L'expansion management review Oxford University Press, USA
In the eighteenth century, as wars between Britain, France, and their allies raged across the world, hundreds of thousands of people were captured, detained, or exchanged. They were shipped across oceans, marched across continents, or held in an indeterminate limbo. The *Society of Prisoners* challenges us to rethink the paradoxes of the prisoner of war, defined at once as an enemy and as a fellow human being whose life must be spared. Amidst the emergence of new codifications of international law, the practical distinctions between a prisoner of war, a hostage, a criminal, and a slave were not always clear-cut. Renaud Morieux's vivid and lucid account uses war captivity as a point of departure, investigating how the state transformed itself at war, and how whole societies experienced international conflicts. The detention of foreigners on home soil created the conditions for multifaceted exchanges with the host populations, involving prison guards, priests, pedlars, and philanthropists. Thus, while the imprisonment of enemies signals the extension of Anglo-French rivalry throughout the world, the mass incarceration of foreign soldiers and sailors also illustrates the persistence of non-conflictual relations amidst war. Taking the reader beyond Britain and France, as far as the West Indies and St Helena, this story resonates in our own time, questioning the dividing line between war and peace, and forcing us to confront the untenable situations in which the status of the enemy is left to the whim of the captor.

Opening with an account of print portraiture facilitating Franz Liszt's celebrity status and concluding with Riot Grrrl's noisy politics of feminism and performance, this interdisciplinary anthology charts the relationship between music and the visual arts from late Romanticism and the birth of modernism to 'postmodernism', while crossing from Western art to the Middle East. Focused on music as a central experience of art and life, these essays scrutinize 'the musicalisation of art' focusing on the visual and performing arts and detailing significant instances of intra-art relations between c. 1840 and the present day. Essays reflect on the aesthetic relationships of music to painting, performance and installation, sound-and- silence, time-and-space. The insistent influence of Wagner is considered as well as the work and ideas of Manet, Satie and Cage, Thomas Wilfred, La Monte Young and Eliasson. What distinguishes these studies are the convictions that music is never alone and that a full understanding of the "isms" of the last two hundred years is best achieved when music's influential presence in the visual arts is acknowledged and interrogated.

The challenges to humanity posed by the digital future, the first

detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

Music, Art and Performance from Liszt to Riot Grrrr! PublicAffairs

Over the past thirty years, while the United States has turned either a blind or dismissive eye, Iran has emerged as a nation every bit as capable of altering America's destiny as traditional superpowers Russia and China. Indeed, one of this book's central arguments is that, in some ways, Iran's grip on America's future is even tighter. As ex-CIA operative Robert Baer masterfully shows, Iran has maneuvered itself into the elite superpower ranks by exploiting Americans' false perceptions of what Iran is—by letting us believe it is a country run by scowling religious fanatics, too preoccupied with theocratic jostling and terrorist agendas to strengthen its political and economic foundations. The reality is much more frightening—and yet contained in the potential catastrophe is an implicit political response that, if we're bold enough to adopt it, could avert disaster. Baer's on-the-ground sleuthing and interviews with key Middle East players—everyone from an Iranian ayatollah to the king of Bahrain to the head of Israel's internal security—paint a picture of the centuries-old Shia nation that is starkly the opposite of the one normally drawn. For example, Iran's hate-spouting President Ahmadinejad is by no means the true spokesman for Iranian foreign policy, nor is Iran making it the highest priority to become a nuclear player. Even so, Baer has discovered that Iran is currently engaged in a soft takeover of the Middle East, that the proxy method of war-making and co-option it perfected with Hezbollah in Lebanon is

being exported throughout the region, that Iran now controls a significant portion of Iraq, that it is extending its influence over Jordan and Egypt, that the Arab Emirates and other Gulf States are being pulled into its sphere, and that it will shortly have a firm hold on the world's oil spigot. By mixing anecdotes with information gleaned from clandestine sources, Baer superbly demonstrates that Iran, far from being a wild-eyed rogue state, is a rational actor—one skilled in the game of nations and so effective at thwarting perceived Western colonialism that even rival Sunnis relish fighting under its banner. For U.S. policy makers, the choices have narrowed: either cede the world's most important energy corridors to a nation that can match us militarily with its asymmetric capabilities (which include the use of suicide bombers)—or deal with the devil we know. We might just find that in allying with Iran, we'll have increased not just our own security but that of all Middle East nations. The alternative—to continue goading Iran into establishing hegemony over the Muslim world—is too chilling to contemplate.

NEW YORK TIMES BESTSELLER • Impeccably researched, this riveting journalistic investigation separates fact from fiction, and documents the existence of—and government reactions to—actual UFOs. “A treasure trove of insightful and eye-opening information.”—Michio Kaku, PH.D., bestselling author of *Physics of the Future* Leslie Kean, a veteran investigative reporter who has spent the past ten years studying the still-unexplained UFO phenomenon, reviewed hundreds of government documents, aviation reports, radar data, and case studies with corroborating physical evidence. She interviewed dozens of high-level officials and aviation witnesses from around the world. Among them, five Air Force generals and a host of high-level sources—including Fife Symington III, former governor of Arizona, and Nick Pope, former head of the British Defence Ministry's UFO Investigative Unit—have written their own breathtaking, firsthand accounts about UFO encounters and investigations exclusively for this book. With the support of former White House chief of staff John Podesta, Kean lifts the veil on decades of U.S. government misinformation about this mysterious phenomenon and presents irrefutable evidence that unknown flying objects—metallic, luminous, and seemingly able to maneuver in ways that defy the laws of physics—actually exist. With a Foreword by John Podesta “The most important book on the phenomenon in a generation.”—*Journal of Scientific Exploration* “Written with penetrating depth and insight, the revelations in this book constitute a watershed event in lifting the taboo against rational discourse about this controversial subject.”—Harold E. Puthoff, PH.D., Director of the Institute for Advanced Studies at Austin “Kean presents the most accurate, most credible reports on UFOs you will ever find. She may not have the final smoking gun, but I smell the gunpowder.”—Miles O'Brien, science correspondent for PBS's NewsHour
