Singapore National Bibliography

Routledge

Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography.

It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching, and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum, as well as to initial teacher education, the new edition considers the current debates around

what we mean by geographical knowledge, and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school-based initial teacher education in mind, Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of Learning to Teach Geography in the Secondary School... 'This is a practical and visionary

book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work...a standard reference for many beginning teachers on geography initial teacher training courses.' - Educational Review

These revision guides are the ideal

complement to Heinemann 16-19 Geography. Separate books for AS and A2 provide the right level of support and exactly cover the information and skills students need to succeed.

Geography Paper 2 : Learn and Practise
Routledge

This book showcases some of the best digital library practices from organizations in the Asia Pacific. Particular emphasis has been placed on the design, use and usability of digital libraries. In addition to digital libraries, it also examines related technologies, the management of knowledge in digital libraries, and the associated usability and social issues surrounding digital libraries. The book will benefit practitioners, researchers, educators and policy makers from a variety of

disciplines. In particular developers/designers of digital libraries, librarians, users and researchers will all find this collection of case studies a valuable tool.

Curriculum for High Ability Learners
Routledge

Originally published in 1967, this book addresses the teaching of various kinds of geography to secondary school students.

Malaysian Journal of Tropical Geography Trafford Publishing

These collections of the official past papers of the GCE O Level Examinations from the University of Cambridge International Examinations has been developed for students of GCE O level. These books will act as tools for preparation and revision for students.

These books have an edited Answer Guide for each paper based on the marks scheme written by CIE Principal *Sessional Papers* World Scientific. The author paints the rural geographical and sociological environment in which he was raised and highlights the careful parental care and the early death of his mother at the age of 32 years. He was then 12 years old and his siblings 8, 5, and 3 years old. This provides the base from which traditional and western education were pursued with determination and vision as the source of progress and power, thanks to the encouragement of his father. Armed with a liberal and professional education, Ejedepang-Koge, a teacher through and through, his autobiography reads like a book on the education and constitutional

changes in Cameroon. He served and successively as a teacher, Head of Service, Deputy Director in both the Departments of Private and Secondary Education, Director of Education of Private Education in the Ministry of National Education and, in Diplomatic Service as Cultural Counsellor in the Embassy of Cameroon in Washington DC. By virtue of such services, he mirrors beautifully the joys and pains of a conscientious and patriotic civil servant striving to do his duty honestly and refusing to be discouraged and thwarted.

**GCE O Level Secondary Three
Express/gifted Physical Geography**

Heinemann

Given the increasing speed of change and the information explosion around

the world, this book draws attention to the practice of teaching for conceptual understanding, which has been heralded as an effective approach within many curriculum frameworks. This book is pivotal in documenting and analyzing efforts in creating concept-based curriculum and pedagogies for high ability learners. Contributors of this book discuss key concepts and trends in their curriculum development efforts for high ability learners, as well as the challenges and solutions in their work. Drawing from a wide group of educators – practitioners, curriculum writers, administrators and researchers – this book has assembled together a range of perspectives on the processes, outcomes and implications of using concept-based curriculum and

pedagogies in a dynamic educational landscape. These informed perspectives highlighted by the contributors will prove insightful and inspirational to practitioners, policy makers and other stakeholders alike.

Reflective Teaching of Geography

11-18 Macmillan International Higher Education

The papers in this volume relate to the nature and conditions of classroom learning, with particular emphasis on the cognitive aspects. They are concerned with the question of concept formation and stress the importance of the teacher's function in ensuring that the child really has assimilated the ideas and not merely the words for the concepts. The role of language is fundamental to this theme, and the interaction of

language, thinking and learning is dealt with in the first section of the book. This section also provides a context within which subsequent discussions of classroom learning problems can be viewed. Some problems concerning the elaboration of a general theory of teaching are then examined with particular reference to possible methods of bridging the gap between research and implementation.

