ALBERT KENZIE

Recent Advances in Gearing Simon and Schuster

"The book comprehensively covers all the current and the emerging areas of the physics and the technology of high permittivity gate dielectric materials, including, topics such as MOSFET basics and characteristics, hafnium-based gate dielectric materials, Hf-based gate dielectric processing, metal gate electrodes, flat-band and threshold voltage tuning, channel mobility, high-k gate stack degradation and reliability, lanthanide-based high-k gate stack materials, ternary hafnia and lanthania based high-k gate stack films, crystalline high-k oxides, high mobility substrates, and parameter extraction. Each chapter begins with the basics necessary for understanding the topic, followed by a comprehensive review of the literature, and ultimately graduating to the current status of the technology and our scientific understanding and the future prospects." .

Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

Legal in all 50 states, this entertaining, informative, and whimsically illustrated guide covers 4,000 years of weed and its significance—psychoactive, cultural, medical, sexual, and more—in just 22 pages and with 20 scratch-&-sniff scents. From the science behind the munchies to the botanical link between weed and beer; from weed's sexual upsides to its (literal) sexual downsides; from Tupac to Shakespeare to why weed makes music sound better: This book may just be the greatest-ever gift for anyone from the cannabis connoisseur to the cannabis curious.

High Weirdness Oxford University Press

Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities and assessments, a full suite of instructor resources, and learning analytics reporting tools. Written for the introductory course, the Eighth Edition of Concepts of Athletic Training focuses on the care and management of sport and activity related injuries while presenting key concepts in a comprehensive, logically sequential manner that will assist future professionals in making the correct decisions when confronted with an activity-related injury or illness in their scope of practice. Key Features Include: -

Time Out boxes provide additional information related to the text, such as NATA Athletic Helmet Removal Guidelines, how to recognize the signs of concussion, and first aid for epilepsy - Athletic Trainers Speak Out boxes feature a different athletic trainer in every chapter who discusses an element of athlete care and injury prevention - Anatomy Reviews introduce body parts to students unfamiliar with human anatomy and acts as a refresher for those students with some anatomy background

Using data from yearbooks for 194 high schools, this study examines the degree of interracial contact in 8,875 high school teams and other organizations. Tabulations show that the degree of interracial exposure was typically less than what would occur if all organizations in each school had been racially balanced and was much less than the exposure that would have occurred if all organizations reflected the racial composition of the schools containing them. Whereas the nonwhite percentage of the students enrolled in the sample high schools was 25.1 percent, the membership of clubs and teams was 21.1 percent, reflecting a lower rate of participation by nonwhites. Furthermore, because the racial compositions of clubs and teams were not uniform, the average white member was in an organization that was only 15.6 percent nonwhite. Although clearly less than its theoretical maximum, this rate of contact nonetheless appears to be much higher than what would occur if friendships were the only vehicle for interracial contact outside the classroom. Finally, the extent of segregation associated with these organizations was the same or less in the South as compared to the rest of the country

Contact High harkens back to the halcyon days of photographer and filmmaker Richard Kern's youth. It couldn't have a simpler premise, as the subtitle puts it, it's all about 'naked girls smoking weed.' This cheeky and playful collection of portraits recalls a time in Kern's life when, he says, 'Back then, when I was around a naked girl, weed was either about to be smoked or had been smoked.' Readers will undoubtedly get a real buzz from the beauty and sensuality of the images, perhaps tinged with a bittersweet hint of nostalgia for the sexy abandon of their youth.
Hairspray, High Heels, and Second Hand Smoke Jones & Bartlett Learning

Formed by a group of young architects, photographers, and psychologists in the Venice Beach of the late 1960s, Environmental Communications honed an image practice that constituted a new visual syntax for the late twentieth century city. The group speculated that their "environmental photography" would alter architecture and transform the consciousness of architecture students by way of the ubiquitous architecture slide library. Through their media experiments, events, and slide catalogs, they positioned themselves as interpreters and purveyors of new trends, assembling a lively body of populist and radical design imagery that undermined the canons defined by the prevailing institutions of architectural design. In reproducing the group's photography, booklets, and ephemera, Environmental Communications: Contact High records and critically reflects upon the work of this West Coast media

collective.

