**Me and My Father Are One** Penguin  
As robots are increasingly integrated into modern society—on the battlefield and the road, in business, education, and health—Pulitzer-Prize-winning New York Times science writer John Markoff searches for an answer to one of the most important questions of our age: will these machines help us, or will they replace us? In the past decade alone, Google introduced us to driverless cars, Apple debuted a personal assistant that we keep in our pockets, and an Internet of Things connected the smaller tasks of everyday life to the farthest reaches of the internet. There is little doubt that robots are now an integral part of society, and cheap sensors and powerful computers will ensure that, in the coming years, these robots will soon act on their own. This new era offers the promise of immense computing power, but it also reframes a question first raised more than half a century ago, at the birth of the intelligent machine: Will we control these systems, or will they control us? In *Machines of Loving Grace*, New York Times reporter John Markoff, the first reporter to cover the World Wide Web, offers a sweeping history of the complicated and evolving relationship between humans and computers. Over the recent years, the pace of technological change has accelerated dramatically, reintroducing this difficult ethical quandary with newer and far weightier consequences. As Markoff chronicles the history of automation, from the birth of the artificial intelligence and intelligence augmentation communities in the 1950s,

to the modern day brain trusts at Google and Apple in Silicon Valley, and on to the expanding tech corridor between Boston and New York, he traces the different ways developers have addressed this fundamental problem and urges them to carefully consider the consequences of their work. We are on the verge of a technological revolution, Markoff argues, and robots will profoundly transform the way our lives are organized. Developers must now draw a bright line between what is human and what is machine, or risk upsetting the delicate balance between them.

Grace: a Love Story Sterling Children's Books

The Scriptures say, "In the beginning was the Word, and the word was with God. And the Word was God. He was with God in the beginning" (John 1:1). John's gospel calls Jesus the Word of God. He presents Him as the personal Word of God, which indicates that in these last days God has spoken to us through His Son. The Scripture also revealed that Jesus Christ is the manifold wisdom of God and the perfect revelation of the nature and person of God. Just as a person's words reveal his or her heart and mind, with Christ, it is the same, as the Word reveals the heart and mind of God. All those who know Jesus Christ, earnestly desire to know Him more and more. Our Lord said, "Before Abraham was born, I Am," which means that Abraham is a creature of God, just as Adam and Eve; and Jesus Christ is the Creator; He is the beginning and the end, the first and the last, the Mediator and the Messiah, predicted by the Old Testament prophets long before Abraham was born. Jesus Christ is the manifestation of God's wisdom, righteousness, sanctification and redemption. Jesus Christ is the Lamb of

God that was slain before the foundation of the universe. "He is before all things, and in him all things hold together "(Colossian 1:17). God will show His love for you in an active way, in a big way, in a way that you cannot imagine or think, or comprehend. At the present time, your most holy duty and task is to draw

close to the Lord and continue in faithful obedience to His commandments, to His Word and to the control and direction of the Holy Spirit. Gain a deeper understanding of Jesus Christ and grow in knowledge, strength and truth through this uplifting read.
