<u>Lonely Planet Pocket Amsterdam</u> Simon and Schuster		Charles Paterno was seven when he left Castelmezzano, a small mountain town in Basilicata to set sail on one of the rattletrap ships headed to America. Thirty years later he was one of the top builders in New York City, among the first to construct the skyscrapers that would form the world's most famous skyline. Intelligence, brilliance, intuition and an ability to stay ahead of the times made him a leading figure in the life of Manhattan. He created garden communities, focused on new technologies and turned to the best architects. Paterno didn't just want to offer houses, but new lifestyles to tens of thousands of people. His first American dream looked like a white castle at the northernmost tip of Manhattan, where he lived for years with his wife and son, surrounded by a small but very loyal retinue. A friend of Giuseppe Prezzolini, he donated a library of 20.000 books, the Paterno Library, to the Casa Italiana at Columbia University. Fiorello La Guardia, the Italian-American mayor of New York City, called him a genius. Born into poverty, Paterno died a wealthy man on the green of the most exclusive country club in Westchester.

The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each devoted to one of the 17 SDGs. This volume addresses SDG 2, namely "End hunger, achieve food security and improved nutrition and promote sustainable agriculture" and contains the description of a range of related terms, to allow for a better understanding and foster knowledge. Our planet produces enough food to feed everyone. Malnutrition and hunger are the result of inappropriate food production processes, bad governance and injustice. SDG 2 seeks to guarantee quality and nutritious food to ensure healthy life by adopting a holistic approach that involves various actions targeting different actors, technologies, policies and programs. These initiatives have to face challenges coming from extensive environmental degradation, loss of biodiversity and the interrelated effects of climate change. Concretely, the defined targets are: End hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round End all forms of malnutrition, including achieving the internationally agreed targets on stunting and wasting in children under 5 years of age, and address the nutritional needs of adolescent girls, pregnant and lactating women and older persons Double the agricultural productivity and incomes of small-scale food producers, in particular women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment Ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality Maintain the genetic diversity of seeds, cultivated plants and farmed and domesticated animals and their related wild species, including through soundly managed and diversified seed and plant banks at the national, regional and international levels, and promote access to and fair and equitable sharing of benefits arising from the utilization of genetic resources and associated traditional knowledge, as internationally agreed Increase investment, including through enhanced international cooperation, in rural infrastructure, agricultural research and extension services, technology development and plant and livestock gene banks in order to enhance agricultural productive capacity in developing countries, in particular least developed countries Correct and prevent trade restrictions and distortions in world agricultural markets, including through the parallel elimination of all forms of agricultural export subsidies and all export measures with equivalent effect, in accordance with the mandate of the Doha Development Round Adopt measures to ensure the proper functioning of food commodity markets and their derivatives and facilitate timely access to market information, including on food reserves, in order to help limit extreme food price volatility Editorial Board Datu Buyung Agusdinata, Mohammad Sadegh Allahyari, Usama Awan, Nerise Johnson, Paschal Arsein Mugabe, Vincent Onguso Oeba, Tony Wall/div		Join Gino on his trip to the islands of Sicily and Sardinia on a journey of discovery of authentic and delicious Italian food. - The most authoritative annual guide to the very best Italian wines; more than 2,500 producers have been selected, and more than and 22,000 wines		From 1929 until 1953, Iosif Stalin's image became a central symbol in Soviet propaganda. Touched up images of an omniscient Stalin appeared everywhere: emblazoned across buildings and lining the streets; carried in parades and woven into carpets; and saturating the media of socialist realist painting, statuary, monumental architecture, friezes, banners, and posters. From the beginning of the Soviet regime, posters were seen as a vitally important medium for communicating with the population of the vast territories of the USSR. Stalin's image became a symbol of Bolshevik values and the personification of a revolutionary new type of society. The persona created for Stalin in propaganda posters reflects how the state saw itself or, at the very least, how it wished to appear in the eyes of the people. The 'Stalin' who was celebrated in posters bore but scant resemblance to the man Iosif Vissarionovich Dzhugashvili, whose humble origins, criminal past, penchant for violent solutions and unprepossessing appearance made him an unlikely recipient of uncritical charismatic adulation. The Bolsheviks needed a wise, nurturing and authoritative figure to embody their revolutionary vision and to legitimate their hold on power. This leader would come to embody the sacred and archetypal qualities of the wise Teacher, the Father of the nation, the great Warrior and military strategist, and the Saviour of first the Russian land, and then the whole world. This book is the first dedicated study on the marketing of Stalin in Soviet propaganda posters. Drawing on the archives of libraries and museums throughout Russia, hundreds of previously unpublished posters are examined, with more than 130 reproduced in full colour. The personality cult of Stalin in Soviet posters, 1929-1953 is a unique and valuable contribution to the discourse in Stalinist studies across a number of disciplines.

