Koli is a great white pup born into the ocean world to explore and live on his own. Koli learns valuable

lessons about what to eat and the dangers of venturing into the depths of the ocean before he is ready to fend

for himself. A factually based fictional book gives children the opportunity to learn about the great white shark while connecting with a lovable character. The "All About Koli" section beautifully illustrates shark facts so children can relate in terms that they can understand.

W. Brett Wilson, Dragons' Den co-star and Risky Business host, often gets asked

about his secrets to success. He became one of Canada's top investment bankers because he was driven, willing to take risks and saw opportunity where others saw roadblocks. But along the path to business success, he tripped over a multitude of misguided priorities. For many years, Wilson pursued business with uncompromising focus, working long hours, seven

days a week. In the process, his marriage and his health suffered greatly: he was rarely home as his children were growing up, divorce became inevitable and cancer struck at age forty-three. He truly learned the hard way that one can find financial success and the respect of business peers while almost losing what matters most: health, family and friends. Redefining Success details how

Wilson was forced to redefine his life, making health and key relationships his first priorities. Through trial and error, he discovered that these simple virtues are foundational for real, enduring success, both in business and in life. Wilson's compelling insights are the basis for *Redefining Success*. Not just for entrepreneurs and business people, the book outlines

how we can change our lives for the better by re-evaluating our personal definitions of success, then reworking them into a life plan that is feasible, lasting and rewarding. Inspirational and paradigm-changing, *Redefining Success* will help you implement and sustain lasting, positive change in your life—and make your world a little more meaningful—***e***

underwater photography. Through stunning black-and-white images, award-winning photographer Christian Vizl uses a masterful control of light and shadow to portray the creatures of the sea as they are rarely seen, at home in the ethereal world beneath the waves. From capturing the ferocity of sharks to the playful dance of dolphins, Vizl turns aquatic creatures and marine seascapes into

visions of sublime grace and beauty suspended in time and space. With each turn of the page, venture deeper into the one realm in which humans do not reign and discover an unforgettable world that few have ever seen. Though the ocean covers over 70 percent of planet Earth, over 80 percent of that vast wilderness remains unexplored. As human activity begins to impact

these once-untouched regions, it is more important now than ever to acknowledge both the beauty and value of our seas and the necessity of preserving one of the last true wild frontiers of our world. Silent Kingdom is both an ode both to the beauty of the ocean and the magnificent creatures that inhabit it and a call to action to preserve the fragile underwater world of our planet. Winner

commonly used calendar was on the year 2000, the Jewish calendar said it was the year 5760, while the Muslim calendar said 1420 and the Chinese calendar said 4698. Why do these differences exist? The Meg Harper Collins Part noir, part psychedelic romp, all Thomas Pynchon—Private eye Doc Sportello surfaces, occasionally, out of a marijuana haze to watch the end of an era In this lively yarn, Thomas Pynchon, working in an unaccustomed genre that is at once exciting and accessible, provides a classic illustration of the principle that if you can remember the sixties, you

weren't there. It's been a while since Doc Sportello has seen his ex- girlfriend. Suddenly she shows up with a story about a plot to kidnap a billionaire land developer whom she just happens to be in love with. It's the tail end of the psychedelic sixties in L.A., and Doc knows that "love" is another of those words going around at the moment, like "trip" or "groovy," except that this one

usually leads to trouble. Undeniably one of the most influential writers at work today, Pynchon has penned another unforgettable book. *The Lightkeepers* Currency An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students. **City of Sharks** Harry N. Abrams A beautifully illustrated and

deeply personal chronicle of De Roy's lifelong connection with these spectacular islands Tui De Roy was a year old in 1955 when her family left Europe, boarding a banana boat bound for the Pacific to lead a different sort of life in Galápagos, one of self-sufficiency and living close to nature. She grew up on the islands and returned to them often over the next five decades.

Discovering photography at a young age, she has dedicated her life to recording the islands' natural history in infinite detail. A Lifetime in Galápagos is De Roy's intimate portrait of one of the most spectacular places on Earth, presenting the wildlife and natural wonders of Galápagos as you have never seen them before. Featuring hundreds of breathtaking color photos,

this stunning book guides you into labyrinthine mangroves to observe nesting herons, to misty cloud forests to glimpse flycatchers and orchids, high onto erupting volcanoes, and into the ocean to swim with hammerhead sharks. De Roy's lens provides up-close encounters with orca and sperm whales, colonies of iguanas, and the giant tortoises of Alcedo

Volcano. She paints unforgettable portraits of her childhood in Galápagos—the islands at night under the stars of the Milky Way, sea lions at play and on the hunt, the diverse birdlife of Galápagos, and much more. Blending striking images with vivid prose, A Lifetime in Galápagos also discusses the threats that global warming and other environmental challenges

pose to the archipelago's unique wildlife and fragile habitats.

