Peterson's Master the GED® Test: The Social

Studies Test begins

with a detailed

explanation of the

subject areas and

question formats of the

Social Studies Test.

This is accompanied by practice questions with answer explanations to give you an instant-and

visual-review of the type of questions you will encounter.

This eBook then reviews the four content areas covered by the Social

Studies Test: history, civics and government, economics, and

geography. The review sections also include practice questions.

To assist readers preparing for the GED in Canada, sections focusing on Canadian history and

government are included. You will also find summaries of key U.S. historical documents.

How to Prepare for the  
GED Test with CD-ROM,  
2nd Edition Steck-

More than 2 million adults are incarcerated in U.S. prisons, and each year more than 700,000 leave federal and state prisons and return to communities. Unfortunately, within three years, 40 percent will be reincarcerated. One reason for this is that ex-offenders lack the knowledge, training, and skills to support a successful return to communities. Trying to reduce such high recidivism rates is partly why states devote resources to educating and training individuals in prison. This raises the question of how effective -- and cost-effective -- correctional education is: an even more salient question

given the funding environment states face from the 2008 recession and its continuing aftermath. With funding from the Second Chance Act of 2007, the Bureau of Justice Assistance, U.S. Department of Justice, asked RAND to help answer this question as part of a comprehensive examination of the current state of correctional education for incarcerated adults and juveniles. The RAND team conducted a systematic review of correctional education programs for incarcerated adults and juveniles. This included a meta-analysis on correctional education's effects on recidivism and postrelease employment outcomes for incarcerated adults,

as well as a synthesis of evidence on programs for juveniles. The study also included a nationwide survey of state correctional education directors to understand how correctional education is provided today and the recession's impact. The authors also compared the direct costs of correctional education with those of reincarceration to put the recidivism findings into a broader context.

5 Practice Exams for the GED Test, 2nd Edition John Wiley & Sons

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were

the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today.

Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and

andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

*Young Citizens of the World* takes a clear stance: Social studies is about citizenship education that is informed, deliberative, and activist—citizenship not only as a noun, something one studies, but as a verb, something one DOES. Its holistic, multicultural approach is based on this clear curricular and pedagogical purpose. Straightforward, engaging, and highly interactive, the book encourages students (and their teachers) to become informed, think it through, and take action. Each chapter is written as a civic engagement which is teacher-ready for use in elementary classrooms. A set of six teaching strategies that are constructive,

inquiry-driven, dramatic, and deliberative bring the curricular framework to life through intensive, integrated meaningful studies of special places, important people, and significant times. Readers are invited to rehearse the projects in their social studies education courses and then to reinterpret them for their classrooms. The projects are supported by important resources for teaching, including supportive children's literature, links to internet sites, and visual sources and by a Companion Website that enhances and extends the text.

They are used to evaluate schools, to assign

students to tracks within schools, and to identify weaknesses in student knowledge. The GED is an achievement test used to grant the status of high school graduate to anyone who passes it. GED recipients currently account for 12 percent of all high school credentials issued each year in the United States. But do achievement tests predict success in life? *The Myth of Achievement Tests* shows that achievement tests like the GED fail to measure important life skills. James J. Heckman, John Eric Humphries, Tim Kautz, and a group of scholars offer an in-depth exploration of how the GED came to be used throughout the United States and why our

reliance on it is dangerous. Drawing on decades of research, the authors show that, while GED recipients score as well on achievement tests as high school graduates who do not enroll in college, high school graduates vastly outperform GED recipients in terms of their earnings, employment opportunities, educational attainment, and health. The authors show that the differences in success between GED recipients and high school graduates are driven by character skills. Achievement tests like the GED do not adequately capture character skills like conscientiousness, perseverance, sociability, and curiosity. These skills

are important in predicting a variety of life outcomes. They can be measured, and they can be taught. Using the GED as a case study, the authors explore what achievement tests miss and show the dangers of an educational system based on them. They call for a return to an emphasis on character in our schools, our systems of accountability, and our national dialogue.