Activities Springer Science & Business Media

Businesses need to become more consumer-centric, efficient, and quality conscious. Yet global competition and supply chain complexity are increasing so rapidly that managers must reach across the manufacturing and service boundary to gather more universally applicable ideas. *Vanishing Boundaries: How Integrating Manufacturing and Services Creates Customer Value*, Second Edition addresses the unprecedented array of new conditions that today's business managers must face. The book is a revision of the authors' previous book, *New Methods of Competing in the Global Marketplace*, Critical Success Factors from Service and Manufacturing. The concepts underpinning the first edition continue to be relevant today and, in this revised edition, are complemented with coverage of additional emerging issues in today's business environment. The basic theme of the book is captured in its title and illustrated with the addition of case studies of some of today's most prominent companies. See *What's New in the Second Edition*: The emerging relationship between risk management and supply management Risk management, and its corollary, crisis management Trends in outsourcing, such as near-sourcing and in-sourcing Health care improvement programs to reduce cost and improve quality Sustainability – alternative energy infrastructure and the triple bottom line Integration of supply chain services to align goods, information and funds flows Advances in information technology, i.e., cloud computing, videoconferencing Present, and potential, role of social media in attracting customers, servicing customers and building network trading partners. This second edition creates greater awareness of the benefits that businesses can gain by sharing techniques and methodologies across the manufacturing/services boundary. The book emphasizes that successful change management requires a holistic focus on three levels of an organization - its technology, infrastructure, and organizational culture. It includes solutions and implementation strategies for risk and crisis management, sourcing, healthcare, alternative energy infrastructure, integration of supply chain services, advances in IT, social media, and customer relationship building.

Hip Hop at the End of the World Springer Nature

A 10-kW-h scale model high-temperature direct-contact latent-heat-exchange thermal energy storage system was designed and fabricated. A research program was structured in three separate phases to permit: Phase I--the inspection and evaluation of the original hardware, which suffered extensive corrosion and damage in a previous experimental program; Phase II--redesign and fabrication of a modified system; and Phase III--detailed test evaluation. At the end of Phase II, the system was in a ready-for-test condition but the program was terminated before the start of the Phase III test evaluation. Since testing was never implemented, this report presents only the results for the design and fabrication phases of the program.

Dilla Time Multilingual Matters

"Second hand low" and "third hand high" are adages we learned in Bridge 101 along with others like "cover an honor with an honor" and "always return your partner's suit." These so-called rules will get you by, but they won't see you very far. Second hand must become familiar with certain basic positions to try to foil declarer's plans, often by playing second hand high. Likewise, many contracts are decided by the play of third hand at trick one. While your play may at first seem so obvious, a little thought may help you find the right card. Being a slave to either "second hand low" or "third hand high" can only lead you down the road to many disasters. Take time to review what you know from the

bidding. Think about the hand type. Does it call for passive or aggressive defense? Hopefully after reading the examples in this book you will become more attuned to the variety of options available. The hands are placed in chapters by themes, but of course there is some overlap. We're sure you will recognize situations from your own experiences at the table. We're sure after reading this book you will be more attuned to becoming a thinking bridge player, and less a player just following old nursery rhymes.

WHO Best Practices for Injections and Related Procedures Toolkit Clarkson Potter

This volume presents the results of the largest ever language attitude/motivation survey in second language studies. The research team gathered data from over 13,000 Hungarian language learners on three successive occasions: in 1993, 1999 and 2004. The examined period covers a particularly prominent time in Hungary's history, the transition from a closed, Communist society to a western-style democracy that became a member of the European Union in 2004. Thus, the book provides an 'attitudinal/motivational flow-chart' describing how significant sociopolitical changes affect the language disposition of a nation. *Dependents' Education* Picturebox, Incorporated
The new WHO guidelines provide recommended steps for safe phlebotomy and reiterate accepted principles for drawing, collecting blood and transporting blood to laboratories/blood banks. The main areas covered by the toolkit are: 1. bloodborne pathogens transmitted through unsafe injection practices; 2. relevant elements of standard precautions and associated barrier protection; 3. best injection and related infection prevention and control practices; 4. occupational risk factors and their management.

