer constitutes a credible societal project for ecological, social, and geopolitical reasons. Edited by an impressive

array of experts, this book identifies several areas in which we must fundamentally rethink our societal organisation. They ask what it means to abandon the objective of economic growth; how we can encourage the emergence of other visions to guide society; how global visions and local transition initiatives should be connected; which modes of governance should be associated with the required social and technological innovations. Alongside the necessary

respect of ecological limits and equity in distribution, the promotion of autonomy (involving all in the building of socio-political norms) could serve for guidance. The topics addressed over the chapters range from the future of work to the de-commodification of economic relations; the search for new indicators of progress to decentralized modes of governance; and from the circular economy to polycentric transitions. Each contribution brings a

unique perspective, a piece of a larger puzzle to be assembled. *Post-growth Economics and Society* is an important volume to those who study ecological economics, political economy and the environment and society. It invites theorists as much as practitioners to re-explore the roots of our societal goals and play an active role in the systemic shift to come. *Ponzi Scheme* Routledge Drawing on a variety of theoretical concepts and methods, this book

addresses the interface between language, politics and translation. The contributors analyse the role, practice and impact of journalistic translation in Canada, China, Arab countries, France, Spain, the Ukraine, Finland and Serbia. The introductory chapter surveys the evolution of journalistic translation research during the period 2015-2020. The chapters that follow delve into the role of language and translation in news production with a specific

focus on the connections with politics and power. The authors analyse Canadian newspapers in French and English during the subprime crises, the representation of Muslims in three European newspapers in the aftermath of Nice terrorist attacks, the translation of Donald Trumps' tweets in Spain, the role of evaluation in opinion articles in the Ukraine, the use of reported speech in Finnish articles, the translation of Donald Trump's offensive comments into Arabic and

so on. In the discussions, the authors draw on functional grammar, critical discourse analysis, Appraisal theory and pragmatics. This volume will appeal to all those interested in the ways translation shapes media constructions of news events and showcases the centrality of journalistic translation research as a dynamic subfield within translation studies. The chapters in this book were originally published as a special issue of the journal *Perspectives: Studies in Translation*

Theory and Practice.

**Dictionnaire de science économique** Bréal

Using a variety of theoretical frameworks drawn from the social sciences, the contributions in this edited collection offer a critical perspective on the dominant paradigms used in contemporary financial activities. Through a detailed study of the organisation and functioning of financial intermediaries and institutions, the contributors to this volume analyse 'finance

in the making', by shedding light on the structuring of banking and financial systems, on their capacity to prescribe action and control, on their modes of regulation and, more generally, on the process of financialisation.

Contributions presented in this volume have been written by authors working within the 'social studies of finance' tradition, a research programme that emerged twenty years ago, with the aim of addressing a diversity of financial

fieldworks and related theoretical questions. This book, therefore, sheds light on different areas that are representative of contemporary financial realities. Specifically, it first studies the work of financial employees: traders, salespeople, investment managers, financial analysts, investment consultants, etc. but also provides an analysis of a range of financial instruments: financial schemes and contracts, financial derivatives, socially responsible investment

funds, as well as market rules and regulations. Finally, it puts into perspective the organisations contributing to this financial reality: those developing and selling financial services (retail banks, brokerage houses, asset management firms, private equity firms, etc.), and also those contributing to the regulation of such activities (banking regulators, financial market authorities, credit rating agencies, the State, to name a few). Each text

can be read without any specific knowledge of finance; the book is thus addressed to anyone willing to better understand the intricacies of contemporary financial realities.

The Marketization of Religion Routledge

The 2008 financial crisis led the whole world to ask questions of the financial industry. Why are wages in the financial industry so high? Are bonuses responsible for the financial crisis? Where do bonuses come from? Politicians and others

urged people to believe that the crisis was the price of Wall Street's greed and blamed the "bonus culture" prevalent in the financial industry. However, despite widespread condemnation and the threat of tighter regulation, bonuses in the industry have proven remarkably resilient. Wages, Bonuses and Appropriation of Profit in the Financial Industry provides an in-depth inquiry into the bonus system. Drawing on examples from France, the City and Wall Street, it

explains how and why workers in the financial industry can receive such large bonuses. The book examines issues around incentives, morality and wealth-sharing among employees, including the rise of "the working rich" – those who have benefited the most from the high wages and large bonuses on offer to some employees. These people have achieved wealth through their work thanks to new forms of exploitation in our ever-more dematerialised economy. This book

