Book Verdict "Shaking the world" doesn't refer to  
*Eruptions that Shook the World* by Clive Oppenheimer

Looking back at the 2022 eruption that shook the world  
*Eruptions that Shook the World* - Cambridge University Press  
His research looks at the gases that come out of volcanoes, and  
what they tell us about how volcanoes erupt He is happiest when  
pointing spectrometers into the maw of Erebus volcano in  
Antarctica and reading the pulse of the lava lake

[Yellowstone Supervolcano Eruptions Were Even More Explosive](#)  
Emphasizes how the largest scale impacts of eruptions can reach  
across a whole continent, covering it in ash, or change the global  
climate and temperatures Links more broadly to the management  
of risks at the scale of global natural hazards Read more