Scratch & Sniff Book of Weed Pearson Education India

This is a practical resource for community and two year college professionals engaged at all levels of learning outcomes assessment, in both academic and co-curricular environments. It is designed as a guide both to inform the creation of new assessment efforts and to enhance and strengthen assessment programs already established, or in development. Each chapter addresses a key component of the assessment process, beginning with the creation of a learning-centered culture and the development and articulation of shared outcomes goals and priorities. Subsequent chapters lead the reader through the development of a plan, the selection of assessment methods, and the analysis of results. The book concludes by discussing the communication of results and their use in decision making; integrating the conclusions in program review as well as to inform budgeting; and, finally, evaluating the process for continuous improvement, as well as engaging in reflection. The book is illustrated by examples developed by faculty and student affairs/services professionals at community and two year colleges from across the country. Furthermore, to ensure its relevance and applicability for its targeted readership, each chapter has at least one author who is a community college or two-year college professional. Contributors are drawn from the following colleges: Borough of Manhattan Community College David Phillips Buffalo State College Joy Battison Kimberly Kline Booker Piper Butler County Community College Sunday Faseyitan California State University, Fullerton John Hoffman Genesee Community College Thomas Priestler Virginia Taylor Heald College Megan Lawrence Stephanie Romano (now with Education Affiliates) Hobart and William Smith Colleges Stacey Pierce Miami Dade College John Frederick Barbara Rodriguez Northern Illinois University Victoria Livingston Paradise Valley Community College Paul Dale San Diego Mesa College Jill Baker Julianna Barnes San Diego State University Marilee Bresciani San Juan

Occupational Outlook Handbook, 1976-77 Edition Taylor & Francis

The study develops a new theoretical approach to the relationship between two media (jazz music and writing) and demonstrates its explanatory power with the help of a rich sampling of jazz poems. Currently, the mimetic approach to intermediality (e.g., the notion that jazz poetry imitates jazz music) still dominates the field of criticism. This book challenges that interpretive approach. It demonstrates that a mimetic view of jazz poetry hinders readers from perceiving the metaphoric ways poets rendered music in writing. Drawing on and extending recent cognitive metaphor theories (Lakoff, Johnson, Turner, Fauconnier), it promotes a conceptual metaphor model that allows readers to discover the innovative ways poets translate "melody," "dynamics," "tempo," "mood," and other musical elements into literal and figurative expressions that invite readers to imagine the music in their mind's eye (i.e., their mind's ear).

Contact High Biota Publishing

Filled with more than 250 images of artists including Ice Cube, The Notorious B.I.G., LL Cool J, Naughty by Nature, Public Enemy, 50 Cent, N.W.A, Snoop Dogg, Lil' Kim, Flavor Flav, Lauren Hill, Queen Latifah, TLC, many that have never before been published, this book is set to become the new hip-hop photography bible. With exclusive, behind-the-scenes access, preeminent photographer Brother Ernie captures the last four decades of the evolution of hip-hop--the styles that grew from it, and the artists who shaped it. Complete with Brother Ernie's personal anecdotes of time spent with subjects, and stories behind the photographs, *Hip-Hop at the End of the World* shares intimate moments from the most important era of hip-hop. After picking up a camera in the 1973 to document the graffiti art that dominated New York City, Ernest Panicioli started his journey of whole-heartedly capturing the scene during the most fertile years of hip-hop. Always armed with a 35mm camera, he successfully photographed nearly every rapper of note since the genre's inception, making him the go-to photographer for magazines like *Word Up* and *Rap Masters*. *Hip Hop at the End of the World* is a carefully curated selection of photographs from Brother Ernie's extensive archives, celebrating over 40 years of swag in one of the most complete records of the most crucial movements in American music.