An in-depth look into the origins of how each NHL team was named, received their logo and design, with interviews by those responsible. Written by those most knowledgeable, you'll learn why every hockey team to every play in the National Hockey League looks the way it does. Nothing

unites or divides a random assortment of strangers quite like the hockey team for which they cheer. The passion they hold within them for the New York Rangers, Toronto Maple Leafs, Montreal Canadiens, or Boston Bruins allows them to look past any differences which would have otherwise disrupted a perfectly fine Thanksgiving dinner and channels it into a powerful,

shared admiration for their team. We decorate our lives with their logos, stock our wardrobe with their jerseys, and, in some cases, even tattoo our bodies with their iconography and colors. They're so ingrained in our lives we don't even think to ask ourselves why Los Angeles celebrates royalty; why Buffalo cheers for not one, but two massive cavalry swords; or why the

Broadway Blueshirts named themselves for a law enforcement agency in Texas (or why they even wear blue shirts, for that matter). All that and more is explored in *Fabric of the Game*, authored by two of the sports world's leading experts in team branding and design: Chris Creamer and Todd Radom. Tapping into their vast knowledge of the whys and hows, Creamer and

Radom explore and share the origin stories behind these and more, talking directly to those involved in the decision processes and designs of the National Hockey League's team names, logos, and uniforms, pouring through historical accounts to find and deliver the answers to these questions. Learn more about the storied Detroit Red Wings and Chicago

Blackhawks, as well as the lost but not forgotten Hartford Whalers and Quebec Nordiques, all the way to the lesser-known Kansas City Scouts and Philadelphia Quakers. Whichever team you pledge allegiance, *Fabric of the Game* covers them in-depth with research and knowledge for any hockey fan to enjoy. **Chase's Calendar of Events 2019** Simon and Schuster Donald Trump

promised the American people a transformative change in economic policy after eight years of stagnation under Obama. But he didn't adopt a conventional left or right economic agenda. His is a new economic populism that combines some conventional Republican ideas-tax cuts, deregulation, more power to the states-with more traditional Democratic

issues such as trade protectionism and infrastructure spending. It also mixes in important populist issues such as immigration reform, pressuring the Europeans to pay for more of their own defense, and keeping America first. In Trumponomics , conservative economists Stephen Moore and Arthur B. Laffer offer a well-informed defense of the president's approach to trade, taxes,

employment, infrastructure, and other economic policies. Moore and Laffer worked as senior economic advisors to Donald Trump in 2016. They traveled with him, frequently met with his political and economic teams, worked on his speeches, and represented him as surrogates. They are currently members of the Trump Advisory Council and still meet with him regularly.

In Trumponomics, they offer an insider's view on how Trump operates in public and behind closed doors, his priorities and passions, and his greatest attributes and liabilities. Trump is betting his presidency that he can create an economic revival in America's industrial heartland. Can he really bring jobs back to the rust belt? Can he cut taxes and bring the debt down? Above all, does he

have the personal discipline, the vision, the right team, and the right strategy to pull off his ambitious economic goals? Moore and Laffer believe that he can pull it off and that Trumponomics will usher in a new era of prosperity for all Americans.

—Booklist (starred review) A human drama unlike any other—the riveting and definitive full story of the worst sea disaster in United States naval history. Just after midnight on July 30, 1945, the USS Indianapolis is sailing alone in the Philippine Sea when she is

sunk by two Japanese torpedoes. For the next five nights and four days, almost three hundred miles from the nearest land, nearly nine hundred men battle injuries, sharks, dehydration, insanity, and eventually each other. Only 316 will survive. For the first time Lynn Vincent and Sara Vladic tell the complete story of the ship, her crew, and their final mission to save one of their own in "a wonderful

book...that features grievous mistakes, extraordinary courage, unimaginable horror, and a cover-up...as complete an account of this tragic tale as we are likely to have" (The Christian Science Monitor). It begins in 1932, when Indianapolis is christened and continues through World War II, when the ship embarks on her final world-changing mission: delivering the core of the

atomic bomb to the Pacific for the strike on Hiroshima. "Simply outstanding... Indianapolis is a must-read...a tour de force of true human drama" (Booklist, starred review) that goes beyond the men's rescue to chronicle the survivors' fifty-year fight for justice on behalf of their skipper, Captain Charles McVay III, who is wrongly court-martialed for the sinking. "Enthralling... A gripping

study of the greatest sea disaster in the history of the US Navy and its aftermath" (Kirkus Reviews, starred review), Indianapolis stands as both groundbreaking naval history and spellbinding narrative—and brings the ship and her heroic crew back to full, vivid, unforgettable life. "Vincent and Vladic have delivered an account that stands out through its crisp writing and superb research...Indi

anapolis is sure to hold its own for a long time" (USA TODAY). *The Fighter* Hoot N Waddle Read the book that inspired the BLOCKBUSTER MOVIE starring Jason Statham, Li Bingbing, Rainn Wilson, Ruby Rose, Winston Chao, and Cliff Curtis! Seven years ago, and seven miles below the surface of the Pacific Ocean, Dr. Jonas Taylor encountered something that changed the course of

his life. Once a Navy deep-sea submersible pilot, now a marine paleontologist, Taylor is convinced that a remnant population of Carcharodon megalodon -- prehistoric sharks growing up to 70 feet long, that subsisted on whales -- lurks at the bottom of the Mariana Trench. When offered the opportunity to return to those crushing depths in search of the Megs, Taylor leaps at the chance... but

the quest for scientific knowledge (and personal vindication) becomes a desperate fight for survival, when the most vicious predator that the earth has ever known is freed to once again hunt the surface.
