Dieses Buch bietet, erstmals in englischer Sprache, eine Zusammenschau der modernen Forschung zu Simplikios' Leben und drei seiner funf Kommentare: Zu Epictetus' Encheiridion, zu Aristoteles' De anima und zu Aristoteles' Kategorien. Der biografische Teil bringt die historische Rolle dieses neoplatonischen Philosophen ans Licht. Geboren in Kilikien, Kleinasien, studierte er in

Alexandria und Athen und beendete offenbar sein Leben in Syrien an der Grenze zwischen dem byzantinischen und sassanidischen Reich. Er war ein Vermittler zwischen der griechisch-romischen und der syrischen Philosophie, die die arabische Philosophie zu Beginn nahren sollte. Der zweite Teil des Buches, der sich mit Fragen der Lehre und der Autorschaft befasst, widmet sich auch dem zugrunde liegenden pädagogischen Curriculum und den Methoden, die neoplatonischen Kommentaren eigen sind, die moderne Interpretation in Studien über Simplicius und andere Neoplatonisten nur zu gerne übersehen.

"My favorite read this year. A hilarious space adventure. Hard book to put down." —Hugh Howey, author of *Wool*  
A space-faring ne'er-do-well with more bravado than brains, Rex Nihilo plies the known universe in a tireless quest for his own personal gain. But when he fleeces a wealthy weapons dealer in a high-stakes poker game, he ends up winning a worthless planet...and owing an outstanding debt more vast than space itself! The only way for Rex to escape a lifetime of torture on the prison world Gulagatraz is to score a big payday by pulling off his biggest scam. But getting mixed up in the struggle between the tyrannical Malarchian Empire and the plucky rebels of the Revolting Front—and trying to double-cross them both—may be his biggest mistake.

Luckily for Rex, his frustrated but faithful robot sidekick has the cyber-smarts to deal with buxom bounty hunters, pudgy princesses, overbearing overlords, and interstellar evangelists...while still keeping Rex's martini glass filled.

With a secondhand motorcycle, the support of a few powerful tribesmen and a good friend in the CIA, the unknown Hamid Karzai willed himself to power as the new hope of Afghanistan. Acclaimed journalist Bette Dam chronicles the astonishing rise of Afghanistan's U.S.-backed leader from obscurity to one of

the most influential figures in the global war on terror. Following the 2001 toppling of the Taliban, a fragile Afghanistan was on the brink. Karzai, armed with a recipe for victory came within inches of helping the U.S. declare victory in the war on terror. But sentiments run high in post-9/11 America, and the desire for revenge derailed an early chance at peace. As U.S. troops leave Afghanistan, and power is handed to a new president, Karzai's legacy remains one of betrayal, mistrust, and missed opportunities.

This book reports the dramatic experiences of the last American ambassador to Iran during the revolution of 1978-79. It is an account of the events, the personalities, and the institutions in Iran as seen through the eyes of the man who, at the time, was the senior U.S. Foreign Service career officer on active duty. It is also a story of the policy failures of the Carter administration as viewed from the American Embassy in Tehran.

"All his life, Viggo Larssen has been haunted by the same troubling dream, which he calls the Omen--a vision of a woman beckoning to him from the surface of a churning sea. Now, as he broods over his shipwrecked existence in a remote lighthouse off the outermost coast of Denmark, he is about to be borne backward by the current to a past he thought he had escaped forever. On the Danish mainland, the widowed mother of the nation's prime minister mysteriously vanishes from her prestigious nursing home. As the police search for clues, evidence mounts that her disappearance is tied to an unsolved crime from Viggo's childhood. Told through the eyes of multiple characters from Viggo's old neighborhood, Erik Valeur's dark, serpentine mystery is a profound meditation on the persistence of memory, the power of dreams, and the secrets we hide from one another--and ourselves"--Page 4 of cover.

*Towards a Theory for Designing Machine Learning Systems for Complex Decision Making Problems* Hachette UK

The ubiquitousness of data and the emergence of data-driven machine learning approaches provide new means of creating insights. However, coping with the great volume, velocity, and variety of data requires improved data analysis methods. This dissertation contributes a nascent design theory, named the Division-of-Labor framework, for developing complex machine learning systems that can not only address the challenges of big data but

also leverage their characteristics to perform more sophisticated analyses. I evaluate the proposed design principles in three practical settings, in which I apply the principles to design machine learning systems that (i) support treatment decision making for cancer patients, (ii) provide consumers with recommendations on two-sided platforms, and (iii) address a trade-off between efficiency and comfort in the context of autonomous vehicles. The evaluations partially validate the proposed theory, but also show that some principles require further attention in order to be practicable.

With the development environment App Inventor 2 you can easily develop and test your own apps. The book is intended to help you get started with setting up the development environment right through to your own apps. It is written for beginners who want to deal with app development, but can also be used for teaching purposes in schools or community colleges. It is a step-by-step guide that does not focus on the full description of the programming language, but uses examples to illustrate the capabilities of the development environment. It starts with setting up the environment and the Android device. It continues with simple apps, via variable concepts and control structures to more complex topics. Event-driven apps are developed, subroutines are handled and sensors are queried. Working with multiple screens is just as important as files and dialogs. The examples are chosen so that the topics with increasing difficulty are treated as systematically as possible. The examples are not too complex to be easily understood. They should serve as inspiration for own projects. A technically strict systematology and a complete description of the programming language is not intended to not overwhelm beginners.

The artist and actor Armin Mueller-Stahl is well-known for movies such as Night on Earth, Avalon, and Music Box and has been nominated for the Oscar numerous times. Long ago he also began showing his talent for subtle drawings, paintings, and prints. This new little book for literature enthusiasts unites Mueller-Stahl's talent for painting with his gift for writing and playing music. The Blue Cow

is a colorful book of watercolors and charcoal on paper drawings based on the quirky ballad of the same name about an independent-minded cow who drinks up her own milk first, and then herself. Mueller-Stahl wrote and sang the piece, which, at second glance, proves to

be a heavily symbolic fable, already fifty years ago. The symbolism of the Blue Cow that engulfed itself, was also understood by the GDR authorities--who were not at all amused. (German edition: ISBN 978-3-7757-4250-4)