[Classified Questions Topic by Topic for Progressive Revision Latest Examination Question Paper for Practice Springer](#)

The first book to explore the development of Singapore's much-talked-about education and examination system, this volume juxtaposes examinations with its immediate context of education and wider context of

politics, economy and society. The study covers three broad historical periods: Examinations in Singapore from 1891 to 1945; The Post-War Years from 1946 to the 1970s; and Charting Our Destiny from the 1980s to 2007. In the British period up to 1941, the local examinations were conducted by the vernacular schools, and external examinations by the University of Cambridge Local Examinations Syndicate. There was a lack of systematic effort to establish a uniform system of education and examinations. During the Japanese Occupation, examinations were conducted by the Japanese authorities and, unexpectedly, the Cambridge examinations continued in the Sime Road Camp. In the post-war period and particularly after Singapore

was granted self-government, the establishment of a national education system was followed by the emergence of national examinations: the Primary School Leaving Examinations and the Singapore-Cambridge GCE N/O/A Levels for every school-going child in Singapore. Thereafter, the nature of national examinations evolved with the changing needs of education and the nation. At the turn of the century, with the Ministry of Education's decision to take greater control of examinations, the Singapore Examinations and Assessment Board was established, to oversee new developments in examinations. Unlike most literature on education where examinations are often mentioned as an outcome of educational goals and objectives, this book focuses on

examinations per se. Examinations have gained a momentum of their own, and it is interesting to note the development of examinations against the backdrop of the broader history of Singapore and of education in Singapore. Sample Chapter(s). Chapter 1: Trace the development of examinations in Singapore during the British colonial period up to 1941. (3,043 KB). Examinations in Singapore book Launch (124 KB). Contents: Examinations in Singapore (18910Co1945): Trace the Development of Examinations in Singapore During the British Colonial Period Up to 1945; Assess the Impact of the Japanese Occupation on Examinations in Singapore; What was the Significance of the School Certificate Examination Held in the Sime Road

Camp During the Japanese Occupation?; The Post-War Years (19460Co1970s): Assess the Development of Education and Examinations From the End of the Japanese Occupation to the Attainment of Self-Government in Singapore; Why and How Effective Were the Measures Undertaken by the Singapore Government to Establish Central Control Over Education and Examinations in Singapore in the 1960s0Co1970s?; The 1961 Examination Boycott Illustrates the Challenges in Forging a National System of Examinations. Do You Agree?; Charting Our Own Destiny (1980s0Co2007): How Effective had the Goh Keng Swee's Reforms in Education and Examination Been in Improving Singapore's Education System?; Examine the Key Policy Changes in

Singapore's Education and Examinations in Response to the Challenges of a Rapidly Changing and Globalising world; OCyChange is More Important than Continuity in Education and ExaminationsOCO Discuss. Readership: Academics and professionals in education and assessment; general readership."

'O' Level G.C.E. -M.C.E. November Papers Xlibris Corporation

This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher educators and bridge both theory and practice. The writers focus on the

continuities, whilst setting them in the context of the changing curriculum. The book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and learning, and includes chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

 Guides: Biology India Edition
 From the City of London to the deserts of
 Arabia, the former Soviet states, and
 sub-Saharan Africa, this book traces the
 life and career of a man who has been a
 banker in some remarkably challenging
 environments over a period of half a
 century. The author has counted bales of
 cotton in Yemen, dodged Israeli bombs
 in Lebanon, financed exports from
 Romania in the days of Ceausescu, been
 a banker to a member of a ruling family
 in the Gulf, conducted business in the
 sauna of a bank in Kazakhstan, and met

Her Majesty Queen Elizabeth II. In his
 spare time, he has taken an active part
 in amateur theater groups in the
 countries in which he has lived, served
 as a member of committees
 administering cemeteries, and been a
 warden appointed by the British
 Embassy to assist their citizens in times
 of trouble. As well as being an
 engrossing story of banking in many
 varied countries, the book includes
 chapters about the background to the
 problems of some of the places in which
 he has worked that show a clear
 understanding of the history and politics
 involved. Having lived in the Middle East
 for much of his life, he comments on the
 Arab Spring, and his long and diverse
 banking career has enabled him to write
 incisively on events in the industry in

recent years. He draws conclusions on both of these momentous stories.