Pfeiffer and Mangus's Concepts of Athletic Training Columbia Books on Architecture and the City

PIHKAL (Phenethylamines I Have Known And Loved) is a unique book written by renowned psychopharmacologist Alexander Shulgin and his wife Ann Shulgin. This book gives details of their research and investigations into the use of psychedelic drugs for the study of the human mind, and is also a love story. The second half of the book describes in detail a wealth of phenethylamines, their physical properties, dosages used, duration of effects observed, and commentary on effects.

Contact High MCD

This book presents the most up-to-date accomplishments in gear design and gear production, detailing theory of gearing and its application. As an enormous number of gears are used in such sectors as automobiles, aerospace, machines, and similar industries, even a very small improvement in the gear design or production, for example a 10 cent savings on each gear, can result in huge of savings in manufacturing, underscoring critical importance of the subject of the book. Giving a solid background in theory together with the latest advances in design and production, the book is ideal for product designers working in numerous industries. The volume also serves as a useful

supplement to required texts well for students in mechanical and industrial engineering as it helps establish a scientific foundation to the subject, and facilitates a systematic learning process of gear kinematics, gear geometry, gear design, gear production/finishing operations, and related competencies.

THE ESSENTIAL WORK IN TRAVEL MEDICINE -- NOW COMPLETELY UPDATED FOR 2018 As unprecedented numbers of travelers cross international borders each day, the need for up-to-date, practical information about the health challenges posed by travel has never been greater. For both international travelers and the health professionals who care for them, the CDC Yellow Book 2018: Health Information for International Travel is the definitive guide to staying safe and healthy anywhere in the world. The fully revised and updated 2018 edition codifies the U.S. government's most current health guidelines and information for international travelers, including pretravel vaccine recommendations, destination-specific health advice, and easy-to-reference maps, tables, and charts. The 2018 Yellow Book also addresses the needs of specific types of travelers, with dedicated sections on: · Precautions for pregnant travelers, immunocompromised travelers, and travelers with disabilities · Special considerations for newly arrived adoptees, immigrants, and refugees · Practical tips for last-minute or resource-limited travelers · Advice for air crews, humanitarian workers, missionaries, and others who provide care and support overseas Authored by a team of the world's most esteemed travel medicine experts, the Yellow Book is an essential resource for travelers -- and the clinicians overseeing their care -- at home and abroad.

The London Diplomatic List CRC Press

Beauty masks, diapers, wound dressings, wipes, protective clothes and biomedical products: all these high-value and/or large-volume products must be highly compatible with human skin and they should have specific functional properties, such as anti-microbial, anti-inflammatory and anti-oxidant properties. They are currently partially or totally produced using fossil-based sources, with evident issues linked to their end of life, as their waste generates an increasing environmental concern. On the contrary, biopolymers and active biomolecules from biobased sources could be used to produce new materials that are highly compatible with the skin and also biodegradable. The final products can be obtained by exploiting safe and smart nanotechnologies such as the extrusion of bionanocomposites and electrospinning/electrospray, as well as innovative surface modification and control methodologies. For all these reasons, recently, many researchers, such as those involved in the European POLYBIOSKIN project activities, have been working in the field of biomaterials with anti-microbial, anti-inflammatory and anti-oxidant properties, as well as biobased materials which are renewable and biodegradable. The present book gathered research and review papers dedicated to materials and technologies for high-performance products where the attention paid to health and environmental impact is efficiently integrated, considering both the skin-compatibility of the selected materials and their source/end of life.

Vascular Biology of the Placenta Mack

Pulitzer Prize-winning author and astronomer Carl Sagan imagines the greatest adventure of all—the discovery of an advanced civilization in the depths of space. In December of 1999, a multinational team journeys out to the stars, to the most awesome encounter in human history. Who—or what—is out there? In *Cosmos*, Carl Sagan explained the universe. In *Contact*, he predicts its future—and our own.
