DALE MCCARTY

Poor's Manual of Industrials Disha Publications

This book of essays, which draws on the expertise of leading textile scholars in Britain and the United States, focuses on the problem of and responses to foreign competition in textiles from the late nineteenth century to the present day. A short introductory essay by the editor is followed by a survey of the debates surrounding the British cotton industry, foreign competition and competitive advantage. The other essays consider various aspects of that competition, including textile machine-making, Lancashire perceptions of the rise of Japan during the inter-war period and responses to foreign competition

in the British cotton industry since 1945, whilst others deal with the decline and rise of merchanting in UK textiles and European competition in woollen yarn and cloth from 1870 to 1914. A recurring theme in a number of the essays is Japanese competitive advantage in textiles. The book is unique since although there are numerous books dealing with the problems of British staple industries, none focuses primarily on the issue of competition, its sources and responses, nor on textiles in general rather than a single industry. Moreover, since the scope is international rather than limited only to the UK, it follows recent trends in British busines history away from single company case studies towards a more thematic, comparative approach. In addition, the international authorship of these papers gives this book, first published in 1991, wide appeal.

The Electrician Woodhead Publishing

Handbook of Properties of Textile and Technical Fibres, Second Edition introduces tensile properties and failure and testing of fibers, also examining tensile properties and the failure of natural fibers, such as cotton, hemp, flax, agave, wool and silk. Next, the book discusses the tensile properties and failure of synthetic fibers, ranging from polyamide, polyester, polyethylene and carbon fibers. Chapters provide a general background of the fiber, including its manufacture, microstructure, factors that affect tensile properties and methods to improve tensile failure. With its distinguished editor and international contributors, this book is an important reference for fiber scientists, textile technologists, engineers and academics. Offers up-to-date coverage of new and advanced materials for the fiber and textile industries Reviews structure-property relationships of high-performance natural, synthetic polymer and inorganic fibers Offers a range of perspectives on the tensile properties of fibers from an international team of authors with diverse expertise in academic research and in textile development and manufacture Fibre2Fashion - Textile Magazine - February 2018 New York : H.W. Wilson

This edition, representing 956 libraries and 156,449 titles, incorporates the 2nd ed. (1943) and its two supplements together with new titles and additional locations.

Textile World Routledge

Bangladesh's readymade garment industry has so far shown remarkable resilience in the face of incessant pressure—from Western brands to international labour unions to the government—to retain its position in global apparel exports. February 2018 issue of Fibre2Fashion discusses recent

developments, challenges and the road ahead for the Bangladesh garment industry. The differentiating characteristics of US cotton, smart textiles that store data, and the Milano Moda Uomo event are also covered, along with the recently declared textile policy by the UP government and other regular features. Fibre2Fashion magazine—the print venture of Fibre2Fashion.com since 2011—is circulated among a carefully-chosen target audience globally, and reaches the desks of top management and decision-makers in the textiles, apparel and fashion industry. As one of India's leading industry magazines for the entire textile value chain, Fibre2Fashion Textile Magazine takes the reader beyond the mundane headlines, and analyses issues in-depth.