Meeting Standards and Applying Research Routledge

'Because of the insights offered the book under review should be compulsory reading for Ministers of Education and educational planners as well as for students of educational reform. They would find it readable, informative and disturbing. This could well become a classic account of why innovations fail. - Keith Watson, Department of Education Studies and Management, University of Reading Educational investment is now back at the top of the development agenda. The World Conference on Education for All confirmed the commitment of national governments and donors to provide opportunities for

all children to enrol in school and reach minimum levels of achievement. This book takes a new look at the problems that confront politicians, planners, curriculum developers and teachers in implementing educational innovations in developing countries. The insights into theory and practice that emerge provide the intellectual yeast for the development of effective innovation strategies for the next decade.

Model Answers A&C Black

Reissuing works originally published between 1971 and 1994, this collection includes books which offer a broad spectrum of views on curriculum, both within individual schools and the wider issues around curriculum development, reform and implementation. Some cover the debate surrounding the

establishment of the national curriculum in the UK while others are a more international in scope. Many of these books go beyond theory to discuss practical issues of real curriculum changes at primary or secondary level. The Set includes books on cross-curricular topics such as citizenship and environment, and also guidance, careers, life skills and pastoral care in schools. A fantastic collection of education history with much still relevant today.

Educational Innovation in Developing Countries Graphic Communications Group

Teaching and Learning Foreign Languages provides a comprehensive history of language teaching and learning in the UK from its earliest

beginnings to the year 2000. McLelland offers the first history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics

including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, *Teaching and Learning Foreign Languages* will appeal to academics and postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers

and curriculum developers.

Routledge Library Editions: Education Mini-Set E: Educational Psychology 10 vol set IGI Global

This book introduces students of education to the elements of educational psychology. It also relates as closely as possible the findings of research to classroom practice. In order to make clear the fundamental processes involved in psychological development, the book starts with a study of the way in which the young child adapts its behaviour to its environment. This study considers some of the key aspects of physical development, mainly the central nervous system. At the same time the way physical growth and psychological development are influenced by the experience of the

individual is also discussed. This discussion of development is followed by an examination of the processes of learning, with particular attention paid to the works of Piaget. The salient points of each chapter are brought together in a summary which may be used by the reader to obtain a preliminary overview of the content of the chapter, and as an aid to revision.

My Roots- an Autobiography A&C Black
Do names have meaning? Is there a relationship between the meaning of a name and the purpose of one's life? Can the name of a person tell his or her life story? Can the experiences of a person present useful life lessons? Most names of African origin have meaning. A lot of people name their children after good people so that the children will turn out

to be good citizens. Several biographies and autobiographies have been written; but in this book the author seeks to draw an association between the meaning of his name and the purpose of his life, using his lived experiences-both negative and positive to present useful lessons to people, especially, the younger generation. The author views life as a journey, involving experiences that are not captured by resumes and profiles of people. In 30 Chapters, the author tells his life story from both Africa and the United States of America to present useful lessons to be explored to improve human life. In this book-Enough to be Shared: A Purpose-Driven Name-A Vivid Life Story Application of George Appiah-Sokye; the author responds to requests for mentorship from both

current and prospective accounting students in particular; as well as, the younger generation and Africans in the Diaspora in general. It is hoped the reader will find the contents of this book very useful.

Learning to Teach Geography in the Secondary School Springer

This book constitutes the refereed proceedings of the 6th International Conference on Asian Digital Libraries, ICADL 2003, held in Kuala Lumpur, Malaysia in December 2003. The 68 revised full papers presented together with 15 poster abstracts and 3 invited papers were carefully reviewed from numerous submissions. The papers are organized in topical sections on information retrieval techniques, multimedia digital libraries, data mining

and digital libraries, machine architecture and organization, human resources and training, human-computer interaction, digital library infrastructure, building and using digital libraries, knowledge management, intellectual property rights and copyright, e-learning and mobile learning, data storage and retrieval, digital library services, content development, information retrieval and Asian languages, and metadata.

The Teaching of Geography Springer Science & Business Media

These papers aim to provide a substantial review of the literature pertaining to a comprehensive range of traditional and contemporary research paradigms and research methods. The book is designed as a reference work for novice researchers in the fields of

geographical and environmental
education.