shows how the most mobile employees holding the most mobile assets can exploit the most immobile stakeholders. In a world where inequalities are rising sharply, this book is therefore an important study of one of the key contemporary issues. It will be of vital interest to those studying finance, banking or political economy. The Making of Finance PublicAffairs  
The current economic crisis has called into question the long term viability of the decoupling

between multinational firms and the banking system. It has also cast serious doubts on the US dollar-centred monetary system, and invited reassessment of the long term viability of US-China economic relations based on a US current account deficit absorbed by Chinese financial institutions. It is also an opportunity to analyse the rise in property prices, particularly in fast-growing economies. Long term food security is also an issue, bringing to the fore the multinational

firms from emerging economies (such as China and India) and calling into question the response strategies of multinational firms from the West and Japan. This book engages these key issues within the broad theme of integration, to give an up-to-date consideration of the subject, opening debate on the future stimulating role that Asia could play vis-à-vis the West, particularly the European Union.

**The Financial Crisis  
Inquiry Report,  
Authorized Edition**

Presses de l'Université  
Laval

La science économique progresse à travers les débats qu'elle engage. L'économie, a fortiori internationale, repose essentiellement sur l'analyse de faits économiques et sociétaux vécus. Loin de la spéculation artificielle sans prise sur le réel, René Sandretto a fait sienne la prescription bergsonienne : « Il faut

agir en homme de pensée et penser en homme d'action ». Ce disciple de François Perroux appartient aussi à cette catégorie d'universitaires capables de conjuguer les exigences de la coopération académique avec la nécessité de prendre en considération les situations et les besoins des hommes, de tous les hommes, là où ils se trouvent. René Sandretto a accompli des dizaines de missions de terrain en Afrique, en Asie et en Amérique, en partenariat avec les États,

les institutions internationales ou la société civile, apportant la preuve que la science économique peut être utilement mise au service de l'action. Nourris par tant de voyages, de rencontres et d'échanges, ses travaux livrent les clés d'une compréhension lucide des phénomènes économiques contemporains. Trente auteurs universitaires (européens, africains, américains) et professionnels de diverses institutions internationales ont choisi

de lui rendre hommage dans ce livre collectif et pluridisciplinaire. Ils ont en commun d'avoir collaboré avec René Sandretto. Tous témoignent ici de la fécondité de sa pensée... Sous la direction de Lahsen Abdelmalki, Jean-Pierre Allegret, Florence Puech, Mustapha Sadni Jallab, Ahmed Silem.

**The Globalization of Gender** Routledge

Alors même qu'elle n'a pas encore épuisé ses développements propres, la crise financière s'est déjà dépassée elle-même.

Elle s'est dépassée économiquement en une récession meurtrière. Elle s'est dépassée politiquement car le dérèglement financier finit par apparaître pour ce qu'il est vraiment : le symptôme d'un dérèglement d'une tout autre nature et d'une tout autre échelle. C'est un modèle d'ensemble qu'une sorte de « catalyse par les points extrêmes » rend d'un coup visible, et surtout odieux. Comment la société a-t-elle pu tolérer si longtemps de tels niveaux d'inégalités ?

Pourquoi a-t-il fallu atteindre le point d'obscénité de l'enrichissement de la finance pour produire enfin une mise en question ? Quelles forces ont œuvré si longtemps à installer et défendre pareille configuration du capitalisme ? Et aussi, maintenant, quelles sont les voies de sortie, à quelles transformations radicales faut-il procéder ? Le livre fait des propositions. De la refonte totale des structures bancaires en un « système socialisé du

crédit » jusqu'au desserrement des deux contraintes qui écrasent le salariat - celle de la rentabilité actionnariale et celle de la concurrence internationale sans rivage -, il s'agit de saisir l'opportunité historique d'une « nouvelle donne »,

seule à même de dénouer une crise sociale extrême. Frédéric Lordon est directeur de recherche au CNRS ; ses travaux portent sur le capitalisme financiarisé. Il développe également un programme de recherche spinoziste

en sciences sociales. Derniers ouvrages publiés : *Conflits et pouvoirs dans les institutions du capitalisme* (dir.), Presses de Sciences Po, 2008 ; *Jusqu'à quand ? Pour en finir avec les crises financières*, *Raisons d'agir*, 2008.