		This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. The First World War was the first 'total war'. Its industrial weaponry damaged millions of men and drove whole armies underground into dangerously unhealthy trenches. Many were killed. Many more suffered terrible, life-threatening injuries: wound infections such as gas gangrene and tetanus, exposure to extremes of temperature, emotional trauma and systemic disease. In an effort to alleviate this suffering, tens of thousands of women volunteered to serve as nurses. Of these, some were experienced professionals, while others had undergone only minimal training. But regardless of their preparation, they would all gain a unique understanding of the conditions of industrial warfare. Until recently their contributions, both to the saving of lives and to our understanding of warfare, have remained largely hidden from view. By combining biographical research with textual analysis, Nurse writers of the great war opens a

window onto their insights into the nature of nursing and the impact of warfare.

One of Us Is Lying meets Carrie in this suspenseful story of friendship, family, and revenge. Maggie Lewis started writing in her yellow notebook the day after her family self-destructed. The day her father ruined her mother's life. The day Maggie's sister, Eryn, skipped town and left her to fend for herself. The day of Brandon Phipp's party. Now Maggie is called a slut in the hallways of her high school, her former best friend won't speak to her, and she spends her lunch period with a group of misfits who've all been as socially exiled as she has. And so, feeling trapped and forgotten, Maggie retreats to her notebook, dreaming up a magical place called Near. Near is perfect - a place where her father never cheated, her mother never drank, and Maggie's own life never derailed so suddenly. She imagines Near so completely, so fully, that she writes it into existence, right in her own backyard. At first, Near is a peaceful escape, but soon it becomes something darker, somewhere nightmares lurk and hidden truths come to light. Soon it becomes a place where Maggie can do anything she wants...even get her revenge. You Must Not Miss is an intoxicating, twisted tale of magic, menace, and the monsters that live inside us all.

He makes you laugh, though you can never be quite sure why. He's affable enough, of course, but it's not so much that. He is both a kind of halfwit and a genius, flippant and profound, chaotic and yet possessed of a Zen-like calm. He's easily distracted but tends to hound-dog every thought until he has it by the throat. His conversation is labyrinthine but he is capable of moments of blinding lucidity. The thing is, you can't help but love him. He is Vincenzo Malinconico, an underemployed lawyer whose wife has sort of left him ("he's the kind of man you marry not once but twice, and leave both times"), whose teenage children worry him to death, and whose profession mostly consists in appearing as if he has one. In this sequel to *I Hadn't Understood*, a Neapolitan mafia boss has been kidnapped by a mild-mannered computer engineer who holds the camorrista responsible for the accidental death of his son. The engineer plans to conduct an impromptu trial on live television during which he will list the various crimes of the accused, sentencing him before a captivated national audience and executing him accordingly. The standoff between law enforcement officers and the kidnapper becomes a tragi-comic reality show. The only hope of a happy ending rests with Vincenzo Malinconico, Neapolitan lawyer, poster-child for the proverbial mid-life crisis, and inveterate flâneur. He hardly has a reputation for decisiveness, but now is called upon to play a decisive role in resolving this drama in course with, hopefully, no loss of life, his own included.

A year in the life of the vineyards and wines of the USA Slow Wine Guide USA is a new and revolutionary guide to the wines of California, Oregon, New York, and Washington. Thanks to the help of a handful of expert contributors, we've selected the best wineries from each state and reviewed their most outstanding bottles. The idea behind Slow Wine is simple: it acknowledges the unique stories of people and vineyards, of grape varieties and landscapes, and of their wines. The awareness that wine is more than just liquid in a glass helps wine lovers make better, more conscious choices and enhances the very enjoyment of this beverage. Since its beginnings in Italy twelve years ago, Slow Wine has combined its tasting sessions with equally important moments of exchange and debate with producers. The direct contact with winegrowers and winemakers allows for a genuine, authentic, and always up-to-date report on what's happening in America's vineyards and cellars. Each winery receives a review divided in three sections: the first one is dedicated to the people who live and work at the winery, the second to the vineyards and the way they're farmed, and the third to the finest wines currently available on the market. The very best wines are awarded the Top Wine accolade. Among these we have the Slow Wines--which beyond their outstanding sensory quality are of particular interest for their sense of place, environmental sustainability or historical value--and the Everyday Wines, representing excellent value at prices within \$30. The most interesting wineries on the other hand are awarded the Snail, for the way they interpret Slow Food values (sensory perceptions, territory, environment, identity) while offering good value for money; the Bottle, to wineries whose wines are of outstanding sensory quality throughout the range; the Coin to those estates offering excellent value for money.

This textbook, from one of Italy's most eminent scholars, provides broad coverage and critique of Italian politics and society. Providing the readers with the knowledge necessary to understand the working of the Italian political system, it also offers answers to some of the most important challenges facing the country - and other contemporary democracies - today, such as populism, anti-politics and corruption. Critical but underpinned by thorough data and analysis, it presents alternative views alongside the author's interpretation. Crucially, the book uses a comparative framework to explain Italy's transformation and evaluate its performance. Comparing the rules, institutions, parties and actors at work in the most important European political systems - France, Germany, Great Britain - with those in Italy, the Italian context is better understood and assessed in contrast. This text will be essential reading for students and scholars of Italian politics and European politics, and more broadly for comparative politics and democracy.
